This online FDP provides awareness on current developments in Mathematics from multiple domains. The program is intended to update existing knowledge in faculty members and create a deeper interest in various fields of Mathematics. This FDP will provide insight into applications of Graph Theory, Machine Learning, Functional Analysis, Linear Algebra and Statistics. This FDP also includes concepts of Machine Learning which helps us for data analysis and to build analytical models that understand data. In many aspects, Applications of Mathematics with conceptual approaches definitely enrich the faculty members for enhancing their knowledge in multifarious fields.

It will provide an opportunity for faculty working in AICTE approved engineering colleges and UG/PG colleges affiliated to various Universities to learn about the current state of research and techniques in mathematical sciences.

**OBJECTIVES:**

- To foster a culture of lifelong learning process among faculty members by motivating them to remain up to date on cutting-edge research, educational needs, and creative approaches to teach mathematics.
