BAPATLA ENGINEERING COLLEGE::BAPATLA

(Autonomous)

Department of Electrical and Electronics Engineering

COURSE STRUCTURE AND SYLLABAI FOR TWO YEAR B.Tech.-(Draft)

BAPATLA ENGINEERING COLLEGE::BAPATLA
(Autonomous)

Vision of the Institute

To build centers of excellence, impart high quality education and instill high standards of ethics and professionalism through strategic efforts of our dedicated staff, which allows the college to effectively adapt to the ever-changing aspects of education.

To empower the faculty and students with the knowledge, skills and innovative thinking to facilitate discovery in numerous existing and yet to be discovered fields of engineering, technology and interdisciplinary endeavors.

Mission of the Institute

Our Mission is to impart the quality education at par with global standards to the students from all over India and in particular those from the local and rural areas.

We continuously try to maintain high standards so as to make them technologically competent and ethically strong individuals who shall be able to improve the quality of life and economy of our country.

Vision of the Department

The Department of Electrical & Electronics Engineering provides programs of the highest quality to produce globally competent technocrats who can address challenges of the millennium to achieve sustainable socio - economic development.

Mission of the Department

1. To provide quality teaching blended with practical skills.
2. To prepare the students ethically strong and technologically competent in the field of Electrical and Electronics Engineering.
3. To motivate the faculty and students in the direction of research and focus to fulfill social needs.

BAPATLA ENGINEERING COLLEGE::BAPATLA
(Autonomous)

PROGRAM EDUCATIONAL OBJECTIVES (PEO'S)

PEO1	To build a strong foundation in the principles of Basic Sciences, Mathematics and Engineering to solve real world problems encountered in modern electrical engineering and pursue higher studies/ placement/ research.
PEO2	To develop an integration of knowledge of various courses to design an innovative and cost-effective product in the broader interests of the organization & society.
PEO3	To provide an ability to lead and work in their profession with multidisciplinary approach, cooperative attitude, effective communication and interpersonal skills by participating in team oriented and open-ended activities.
PEO4	To integrate an ability to enhance career development, adapt to changing professional and societal needs by engaging in lifelong learning

PROGRAM OUTCOMES (PO'S)

Program Outcomes		Engineering Graduates will be able to
PO1	Engineering Knowledge	Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.
PO2	Problem Analysis	Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)
PO3	Design/Development of Solutions	Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)
PO4	Conduct Investigations of Complex Problems	Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).
PO5	Engineering Tool Usage	Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)
PO6	The Engineer and The World	Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).
PO7	Ethics	Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)
PO8	Individual and Collaborative Team work	Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams
PO9	Communication	Communicate effectively and inclusively within the engineering community and society at large, such as being

		able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences
PO10	Project Management and Finance	Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.
PO11	Life-Long Learning	Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

PROGRAM SPECIFIC OUTCOMES (PSO'S)

PSO1	The Electrical and Electronics Engineering graduates are capable of applying the Knowledge of mathematics and sciences in modern power industry.
PSO2	Analyze and design efficient systems to generate, transmit, distribute and utilize electrical energy to meet social needs using power electronic systems.
PSO3	Electrical Engineers are capable to apply principles of management and economics for providing better services to the society with the technical advancements in renewable and sustainable energy integration.

BAPATLA ENGINEERING COLLEGE::BAPATLA
(Autonomous)

Academic Rules & Regulations
(R24 Regulations)
Regulations for Four Year Bachelor of Technology (B.Tech)
Degree Program for the Students Admitted from the Academic Year 2024-25

1. Admissions

The sanctioned intake in a particular B.Tech program comprises of Category-A (presently 70%) and Category-B (30%) seats which is supplemented with supernumerary (10%) EWS seats. Admissions for the Category-A seats and the supernumerary seats shall be made by the Andhra Pradesh (A.P.) State Government based on the merit rank obtained by the student in the common entrance examination conducted. Admissions for the remaining Category-B seats shall be made by the college in accordance with the guidelines issued by the A.P. State Government.

2. Medium of Instruction and Examination:

The medium of instruction of the entire B.Tech undergraduate program in Engineering and Technology and the examinations will be in English only.

3. Minimum Instruction Days:

A semester comprises of 90 working days and the year is divided into two semesters.

4. Award of B.Tech. Degree:

A student will be declared eligible for the award of the B.Tech degree if he / she fulfills the following academic regulations:

a. The student pursues a program of study in B.Tech for four academic years and in not more than eight academic years. A lateral entry student pursues a program of study for three academic years and not more than six academic years. However, for the students availing Gap year facility, this period shall be extended by two years at the most and these two years would not be counted in the maximum time permitted for graduation.

b. The student registers for 160 credits and secures all 160 credits. However, a lateral entry student registers for 121 credits and secures all the 121 credits from III semester to VIII semester of Regular B. Tech program.

c. **Award of B. Tech degree with Minor:**
The student secures an additional 16 credits from Minor stream chosen and fulfills all the requisites of a B.Tech program i.e. secures 160 (Regular program) / 121 (Lateral Entry program) credits.
Minor is to be completed simultaneously with B. Tech program. Registering for a Minor degree is optional.

d. **Award of B.Tech degree with Honors:**
The student secures an additional 16 credits fulfilling all the requisites of B.Tech program i.e. secures 160 (Regular program) / 121 (Lateral Entry program) credits.

Registering for Honors is optional and is to be completed simultaneously with B.Tech program.

Students can register either for Honors stream or Minor stream.

5. Courses of study:

At present the following B.Tech programs of study are offered.

S. No.	Title of the UG Program	Abbreviation
1.	Civil Engineering	CE
2.	Computer Science & Engineering	CS
3.	Computer Science & Engineering (Cyber Security)	CB
4.	Computer Science & Engineering (Data Science)	DS
5.	Computer Science & Engineering (Artificial Intelligence & Machine Learning)	CM
6.	Electronics & Communication Engineering	EC
7.	Electrical & Electronics Engineering	EE
8.	Information Technology	IT
9.	Mechanical Engineering	ME

6. Credits:

a. **Credit:** A unit by which the course work is measured. It determines the number of hours (60 minutes) of instruction required per week. One credit is equivalent to one hour of teaching (Lecture/Tutorial) or two hours of practical work/field work per week.

b. **Academic Year:** Two consecutive (one odd & one even) semesters constitute one academic year.

c. **Choice Based Credit System (CBCS):** The CBCS provides a choice for students to select courses (Professional, Job Oriented & Open Electives) from the prescribed set of courses.

d. Each course in a semester is assigned certain number of credits based on the following

1 Hr. Lecture (L) per week	1 Credit
1 Hr. Tutorial (T) per week	1 Credit
1 Hr. Practical (P) per week	0.5 Credit
Internship of 4 – 6 weeks	2 Credits
Project Work of 16 weeks	12 Credits

7. Course Structure:

Every course of the B.Tech program will be placed in one of the 7 categories with suggested credits as listed below.

S. No.	Category	AICTE Recommended Credits (%)	Breakup of Credits (Total 160)
1.	Humanities and Social Sciences including Management (HM)	5 – 8 %	8 – 13
2.	Basic Science Courses (BS)	12 – 16 %	19 – 26
3.	Engineering Science Courses (ES)	10 – 18 %	16 – 29
4.	Professional Core Courses (PC)	30 – 36 %	48 – 58
5.	Electives – Professional Electives (PE); Job Oriented Electives (JOE); Open Electives (OE); Skill Enhancement Courses (SEC)	19 – 23 %	31-37
6.	Internships & Project Work (PR)	8 – 11 %	13-18
7.	Mandatory Courses (MC)	-	Non-credit

8. Course Evaluation Process:

The performance of the students in each semester shall be assessed course wise. All assessments will be done on an absolute mark basis. However, for the purpose of reporting the performance of a candidate, letter grades and grade points will be awarded.

The performance of a student in each course is assessed with alternate assessment methods, term examinations on a continuous basis during the semester called Continuous Internal Evaluation (CIE) and a Semester End Examination (SEE) conducted at the end of the semester. For each course, there shall be a comprehensive SEE of three hours duration at the end of each Semester, except Mandatory courses.

The performance of a student in internships, NSS/NCC/Scouts & Guides/Community Service and Health & Wellness/Yoga/Sports will be evaluated after completion of the course at the end of that semester.

8.1 Weightage for Course Evaluation:

The distribution of marks between CIE and SEE to be conducted at the end of the semester will be as follows:

Nature of the Course	CIE	SEE
Theory Courses	40	60
Practical Courses	40	60

Mandatory Courses	40	-
NSS/NCC/Scouts & Guides/Community Service and Health & Wellness/Yoga/Sports	-	100
Summer Internship	-	100
Project Work	40	60

8.2.1 CIE in Theory/Mandatory Courses:

In each Semester there shall be two Term examinations and ***Alternate Assessment Tools (AAT)*** like Home Assignment, Class Test, Problem Solving, Group Discussion, Quiz, Seminar and Field Study in every theory course. The AAT with detailed modality of evaluation for each course shall be finalized by the teacher concerned before beginning of the course. It will be reviewed and approved by the Department Committee.

The Term Examination is conducted in the regular mode according to a schedule which will be common for a particular semester of study. The maximum weightage for Term Examinations, AATs and the calculation of marks for CIE in a theory course is given in the following Table.

Term Exams (Max. 20 marks*)	**AAT (Max. 15 marks**)**	**Attendance (Max. 5 marks)**
75% of marks obtained in the best performed term exam + 25% of marks obtained in the other term exam	Continuous assessment by teacher as per the predetermined course delivery & assessment plan. (Minimum two & maximum four assessments). AAT marks shall be considered based on average of all tests conducted.	Attendance secured & marks awarded will be as under: ≥75% and <80% - 2 marks ≥80% and <85% - 3 marks ≥85% and <90% - 4 marks ≥90% - 5 marks

*Term Examination will be conducted for 30 marks and reduced to 20 marks.

**Each AAT will be conducted for 10 marks and the average performance shall be scaled up to 15 marks.

8.2.2 CIE in Laboratory Courses:

The CIE for 40 marks of a laboratory course comprises of 15 marks for day-to-day laboratory work, 5 marks for record submission, 5 marks for attendance and 15 marks for a laboratory examination at the end of the laboratory course work. In any semester, a minimum of 90% of prescribed number of experiments / exercises specified in the syllabi for laboratory course shall be completed by the students. They shall complete these experiments / exercises in all respects and get the record certified by the internal lab teacher concerned and the Head of the Department.

8.2.3 CIE in Project Work:

The CIE is for 40 marks which consist of 20 marks for reviews at the end of each month as per the process document in the form of seminars / presentations, 5 marks for attendance and 15 marks for the evaluation of project report submitted at the end of the semester.

8.2.4 Pass criteria for CIE:

A minimum of 20 (50%) marks are to be secured exclusively in the CIE with a minimum of 65% attendance in that course to be declared as qualified (Q) in that course and be eligible to appear for the SEE of that course. If a student fails to obtain 20 marks in CIE or a minimum of 65% attendance in that course, then the student will be regarded as not qualified (NQ) and such a student can register for the course repetition as per the guidelines mentioned in clause 13 to qualify in that course. After securing 20 marks in course repetition, the student can appear for the SEE of that course as a supplementary candidate.

8.3.1 SEE in Theory Course and Project Work:

a) For each theory course, there shall be a comprehensive SEE of three hours duration at the end of each Semester for 60 marks.

b) Project Work shall be evaluated in the form of a Viva-Voce and demonstration of the thesis work for 60 marks. Viva-voce Examination in project work shall be conducted by one internal examiner appointed by the HOD and one external examiner to be appointed by the principal.

8.3.2 Evaluation of Internships:

Summer Internship at the end of IV & VI semesters carried out in industry / organization are to be evaluated in V & VII semesters respectively after the submission of certificate provided by the organization and a concise report submitted by the student to the department committee. The internship will be evaluated by the department committee for a total of 100 marks with 50 marks for the report and 50 marks based on seminars / presentation given to the department committee by the student.

8.3.3 Evaluation of NSS/NCC/Scouts & Guides/Community Service and Health & Wellness/Yoga/Sports:

The above courses will be evaluated by the department committee for a total of 100 marks with 50 marks for the activities pursued by the student during that semester and 50 marks based on seminars / presentation given to the department committee by the student.

8.3.4 Pass Criteria for SEE:

a) Theory/Laboratory Courses and Project Work

A minimum of 21 (35%) marks are to be secured exclusively in the SEE of the above courses for the award of the grade and securing the credits for that course.

A student eligible to appear for the SEE in a course but is absent or has failed the examination may appear for SEE of that course in the next supplementary examination when offered.

b) Internship, NSS/ NCC/ Scouts & Guides/ Community Service and Health & Wellness/ Yoga/ Sports

A minimum of 40 (40%) marks are to be secured exclusively in the evaluation of the above courses for the award of the grade and securing the credits for that course.

A student eligible to appear for the evaluation in the above courses but is absent or has failed in the examination may appear for evaluation of that course in the next supplementary examination when offered.

9. Choice Based Courses:

Students can select a course from a prescribed set of courses offered by the department in the following categories.

a) Professional Elective Courses: There shall be five Professional Elective Courses from V Semester to VII. For each elective course there shall be a choice such that the student can choose a course from the list of courses offered by the department for that elective.

b) Job Oriented Elective Courses: There shall be three Job Oriented elective Courses in all programs from V to VII semester. For each elective course there shall be a choice such that the student can choose a course from the list of courses offered by the department for that elective.

c) Open Elective Courses: One Open Elective course in VII semester will be offered by various departments. A student can choose and register for an open elective course which is offered by other departments only and he / she has not studied the same course in any form during the Program.

d) Massive Open Online Courses (MOOCs): A Student must pursue and complete one course compulsorily through MOOCs from approved organizations for awarding the degree. A student can pursue MOOCs courses from Professional Elective / Job Oriented Elective / Open Elective Courses only. The student must inform and take prior permission / approval from the Internal Department Committee. The courses must be of a minimum of 8 weeks in duration and shall contain proctored examinations. The student must acquire a certificate for the concerned course from the agency to earn the credits for that course. For further details and guidelines**,** the students can visit the college website.

The Internal Department Committee comprising Head of Department and two senior faculty members shall evaluate the certificate / grades / marks awarded for a course by external agencies and convert the same to equivalent marks / grades.

10. Induction Program:

There shall be a mandatory induction program for three weeks before the commencement of the first semester with no credits.

11. There shall be credit programs like NSS/NCC/Scouts & Guides/Community Service and Health & Wellness/Yoga/Sports. Also Design Thinking & Innovation and Tinkering lab are made compulsory credit courses for all branches.

12. Make-up Test:

a) A student can appear for a Make-up Test for a maximum of two theory courses of a semester to improve marks in the Continuous Internal Evaluation (CIE).

b) A student is eligible for the Make-up test which is conducted after the second Mid Term examination and before SEE examination if the student satisfies the following conditions.

i) Unable to secure 50% internal marks (CIE) and has more than or equal to 65% attendance in a particular theory course (After finalizing the internal marks).

ii) Attendance in Remedial classes is more than or equal to 65% (if Remedial classes are conducted) or secured greater than 50% marks in the I Mid Term Examination and AAT-1 together.

iii) Attended 50% of CIE tests (at least one AAT & one Mid Term Examinations).

The make-up test will be conducted for 40 marks (8 questions of 1 mark each, 2 questions of 16 marks each) in Mid Examination format covering the entire syllabus and the marks obtained in this test are final. However, the maximum marks awarded will be 20 only.

The students must apply to the principal through the respective HOD by paying prescribed fees.

The documents for registration of the Make-up test are available from the departments and college website.

13. Course Repetition:

The students not qualified to write SEE in a course may register for the repeater courses through Course Repetition. The students must apply to the principal through the respective HOD by paying prescribed fees.

A student can take up a maximum of two theory courses and one laboratory course in a semester immediately after the semester end examinations of that semester. The students who are not taking regular semester courses may additionally register for one more theory course.

The documents for registration of course and monitoring the candidates registered for course repetition are available from the departments and college website.

14. Minimum Academic Requirements for Promotion:

a) Semester Promotion

A student is eligible to register for SEE if he/she satisfies the following conditions. However, the student can appear only for the SEE of those courses in which the student is qualified (Q).

i) Attendance Requirements

A student shall be eligible to register for SEE, if he / she acquires a minimum of 75% of attendance in aggregate of all the courses in a semester.

Condonation of shortage of attendance in aggregate up to 10% (65% and above and below 75%) in each semester may be granted on genuine medical grounds with a doctor certificate and duly approved by the principal.

A shortage of attendance below 65% in aggregate shall in NO case be condoned. Students whose shortage of attendance is not condoned in any semester are not eligible to take their SEE of that semester and will be considered as detained in that semester.

If a student does not satisfy the attendance requirements of the present semester, he / she will not be promoted to the next semester (considered as detained in the present semester). They may seek readmission for that semester when offered next.

A stipulated fee shall be payable towards condonation of shortage of attendance to the college.

ii) Qualification in CIE

A student must qualify in a minimum of three courses in each semester (as per Clause 8.2.4) in CIE to register for the SEE of that semester.

If a student does not satisfy the above conditions, he / she will not be promoted to the next semester (considered as detained in that semester). They may seek readmission for the detained semester when offered next.

b) Promotion / Detention Conditions based on the minimum credits to be secured by the student:

A student shall be promoted from I to II, III to IV, V to VI and VII to VIII semesters if he / she fulfills the academic requirement as specified in 14.a). For other semesters i.e. II to III (1st year to 2nd year), IV to V (2nd year to 3rd year) and VI to VII (3rd year to 4th year) semesters, the following criteria is to fulfilled in addition to 14.a) clause.

i) II semester to III semester (1st year to 2nd year)

A student shall be promoted from II semester to III semester only if he / she fulfills the academic requirement of securing 25% of the credits in the courses that have been studied up to I Semester.

ii) IV semester to V semester (2nd year to 3rd year)

A student shall be promoted from IV semester to V semester only if he/she fulfills the academic requirement of securing 40% of the credits in the courses that have been studied up to III Semester.

iii) VI semester to VII semester (3rd year to 4th year)

A student shall be promoted from VI semester to VII semester only if he/she fulfills the academic requirements of securing 40% of the credits in the courses that have been studied up to V semester.

If a student is not promoted or detained for want of credits in a particular semester as per clause 14.b) above, the student may secure the required credits through supplementary examinations and only after securing the required credits he / she shall be permitted to join in the III or V or VII Semester as the case may be.

c) With–holding of Results

If the candidate has any dues not paid to the college or case of indiscipline or malpractice is pending against him/her, the result of the candidate shall be withheld in such cases until the issue is resolved.

15. Guidelines for offering a Minor in a discipline:

Minor in a discipline concept is introduced in the curriculum for all conventional B. Tech programs in which it offers a Major Program (B.Tech degree). The main objective of Minor in a discipline is to provide additional learning opportunities for academically motivated students and it is an optional added feature of the B. Tech. program.

a. Students who are desirous of pursuing their special interest areas other than the chosen discipline of Engineering may opt for additional courses in Minor specialization groups offered by a department other than their parent department.
b. The BOS concerned shall identify as many tracks as possible in the areas of emerging technologies and industrial relevance / demand. For example, the Minor tracks can be the fundamental courses in CSE, ECE, EEE, CE, ME etc or industry tracks such as Artificial Intelligence (AI), Machine Learning (ML), Data Science (DS), Robotics, Electric vehicles, VLSI etc.
c. The list of disciplines / branches eligible to opt for a particular industry relevant minor specialization shall be clearly mentioned by the respective BOS.
d. There shall be no limit on the number of programs offered under Minor. The Institution can offer Minor programs in emerging technologies based on expertise in the respective departments or can explore the possibility of collaborating with the relevant industries/agencies in offering the program.
e. The concerned BOS shall decide on the minimum enrolments for offering Minor program by the department. If a minimum enrolments criterion is not met, then the students may be permitted to register for the equivalent MOOC courses as approved by the concerned Head of the department in consultation with BOS.
f. A student shall be permitted to register for Minor program at the beginning of 4th semester provided that the student must have acquired a minimum of **7.0 CGPA** up to the end of 3rd semester without any backlogs. A CGPA of 7.0 must be maintained in the subsequent semesters without any backlog to keep the Minor registration active.
g. A student must earn an additional 16 credits in the specified area to be eligible for the award of B. Tech degree with Minor. This is in addition to the credits essential for obtaining the Undergraduate degree in Major discipline (i.e. 160 credits for regular students and 121 credits for Lateral Entry students). The concerned BOS shall finalize the modalities to earn the above credits.
h. For securing the above additional 16 credits, the students must register and complete three courses of 4 credits each offered by the department concerned. These 3 courses must contain a laboratory component also (i.e. Embedded course having three lecture hours and two practical hours). The balance of 4 credits may be

secured through two MOOCs courses of 2 credits each or an embedded course offered by the department.

i. Courses that are used to fulfil the student's primary Major may not be double counted towards the Minor. Courses with content substantially equivalent to courses in the student's primary Major may not be counted towards the Minor.
j. The student registered for Minor shall pass in all subjects that constitute the requirement for the Minor program. No class / division (i.e., second class, first class, distinction, etc.) shall be awarded for Minor degree programme
k. If a student drops (or terminated) from the Minor program, they cannot convert the earned credits into free or core electives; they will remain extra.
l. In case a student fails to meet the CGPA requirement for B.Tech degree as per clause 15.f or drops (or terminated) from the Minor program, he/she will be dropped from the list of students eligible for Minors degree and they will receive B.Tech degree only. However, such students will receive a separate grade sheet mentioning the additional courses completed by them.
m. The Minor will be mentioned in the Major degree certificate only. No additional degree certificate will be given for Minor degree.
n. Transfer of credits from Minor to regular B. Tech degree and vice-versa shall not be permitted
o. Minor must be completed simultaneously with a Major degree program. A student cannot earn the Minor degree after he / she has already earned bachelor's degree.
p. The documents for registration of Minor courses are available from the departments and college website.

16. Guidelines for offering an Honors in a Discipline:

The objective of introducing B.Tech (Honors) is to facilitate the students to choose additional specialized courses of their choice and build their competence in a specialized area in the UG level. The programme is a best choice for academically excellent students having good academic record and interest towards higher studies and research.

Honors is introduced in the curriculum of all B. Tech. programs offering a Major degree and is applicable to all B. Tech (Regular and Lateral Entry) students admitted in Engineering & Technology. Students are eligible to opt for Honors program offered by the same Department / Discipline.

a. Students who are desirous of pursuing special interest / advanced areas of their discipline of Engineering may opt for additional courses as part of Honors programs offered by the parent department.
b. The BOS concerned shall identify as many tracks as possible in the areas of emerging technologies and industrial relevance / demand.
c. A student shall be permitted to register for Honors program at the beginning of 4^{th} semester provided that the student must have acquired a minimum of **7.5 CGPA** up to the end of 3^{rd} semester without any backlogs. A CGPA of 7.5 must be maintained in the subsequent semesters without any backlog to keep the Honors registration active.
d. A student must earn additional 16 credits for award of B.Tech. (Honors) degree from the same branch / department / discipline registered for Major degree. This is in addition to the credits essential for obtaining the Undergraduate degree in Major

discipline (i.e., 160 credits for regular students and 121 credits for Lateral Entry students). The concerned BOS shall finalize the modalities to earn the above credits.

e. For securing the above additional 16 credits, the students must register and complete three courses of 4 credits each offered by the department concerned. These 3 courses must contain a laboratory component also (i.e. Embedded course having three lecture hours and two practical hours). The balance of 4 credits may be secured through two MOOCs courses of 2 credits each or an embedded course offered by the department.
f. Courses that are used to fulfil the student's primary Major may not be counted towards the Honors.
g. The student registered for Honors shall pass in all subjects that constitute the requirement for the Honors program. No class / division (i.e., second class, first class and distinction, etc.) shall be awarded for Honors program.
h. If a student drops or is terminated from the Honors program, the additional credits earned so far cannot be converted into open or core electives; they will remain extra.
i. In case a student fails to meet the CGPA requirement for B.Tech degree as per clause 16.c or drops (or terminated) from the Honors program, he/she will be dropped from the list of students eligible for degree with Honors and they will receive B.Tech degree only. However, such students will receive a separate grade sheet mentioning the additional courses completed by them
j. The Honors will be mentioned in the Major degree certificate only as Bachelor of Technology (Honors). No additional degree certificate will be given for Honors.
k. Transfer of credits from Honors to regular B. Tech degree and vice-versa shall not be permitted.
l. Honors is to be completed simultaneously with a Major degree. A student cannot earn the Honors after he / she has already earned bachelor's degree
m. The documents for registration of Honors are available from the departments and college website.

17. Summer Internships:

Students shall undergo two summer internships each for a minimum of four weeks duration at the end of second and third years of the program for 2 credits each. The organization in which the student wishes to carry out Internship needs to be approved by Internal Department Committee comprising Head of Department and two senior faculty members. The student shall submit a report along with an internship certificate from the organization. The evaluation of the first and second summer internships shall be conducted at the end of the V Semester & VII semester respectively.

Completion of the internship is mandatory, if any student fails to complete internship, he/she will not be eligible for the award of degree. In such a case, the student shall repeat the internship in the subsequent summer. The student pursuing two summer internships in the same summer is not permitted.

Community Service Project focussing on specific local issues shall be an alternative to the four weeks of summer Internship. The Community Service Project shall be for 4 weeks in duration which includes preliminary survey for 1 week, community awareness programs for one week, community immersion program in consonance with

Government agencies for 1 week and a community exit report (a detailed report) for 1 week.

18. A student shall register and put-up minimum attendance in all 160 credits and earn all the 160 credits. In the case of lateral entry students, the number of credits is 121.

19. Students who fail to earn 160 credits as indicated in the course structure within eight academic years from the year of their admission shall forfeit their seat in B.Tech. Program, and their admission shall be cancelled. However, for the students availing the Gap year facility, this period shall be extended by corresponding gap year duration availed.

Lateral entry students who fail to earn 121 credits as indicated in the course structure within six academic years from the year of their admission shall forfeit their seat in B.Tech. Course and their admission shall be cancelled. However, for the students availing gap year facility, this period shall be extended by corresponding gap year duration availed.

20. Securing Credits and award of Grade Points:

Grading

After each course is evaluated for 100 marks, the marks obtained in each course will be converted to a corresponding letter grade as given below, depending on the range in which the marks obtained by the student fall.

Structure of Grading of Academic Performance

Range in which the % of marks in the course fall	Grade	Grade Points Assigned
≥ 90	S (Superior)	10
80-89	A (Excellent)	9
70-79	B (Very Good)	8
60-69	C (Good)	7
50-59	D (Average)	6
40-49	E (Below Average)	5
< 40	F (Fail)	0
Absent	Ab (Absent)	0

A student obtaining Grade F shall be considered failed and will be required to reappear for that course when the next supplementary SEE is offered. Same is the case with a student who obtains 'Ab' in the SEE.

Since there are no credits for Mandatory /Audit courses, only 'Pass' or 'Fail' shall be mentioned for such courses.

21. Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA):

(i) The Semester Grade Point Average (SGPA) in a particular semester is the ratio of sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student, i.e.,

$$\text{SGPA} = \frac{\sum_{i=1}^{n} C_i \times GP_i}{\sum_{i=1}^{n} C_i}$$

where, C_i is the number of credits of the i^{th} course and GP_i is the grade point scored by the student in the i^{th} course.

(ii) The Cumulative Grade Point Average (CGPA) will be computed in the same manner considering all the courses undergone by a student over all the semesters of a program, i.e.,

$$\text{CGPA} = \frac{\sum_{j=1}^{m} SGPA_j \times TC_j}{\sum_{j=1}^{m} TC_j}$$

where "$SGPA_j$" is the SGPA of the j^{th} semester and TC_j is the total number of credits in that semester.

(iii) Both SGPA and CGPA shall be truncated to 2 decimal points and reported in the transcripts.

(iii) While computing the SGPA, the courses in which the student is awarded Zero grade points will also be included.

(iv) Grade Point: It is a numerical weightage allotted to each letter grade on a 10-point scale.

(v) Letter Grade: It is an index of the performance of students in a said course. Grades are denoted by letters S, A, B, C, D, E and F.

22. Award of Class:

After a student has satisfied the requirements prescribed for the completion of the program and is eligible for the award of B. Tech. degree, he / she shall be placed in one of the following four classes.

Class Awarded	CGPA Secured
First Class with Distinction	≥ 7.5
First Class	≥ 6.5 < 7.5
Second Class	≥ 5.5 < 6.5
Pass Class	≥ 5.0 < 5.5

23. Gap Year:

Gap year concept for Student Entrepreneur shall be introduced and outstanding students who wish to pursue entrepreneurship / become entrepreneur are allowed to take a break of one year at any time after II year to pursue entrepreneurship program / to establish startups. This period may be extended to two years at the most and these two years would not be counted as the maximum time for graduation.

An evaluation committee shall be constituted by the College to evaluate the proposal submitted by the student and the committee shall decide whether to permit the student(s) to avail themselves of the Gap Year.

After rejoining the student can pursue the remaining period of study under transitory regulations (if the regulation changes).

24. Transitory Regulations:

Discontinued or detained candidates (as per clause 14.b) are eligible for readmission as and when the semester is offered and after fulfillment of academic regulations. Candidates who have been detained as per clause 14.a) are eligible for readmission into the unfinished semester from the date of commencement of class work with the same or equivalent subjects as and when subjects are offered, and they will be in the academic regulations into which they get readmitted.

Candidates who were permitted with Gap Year shall be eligible for rejoining into the succeeding year of their B.Tech from the date of commencement of class work, and they will be in the academic regulations into which the candidate is presently re-joining.

The readmitted students must follow the regulations in which he/she is admitted and residual courses if any must be completed based on the equivalent courses for each semester specified by the BOS considering the previous and readmitted regulations.

25. Credit Transfer Policy:

Adoption of MOOCs is mandatory, to enable Blended model of teaching-learning as also envisaged in the NEP 2020. As per University Grants Commission (Credit Framework for Online Learning Courses through SWAYAM) Regulation, 2016, the Institution shall allow up to a maximum of 15 credits (5 courses, approximately 10% for the total credits of the program) through MOOCs platform.

a. The Institution shall offer credit mobility for MOOCs and give the equivalent credit weightage to the students for the credits earned through online learning courses.
b. Student registration for the MOOCs shall be only through the respective department of the institution, it is mandatory for the student to share necessary information and take prior approval from the department.
c. Credit transfer policy will be applicable to the Professional Elective Courses, Job Oriented Elective Courses, Open Elective Courses & Management courses only.
d. The concerned department shall identify the courses permitted for credit transfer.
e. The department shall notify the list of the online learning courses at the beginning of semester eligible for credit transfer.
f. The department shall designate a faculty member as a Mentor for each course to guide the students from registration till completion of the credit course.

g. The department shall ensure no overlap of MOOC exams with that of the university examination schedule. In case of delay in results, the Institution will re-issue the marks sheet for such students.
h. Credits transfer will be considered only after successful completion of the course and submitting a certificate issued by the competent authority along with the percentage of marks and grades.
i. The institution shall submit the following to the examination section:
    1. List of students who have passed MOOC courses in the current semester along with the certificate of completion.
    2. Undertaking form filled by the students for credit transfer.
j. The Institution shall resolve any issues that may arise in the implementation of this policy from time to time and shall review its credit transfer policy in the light of periodic changes brought by UGC, SWAYAM, NPTEL and state government.

26. Academic Bank of Credits (ABC):

The College has implemented Academic Bank of Credits (ABC) to promote flexibility in curriculum as per NEP 2020 to

a. Provide option of mobility for learners across the universities of their choice.
b. Provide option to gain the credits through MOOCs from approved digital platforms.
c. Facilitate award of Certificate / Diploma / Degree (B.Sc) in line with the accumulated credits in ABC
d. Execute Multiple Entry and Exit system with credit count and credit transfer.

27. Exit Policy:

The students can choose to exit the four-year programme at the end of first / second / third year of study.

a. UG Certificate (in Field of study / discipline) - Programme duration: First year (first two semesters) of the undergraduate programme, 39 credits followed by an additional exit 10-credit bridge course(s) lasting two months, including at least 6-credit job-specific internship / apprenticeship that would help the candidates acquire job-ready competencies required to enter the workforce.

b. UG Diploma (in Field of study / discipline) - Programme duration: First two years (first four semesters) of the undergraduate programme, 80 credits followed by an additional exit 10-credit bridge course(s) lasting two months, including at least 6-credit job-specific internship / apprenticeship that would help the candidates acquire job-ready competencies required to enter the workforce.

c. Bachelor of Science (in Field of study / discipline) i.e., B.Sc. Engineering in (Field of study / discipline)- Programme duration: First three years (first six semesters) of the undergraduate programme, 120 credits.

28. Student Transfers

Student transfers shall be as per the guidelines issued by the Government of Andhra Pradesh and the affiliated University from time to time.

29. Punishments for Malpractice cases – Guidelines:

a) If any student caught under malpractice during the CIE examinations, the entire cycle of examinations will be cancelled and awarded zero marks for all the courses during that cycle. For example, if any student is caught while doing malpractice in an AAT, the AAT marks of all the courses in that cycle will be cancelled. Similar punishment will be considered for mid-term examinations also.

b) For Semester End Examinations, the examinations committee may take the following guidelines into consideration while dealing with the suspected cases of malpractice reported by the invigilators / squad members etc. The punishment may be more severe or less severe depending on the merits of the individual cases.

S. No.	Nature of Malpractice/Improper conduct	Punishment
1.	Possesses or keeps accessible in examination hall, any paper, note book, programmable calculators, Cellphones, pager, palm computers or any other form of material concerned with or related to the course of the examination (theory or practical) in which he is appearing but has not made use of (material shall include any marks on the body of the student which can be used as an aid in the course of the examination).	Expulsion from the examination hall and cancellation of the performance in that course only.
2.	Uses objectionable, abusive or offensive language in the answer paper or in letters to the examiners or writes to the examiner requesting him to award pass marks.	Cancellation of the performance in that course.
3.	Copying detected on the basis of internal evidence, such as, during valuation or during special scrutiny.	Cancellation of the performance in that course and all other courses the candidate has appeared including practical examinations and project work of that semester/year examinations.
4.	Gives assistance or guidance or receives it from any other student orally or by any other body language methods or communicates through cell phones with any other student or persons in or outside the exam hall in respect of any matter.	Expulsion from the examination hall and cancellation of the performance in that course only of all the students involved. In case of an outsider, he will be handed over to the police and a case shall be registered against him.

5.	Has copied in the examination hall from any paper, book, programmable calculators, palm computers or any other form of material relevant to the course of the examination (theory or practical) in which the student is appearing.	Expulsion from the examination hall and cancellation of the performance in that course and all other courses including practical examinations and project work of that semester/year.
6.	Comes in a drunken condition to the examination hall.	Expulsion from the examination hall and cancellation of the performance in that course and all other courses including practical examinations and project work of that semester/year.
7.	Smuggles in the Answer book or takes out or arranges to send out the question paper during the examination or answer book during or after the examination	Expulsion from the examination hall and cancellation of performance in that course and all the other courses including practical examinations and project work of that semester/year. The student is also debarred for two consecutive semesters from class work and all examinations. The continuation of the course by the student is subject to the academic regulations in connection with forfeit of seat.
8.	Refuses to obey the orders of the Chief Superintendent / any officer on duty or misbehaves or creates disturbance of any kind in and around the examination hall or organizes a walk out or instigates others to walk out, or threatens the officer-in charge or any person on duty in or outside the examination hall of any injury to his person or to any of his relations whether by words, either spoken or written or by signs or by visible representation, assaults the officer-in-charge, or any person on duty in or outside the examination hall or any of his relations, or indulges in any other act of misconduct or mischief which result in damage to or destruction of property in the examination hall or any part of the College campus or engages in	In case of students of the college, they shall be expelled from examination halls and cancellation of their performance in that course and all other courses of that semester/year. The students also are debarred and forfeit their seats. In case of outsiders, they will be handed over to the police and a police case shall be registered against them.

	any other act which in the opinion of the officer on duty amounts to use of unfair means or misconduct or has the tendency to disrupt the orderly conduct of the examination.	
9.	Leaves the exam hall taking away answer script or intentionally tears up the script or any part there of inside or outside the examination hall.	Expulsion from the examination hall and cancellation of performance in that course and all the other courses including practical examinations and project work of that semester/year. The candidate is also debarred for two consecutive semesters from classwork and all end examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat.
10.	Possesses any lethal weapon or firearm in the examination hall.	Expulsion from the examination hall and cancellation of the performance in that course and all other courses including practical examinations and project work of that semester/year. The student is also debarred and forfeits the seat.
11.	If student of the college, who is not a candidate for the particular examination or any person not connected with the college indulges in any malpractice or improper conduct mentioned in S.No. 7 to S.No. 9.	For Student of the college: Expulsion from the examination hall and cancellation of the performance in that course and all other courses including practical examinations and project work of that semester/year. The candidate is also debarred and forfeits the seat. Person(s) who do not belong to the College will be handed over to police and, a police case shall be registered against them.
12.	Impersonates any other student in connection with the examination	The student who has impersonated shall be expelled from examination hall. The student is debarred from writing the

		remaining exams, and rusticated from the college for one academic year during which period the student will not be permitted to write any exam. If the imposter is an outsider, he will be handed over to the police and a case shall be registered against him. The performance of the original student who has been impersonated, shall be cancelled in all the courses of the examination including practical's and project work of that semester/ year. The student is rusticated from the college for two consecutive years during which period the student will not be permitted to write any exam. The continuation of the course by the student is subject to the academic regulations in connection with forfeiture of seat.
13.	If any malpractice is detected which is not covered in the above S.No. 1 to S.No. 12 items, it shall be reported to the college academic council for further action and award suitable punishment.	
14.	Malpractice cases identified during sessional examinations will be reported to the examination committee nominated by Academic council to award suitable punishment.	

30.ADDITIONAL ACADEMIC REGULATIONS:

a. Any attempt to impress upon the teachers, examiners, faculty and staff of Examinations, bribing for either marks or attendance will be treated as malpractice.
b. When a component of Continuous Internal Evaluation (CIE) or Semester End Examination (SEE) is cancelled as a penalty, he/she is awarded zero marks in that component.

31. AMENDMENTS TO REGULATIONS:

The Academic Council of Bapatla Engineering College (Autonomous) reserves the right to revise, amend, change or nullify the Regulations, Schemes of Examinations and / or Syllabi, Academic schedules, Examination schedules, Examination pattern, Moderation to students, Special opportunity to complete degree beyond stipulated time and any

other matter pertained that meets to the needs of the students, society and industry without any notice and the decision is final.

LINEAR ALGEBRA AND ORDINATRY DIFFERENTIAL EQUATIONS I B. Tech. I Semester (24EE101)							
Lectures	2	Tutorial	1	Practical	0	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: None.

Course Objectives:

- Solve a system of linear homogeneous and non-homogeneous equations, finding the inverse of a given square matrix and also its Eigen values and Eigen vectors
- Identify the type of a given differential equation and select and apply the appropriate Analytical technique for finding the solution of first order ordinary differential equations.
- Create and analyze mathematical models using higher order differential equations to solve application problems that arise in engineering.
- Verify mean value theorems and expand functions of a single variable using Taylor's and Maclaurin's series.

Course Outcomes: At the end of this course, Students will be able to

CO1	**Find** the eigen values and eigen vectors of a given matrix and its inverse.
CO2	**Apply** the appropriate analytical technique to find the solution of a first order ordinary differential equation.
CO3	**Solve** higher order linear differential equations with constant coefficients arise in engineering applications.
CO4	**Learn** the applications of mean value theorems and Taylor's theorem.

UNIT-I

Linear Algebra: Rank of a Matrix; Elementary transformations of a matrix; Gauss-Jordan method of finding the inverse; Normal form of a matrix, Consistency of linear System of equations: Rouche's theorem, System of linear Non-homogeneous equations, System of linear homogeneous equations; vectors; Eigen values; properties of Eigen values(without proofs); Cayley-Hamilton theorem (without proof).
[Sections: 2.7.1; 2.7.2; 2.7.6; 2.7.7; 2.10.1; 2.10.2; 2.10.3; 2.12; 2.13; 2.14; 2.15.]

UNIT-II

Differential Equations of first order: Definitions; Formation of a Differential equation; Solution of a Differential equation; Equations of the first order and first degree; variables separable; Linear Equations; Bernoulli's equation; Exact Differential equations; Equations reducible to Exact equations: I.F found by inspection, I.F of a Homogeneous equation, In the equation M dx+ N dy = 0, $\frac{\frac{\partial M}{\partial y}-\frac{\partial N}{\partial x}}{N}$ is a function of x and $\frac{\frac{\partial N}{\partial x}-\frac{\partial M}{\partial y}}{M}$ is a function of y.

Applications of a first order Differential equations: Newton's law of cooling; Rate of decay of

Radio-active materials. [Sections: 11.1; 11.3; 11.4.1; 11.5; 11.6; 11.9; 11.10; 11.11; 11.12.1; 11.12.2; 11.12.4; 12.6; 12.8]
UNIT-III
Linear Differential Equations: Definitions; Theorem; Operator D; Rules for finding the complementary function; Inverse operator; Rules for finding the Particular Integral; Working procedure to solve the equation; Method of Variation of Parameters; Applications of Linear Differential Equations: Introduction,Oscillatory Electrical Circuits. [Sections: 13.1; 13.2; 13.3; 13.4; 13.5; 13.6; 13.7;13.8.1;14.1;14.5].
UNIT-IV
Differential Calculus: Mean Value Theorems: Rolle's theorem, Lagrange's mean value theorem with their geometrical interpretation. Cauchy's mean value theorem. Taylor's and Maclaurin theorems with remainders (without proof),Maclaurin's series, Expansion by use of known series, Taylor's series. [4.3.1; 4.3.2; 4.3.3; 4.3.4; 4.4.1; 4.4.2; 4.4.3]

ENGINEERING CHEMISTRY
I B. Tech. – Semester-I (Code: 24EE102)

Lectures	3	Tutorial	0	Practical	0	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: None.

Course Objectives:

- To familiarize importance of usage of various polymers and fuels in household & industry
- Outline the basics for the construction of electrochemical cells, batteries and fuel cells. Understand the mechanism of corrosion and how it can be prevented.
- To impart the concept of soft and hard waters, softening methods of hard water and various instrumental methods of analysis of samples.
- Outline the basics of some advanced concepts like computational chemistry, nanomaterials and liquid crystals.

Course Outcomes: At the end of this course, Students will be able to

CO1	**Explain** the preparation, properties, and applications of plastics, elastomers and biodegradable polymers also to explain calorific value, characteristics and applications of conventional and alternative fuels.
CO2	**Apply** the knowledge of electrochemistry for understanding the working of electrodes and electrochemical energy systems, as well as corrosion theories and protection methods.
CO3	**Analyse** the methods to produce soft water for industrial use and potable water by economical means and study the principles of different analytical techniques and their applications.
CO4	**Demonstrate** the knowledge of computational chemistry, and applications of advanced materials in engineering.

UNIT-1 12 Hours

Polymers and Fuel Chemistry: Introduction to polymers, functionality of monomers. Thermoplastics and Thermo-setting plastics- Preparation, properties and applications of PVC and Bakelite.

Biodegradable polymers- Preparation, properties and applications of PHB and PHBV

Elastomers-Preparation, properties and applications of Buna S and Buna N

Fuels-Types of fuels, calorific value of fuels-determination by Bomb calorimeter, Liquid Fuels-refining of petroleum, Knocking, Octane and Cetane number, Flue gas analysis by Orsat's apparatus, Introduction to alternative fuels-methanol, ethanol and bio fuel-bio diesel (preparation and applications).

UNIT-2 12 Hours

Electrochemical Cells and Corrosion: Single electrode potential, Reference electrodes-construction and working of standard hydrogen electrode and calomel electrode; Batteries (Li ion battery and zinc air cells), fuel cells (H_2-O_2, and molten carbonate). Electrochemical

sensors-potentiometric sensors and amperometric sensors with examples.
Corrosion-Definition, theories of corrosion (chemical and electrochemical), Types of corrosion-galvanic corrosion, differential aeration corrosion, stress corrosion, factors influencing rate of corrosion, corrosion control (cathodic protection), Protective coatings-electroplating (Gold) and electroless plating (nickel).

UNIT-3	12 Hours

Water Technology: Soft and hard water, Estimation of hardness of water by EDTA Method-numerical problems, Boiler troubles-Priming, foaming**,** scale and sludge, Caustic embrittlement, Specifications for drinking water- World health organization (WHO) standards, Industrial water treatment- Ion-exchange process, desalination of brackish water by reverse osmosis (RO) and electro dialysis.
Instrumental Methods of Analysis: Electromagnetic spectrum-UV (Principle, instrumentation, and applications), FT-IR (Principle, instrumentation, and applications), magnetic resonance imaging and CT scan (procedure and applications).

UNIT-4	12 Hours

Computational Chemistry: Introduction to computational chemistry, and docking studies
Semiconductors-Introduction, basic concept, Types-Intrinsic & Extrinsic Semiconductors, applications.
Nano Materials: Introduction, classification of nano materials, engineering applications, properties and applications of Carbon nano tubes and Graphenes nanoparticles.
Liquid crystals: Introduction, liquid crystalline displays (LCD)-applications. Polymers for light emitting diodes (LEDs)-Introduction, classification of polymer LEDs, Organic LEDs-their commercial uses.

COMMUNICATIVE ENGLISH
I B. Tech. – I Semester (Code: 24EE103/24EL01)

Lectures	2	Tutorial	0	Practical	0	Credits	2
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: None.

Course Objectives:

- To enhance the vocabulary competency of the students
- To enable the students to demonstrate proficiency in the use of written English, including Proper spelling, grammar, and punctuation
- To enhance theoretical and conceptual understanding of the elements of grammar
- Understand and apply the conventions of academic writing in English

Course Outcomes: At the end of this course, Students will be able to

CO1	**Understand** how to build academic vocabulary to enrich their writing skills
CO2	**Produce** accurate grammatical sentences
CO3	**Analyse** the content of the text in writing
CO4	**Produce** coherent and unified paragraphs with adequate support and detail

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

UNIT-I

1.1 **Vocabulary Development:** Word formation-Formation of Nouns, Verbs & Adjectives from Root words-Suffixes and Prefixes
1.2 **Essential Grammar:** Prepositions, Articles
1.3 **Basic Writing Skills:** Punctuation in writing
1.4 **Writing Practices:** Mind Mapping, Paragraph writing (structure-Descriptive, Narrative, Expository & Persuasive)

UNIT-II

2.1 **Vocabulary Development:** Synonyms and Antonyms
2.2 **Essential Grammar:** Concord, Conjunctions, Common Errors: Practice
2.3 **Basic Writing Skills**: Coherence in Writing: Jumbled Sentences
2.4 **Writing Practices**: Letter writing

UNIT-III

3.1 **Vocabulary Development:** One word Substitutes
3.2 **Essential Grammar:**Tenses, Modal Verbs, Voices
3.3 **Basic Writing Skills:** Using Phrases and clauses
3.4 **Writing Practices:** Note Making

UNIT-IV

4.1 **Vocabulary Development**: Words often confused
4.2 **Essential Grammar**: Reported speech, Common Errors: Practice
4.3 **Basic Writing Skills**: Sentence structures (Simple, Complex & Compound)

4.4 **Writing Practices**: Paraphrasing &Summarizing, Essay Writing

ENGINEERING MECHANICS I B. Tech. – I Semester (Code: 24EE104)							
Lectures	2	Tutorial	1	Practical	0	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Basic Mathematics & Physics

Course Objectives: To learn

- The concepts Force systems, free body diagrams, resultant of forces and equations of equilibrium, Supports and support reaction sand calculation of Centroid
- The Concept of moment of inertia of plane figures, Laws and applications of friction and the Analysis of the truss and determination of axial forces by Method of Joints
- Motion of a body and their relationships and application of D Alembert's principle in rectilinear and curvilinear motions
- About Mass moment of inertia of material bodies, Plane motion of a body about a fixed axis

Course Outcomes: At the end of this course, Students will be able to

CO1	**Analyze** the forces developed at the contact of the bodies by constructing the freebody diagram and location of centroid.
CO2	**Analyze** the systems with friction, and M.I of composite figures.
CO3	**Apply** kinematic equations to determine position, velocity, and acceleration as functions of time. Solve problems involving rectilinear and curvilinear motion using D'Alembert's principle.
CO4	**Analyze** of moment of inertia of material bodies and Rotation of rigid body about fixed axis.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

	POs												PSOs		
CO	**1**	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**	**11**	**12**	**1**	**2**	**3**

CO4	3	3	3	3	-	-	-	-	-	-	-	-	2	-	-

UNIT-I

Concurrent Forces in a Plane: Principles of statics – composition and resolution of forces – equilibrium of concurrent forces in a plane –Method of moments.

Parallel Forces in a Plane: Two parallel forces – general case of parallel forces in a plane – center of parallel forces – Centroids of composite plane figures.

UNIT-II

Moments of Inertia of Plane Figures: Moment of inertia of a plane figure with respect to an axis in its plane – Moment of Inertia with respect to an axis perpendicular to the plane of the figure – Parallel axis theorem.

Friction: Characteristics of friction – problems involving dry friction, ladder friction and wedge friction.
UNIT-III
Analysis of Plane Trusses: Trusses types – Axial forces finding in the members using method of joints. **Kinematics and Kinetics of a particle:** Kinematics of rectilinear motion – principles of dynamics – Differential equations of rectilinear motion, D'Alemberts principle - Kinematics of curvilinear motion – Differential equations of curvilinear motion – D'Alembert's principle.
UNIT-IV
Moments of Inertia of Material Bodies: Moment of inertia of a rigid body – Moment of inertia of a lamina – Moments of inertia of three – dimensional bodies. **Rotation of a Rigid Body about a Fixed Axis:** Kinematics of rotation – Equation of motion for a rigid body rotating about a fixed axis – D'Alembert's principle.

CIRCUIT THEORY I B. Tech. – I Semester (Code: 24EE105)							
Lectures	2	Tutorial	1	Practical	0	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Basics of Mathematics, Physics and Chemistry

Course Objectives: Students will be able

- Discuss about basic Laws in circuits, circuit elements, sources, fundamental concepts of alternating current, voltages, power triangle and power factor.
- Illustrate the circuits with different DC and AC sources.
- Explain statement and application of various theorems.
- Realize concept of resonance in series and parallel circuits.

Course Outcomes: At the end of this course, Students will be able to

CO1	**Explain** the basic Laws, circuit elements, sources and their characteristics. Also **demonstrate** fundamental concepts of alternating current, voltages, power triangle and power factor.
CO2	**Solve** problems involving with different AC and DC sources in electrical circuits.
CO3	**Apply and analyze** the circuits with various theorems.
CO4	**Illustrate and analyze** the series and parallel resonance circuits.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	POs												PSOs		
	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3
CO1	3	3	2	-	-	-	-	-	-	-	-	1	3	-	-
CO2	3	3	2	-	-	-	-	-	-	-	-	1	3	-	-

CO4	3	3	2	-	-	-	-	-	-	-	-	1	3	-	-

UNIT-I

Circuit Elements: Basic definition of the unit of Charge, Voltage, Current, Power and Energy, Circuit concept, various circuit elements, Energy stored in Inductors and Capacitors, Kirchhoff's laws,

Sources: Ideal, Practical, and dependent sources and their V-I characteristics, Source transformation, Voltage and Current division, series / parallel combination of elements, Star-Delta transformation, Instantaneous, Peak, Average and RMS values of various waveforms, Crest factor, Form factor. Concept of phase and phase difference in sinusoidal waveforms, Phase relation in pure resistor, Inductor and capacitor, Impedance diagram, phasor diagram, series and parallel circuits, compound Circuits, Computation of active, reactive and complex powers, power triangle, power factor.

UNIT-II

Steady State Analysis: Mesh and Nodal analysis of DC circuits with and without dependent sources, Mesh and Nodal analysis of AC circuits, analysis of RL, RC, RLC series and parallel

circuits with pulse and impulse excitations.
UNIT-III
Network Theorems: Superposition theorem, Thevenin's and Norton's theorems, Reciprocity, Compensation, Maximum power transfer theorems, Tellegen's and Millman's theorems to both DC (with and without dependent) and AC circuits.
UNIT-IV
Resonance: Series resonance, Impedance and phase angle, voltages and currents, bandwidth and Q factor and its effect on bandwidth, magnification, parallel resonance, resonant frequency, variation of impedance with frequency, Q factor, magnification, reactance curves in parallel resonance, Locus diagrams for series and parallel circuits.

ENGINEERING CHEMISTRY LAB
I B. Tech. – Semester-I (Code: 24EEL101)

Lectures	0	Tutorial	0	Practical	2	Credits	1
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: None.

Course Objectives: Students will be able to

- Familiarize students with practical chemical analysis techniques for determining key water quality parameters.
- Provide hands-on experience in performing volumetric and instrumental titrations to understand their chemical principles and applications.
- Develop proficiency in using laboratory equipment, following safety protocols, and accurately conducting experiments.
- Teach students the synthesis of common organic compounds and their characterization techniques.

Course Outcomes: After the completion of the course students will be able to

CO1	**Determine** water quality parameters such as alkalinity and hardness.
CO2	**Conduct** volumetric titrations to estimate the concentration of chemical substances.
CO3	**Apply** instrumental methods such as pH metry and conductometry for titration experiments and colorimetry for verification of Beers law.
CO4	**Synthesize and characterize** common organic compounds like soap, resins, and aspirin.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

ENGLISH COMMUNICATION SKILLS LAB
I B. Tech. – I Semester (Code: 24EEL102)

Lectures	0	Tutorial	0	Practical	2	Credits	1
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: None.

Course Objectives:

- To comprehend the importance, barriers and strategies of listening skills in English.
- To illustrate and impart practice Phonemic symbols, stress and intonation.
- To practice oral skills and receive feedback on learners' performance.
- To practice language in various contexts through pair work, role plays, group work and dialogue conversations

Course Outcomes: At the end of this course, Students will be able to

CO1	**Better understand** the nuances of English language through audio- visual experience and group activities
CO2	**Develop** neutralization of accent for intelligibility
CO3	**Build** confidence to enhance their speaking skills
CO4	**Use** effective vocabulary both in formal and informal situations

CIRCUIT THEORY LAB
I B. Tech. – I Semester (Code: 24EEL103)

Lectures	0	Tutorial	0	Practical	3	Credits	1.5
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Basics of Mathematics, Physics and Chemistry

Course Objectives: Students will be able

- State and verify basic Kirchhoff's laws in circuits.
- Explain and verify fundamental theorems of circuit theory.
- Study the parameters of a given choke coil.
- Solve and plot the locus diagrams of series RL, RC circuits.
- Describe and verify fundamental theorems of circuit theory using software.

Course Outcomes: At the end of this course, Students will be able to

CO1	**Demonstrate** the ability to apply Kirchhoff's Voltage Law (KVL) and Kirchhoff's Current Law (KCL) and validate through experimentation and calculation.
CO2	**Verify** the theorems of circuit theory, such as Thevenin's Theorem, Norton's Theorem, and Superposition Theorem, by comparing theoretical results with practical measurements.
CO3	**Determine** the parameters of a choke coil and understand its behavior in different circuit configurations.
CO4	**Draw and interpret** the locus diagrams for series RL and RC circuits, gaining insights into the impedance and phase relationships as the frequency varies.
CO5	**Utilize** circuit simulation software to model and analyze circuits, verifying the fundamental theorems of circuit theory and comparing the software results with theoretical and experimental outcomes.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

IT Workshop I B. Tech. – I Semester (Code: 24EEL104)							
Lectures	0	Tutorial	0	Practical	2	Credits	1
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: None.

Course Objectives:

- To introduce the internal parts, peripherals, and I/O ports of a computer.
- To train the students on installation of operating system and other application software.
- To introduce office tools for word processing, accounting and presentation.
- To introduce AI tools such as ChatGPT, Dialogflow.

Course Outcomes: At the end of the course, students will be able to

CO1	**Describe** the components of a computer.
CO2	**Resolve** the problems of a computer.
CO3	**Generate and prepare** report using mail merging, ppt, certificate and accounting applications with MS office tools.
CO4	**Use** AI tools for report generation.

LIST OF EXPERIMENTS

1. Explore Peripherals of a Computer, Components of a motherboard and its functions.
2. Install and Uninstall System and Application software on a Computer.
3. Disassemble and Assemble the PC.
4. Troubleshoot a computer.
5. Prepare the following using MS office:
   i) PPT using MS-Power Point.
   ii) Design a Project Certificate and Newsletter using MS-Word
6. Implement the following using Excel:
   i) Create an Excel Work sheet for the six subjects and calculate Total, Average, Grade and Rank.
   ii) Merge the contents of two excel sheets using VLOOKUP and sort them.
7. Generating reports using Mail Merge.
8. Prepare a report using Latex or equivalent (FOSS) tool word as word Processors.
9. Prompt Engineering in Chat GPT.
10. Develop a simple AI Chatbot.

NUMERICAL METHODS AND ADVANCED CALCULUS
I B. Tech. – II Semester (Code:24EE201)

Lectures	2	Tutorial	1	Practical	0	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: None.

Course Objectives:

- Solve algebraic, transcendental and system of linear equations with the help of numerical methods.
- Apply the techniques of numerical integration whenever and wherever routine methods are not applicable and solve the first order ordinary differential equations numerically with the given initial condition using different methods.
- Evaluate double and triple integrals and apply them to find areas and volumes.
- Evaluate the line, surface and volume integrals and learn their inter-relations andapplications.

Course Outcomes: At the end of this course, Students will be able to

CO1	**Solve** non-linear equations and system of linear equations with the help of Numericaltechniques.
CO2	**Solve** the first order ordinary differential equations numerically with the given initialcondition.
CO3	**Find** the area and volume of plane and three dimensional figures using multiple integrals.
CO4	**Apply** vector integral theorems to obtain the solutions of engineering problemsinvolving circulation, flux, and divergence in vector fields.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO4	3	3	2	-	-	-	-	-	-	-	-	2	3	-	-

UNIT-I

Numerical Solution of Equations: Introduction; Solution of algebraic and transcendental equations: Bisection method, Method of false position, Newton-Raphson method; Useful deductions from the Newton-Raphson formula; Solution of linear simultaneous equations; Direct methods of solution: Gauss-Jordan method, Factorization method; Iterative methods of solution: Jacobi's iteration method, Gauss-Seidel iteration method.

[Sections: 28.1; 28.2; 28.3; 28.5; 28.6.2, 28.6.3; 28.7.1; 28.7.2].

UNIT-II

Finite differences and Interpolation: Finite differences: Forward differences, Backward differences; Newton's interpolation formulae: Newton's forward interpolation formula; Newton's backward interpolation formula; Interpolation with unequal intervals; Lagrange's interpolation formula; Divided differences; Newton's divided difference formula; Numerical integration; Trapezoidal rule; Simpson's one-third rule; Simpson's three-eighth rule;
Numerical solution of ODE's: Introduction; Euler's method; Runge-Kutta method.

[Sections: 29.1.1; 29.1.2; 29.6; 29.9; 29.10; 29.11; 29.12; 30.4; 30.6; 30.7; 30.8; 32.1; 32.4; 32.7].

UNIT-III

Multiple Integrals: Double integrals; Change of order of integration; Double integrals in polar coordinates; Area enclosed by plane curves; Triple integrals; Volumes of solids: Volume as Triple integral, Change of variables: For triple integrals.

[Sections: 7.1; 7.2; 7.3; 7.4; 7.5; 7.6.2; 7.7.2].

UNIT-IV

Vector calculus and its Applications: Scalar and vector point functions; Del applied to scalar point functions-Gradient: Definition, Directional derivative; Del applied to vector point functions: Divergence, Curl; Line integral; Surfaces: Surface integral, Flux across a surface; Green's theorem in the plane (without proof); Stokes theorem (without proof); Gauss Divergence theorem (without proof).

[Sections: 8.4; 8.5.1; 8.5.3; 8.6; 8.11; 8.12.2; 8.12.3; 8.13; 8.14; 8.16]

ADVANCED OPTICS AND MATERIALS TESTING
I B.Tech – II Semester (Code: 24EE202)

Lectures	3	Tutorial	0	Practical	0	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: None.

Course Objectives:

- To circulate the knowledge about the advanced optics and know its Engineering applications.
- Project the basic properties of materials and their industrial utilization.
- To classify solids using Quantum Mechanics and to determine crystal structures using X-rays.
- To make aware of some of the analytical techniques for material testing.

Course Outcomes: At the end of this course, Students will be able to

CO1	**Understand** the principles in the production and application of lasers and their effective utilization in optical communications.
CO2	**Understand** dielectric and magnetic properties of materials and their applications in industry.
CO3	**Demonstrate** the ability to apply knowledge of band theory of solids and to make understand the concept of energy band gap and hole.
CO4	**Demonstrate** material testing tools using Ultrasonic and Nuclear radiation.

Mapping of Course Outcomes with Program Outcomes

CO	POs												PSOs		
	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3
CO1	3	-	2	2	2	2	-	-	-	-	-	-	2	-	-
CO2	3	3	-	2	-	-	-	-	-	-	-	-	2	-	-
CO3	2	2	-	2	-	-	-	-	-	-	-	-	2	-	-
CO4	3	3	2	2	3	-	-	-	-	-	-	-	2	-	-

UNIT-I

Lasers: Interaction of radiation with matter. Einstein co-efficients, Properties of laser, Population inversion, LASER principle, pumping schemes-Three level and four level laser, Types of lasers: solid-state lasers (Ruby), gas lasers (He-Ne), Semiconductor lasers; Applications of lasers in industry and medicine.

Fibre Optics: Importance of optical fibre, Structure and principle of optical fibre, acceptance angle and numerical aperture, Types of optical fibres based on modes and refractive index, V-number, losses associated with optical fibres, fibre optical communication, advantages of Optical fibres.

UNIT-II

Electric and magnetic properties of materials: Maxwell Equations, Magnetic deflecting force, Hall Effect, Magnetic materials and properties (Dia, Para, Ferro), Weiss theory of ferromagnetism, Hysteresis curve, Hard and Soft magnetic materials.

Dielectrics – Different types of polarizations (Electronic, Ionic & Orientation), Local Field, Claussius-Mossotti equation, Di-electric breakdown, Ferro electrics and applications.

UNIT-III
Band theory of solids and Structure determination: One dimensional time- independent Schrödinger wave equation, Kronig-Penny model (without Derivation), Classification of materials, effective mass of electron, concepts of energy band gap and hole. **Structure determination:** Crystal lattices (Bravias), Crystal systems and structures, planes, Miller indices, Bragg's law, structural analysis of crystals using X-Ray powder diffraction method (XRD).
UNIT-IV
Material testing Techniques: Production and Properties of ultrasonics, Industrial applications of ultrasonics, Weld inspection, Material analysis, corrosion testing, concrete under water measurements, Ultrasonic testing in the foundry industry. NDT: Pulse echo technique, time of flight diffraction technique, Medical Applications of ultrasonics. **Nuclear Techniques**: Nuclear radio isotopes, Applications of radio isotopes (medical and industry) Properties of α,β,ɤ-rays.

FUNDAMENTALS OF COMPUTING I B.Tech – II Semester (Code: 24EE203)							
Lectures	3	Tutorial	0	Practical	0	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: None.

Course Objectives: At the end of the course, the student will understand the

- Basic problem solving process using Flow Charts and algorithms.
- Basic concepts of control structures in C.
- Concepts of arrays, functions, pointers and Dynamic memory allocation in C.
- Concepts of structures, unions, files and command line arguments in C.

Course Outcomes: At the end of this course, Students will be able to

CO1	Develop algorithms and flow charts for simple problems.
CO2	Use suitable control structures for developing code in C.
CO3	Design modular programs using the concept of functions and pointers.
CO4	Develop code for complex applications using structures and file handling features.

Mapping of Course Outcomes with Program Outcomes

CO4	3	3	2	2	3	-	-	-	-	-	-	-	3	-	-

UNIT-I

Introductory concepts: Block Diagram of Computer, Computer Characteristics, Hardware vs Software, How to Develop a Program, Software Development Life Cycle, Structured Programming, Types of Programming Languages, Introduction to C program, Program Characteristics.

Introduction to C Programming: Character set, Identifiers and Keywords, Data types, Constants, type qualifiers, Declaration and Initialization of variables.

Operators & Expressions: Arithmetic Operators, Unary Operators, Relational and Logical Operators, Assignment Operators, Conditional Operator, Input/ Output functions.

UNIT-II

Control Statements: Branching, Looping, Nested Control Structures, Switch Statement, Break Statement, continue Statement, and Goto Statement.

Arrays: Defining an Array, Processing an Array, Multidimensional Arrays & Strings (Basic Programs only).

UNIT-III

Functions: Defining a Function, Accessing a Function, Function prototypes, Passing Arguments to a Function, Passing Arrays to Functions, Recursion, Storage Classes (Basic Programs only).

Pointers: Fundamentals, Pointer Declarations, Passing Pointers to a Function, Pointers and Arrays, Dynamic memory allocation (Basic Programs only).

UNIT-IV

Structures and Unions: Defining a Structure, Processing a Structure, User-Defined Data Types, Unions (Basic Programs only).

Files handling: Opening and Closing a Data File, Reading and Writing a Data File, Processing a Data File, Unformatted Data Files (Basic Programs only).

BAPATLA ENGINEERING COLLEGE::BAPATLA
(Autonomous)

BASIC ELECTRONIC DEVICES
I B. Tech. – II Semester (Code: 20EE204)

Lectures	3	Tutorial	0	Practical	0	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Basics of Mathematics, Physics and Chemistry

Course Objectives: Students will be able

- Examine the fundamentals of Electronic Devices.
- Describe diode and it's applications in clipping and clamping circuits, Rectifiers
- Explain and design the working of transistor and its different biasing conditions
- Illustrate the characteristics of different types of FET and MOSFET.

Course Outcomes: At the end of this course, Students will be able to

CO1	**Apply** the knowledge of basic semiconductor physics and understand the working principles of various electronic devices.
CO2	**Implement** circuits for different applications using diodes
CO3	**Illustrate** the various circuit configurations of transistor and biasing circuits.
CO4	**Examine** the various circuit configurations of FET and MOSFET.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	POs												PSOs		
	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3
CO1	3	3	2	1	-	-	-	-	-	-	-	3	3	-	-
CO2	3	3	2	1	-	-	-	-	-	-	-	3	3	-	-
CO3	3	3	2	1	-	-	-	-	-	-	-	3	3	-	-
CO4	3	3	2	1	-	-	-	-	-	-	-	3	3	-	-

UNIT-I

Semi-Conductors: Classification of Insulators, Semiconductors & metals based on energy band diagram, Intrinsic Semiconductors, Extrinsic Semi-Conductors, Diffusion currents and drift currents.

Diodes: The open circuited p-n Junction, Volt-Ampere characteristics (Forward Bias and Reverse Bias and temperature dependence of the V/I characteristic), types of breakdowns in diode, Diode Resistance ,Diode capacitance, Zener diode V-I characteristics, Zener diode as voltage regulator.

UNIT-II

Rectifiers: Analysis of Half-wave Rectifier, Full-wave and Bridge Rectifiers.

Filters: Inductor filter, capacitor filter, L section & Π- section filters.

Clippers, Clampers: Positive and negative clippers - Positive and negative clampers.

UNIT-III

BJT: Operation of PNP & NPN Transistor, Transistor as amplifier, CE, CB and CC configuration input, output characteristics.

BJT Biasing and Stabilization: Biasing techniques-different types of biasing, Thermal Runaway, Thermal Stability. Bias stabilization and compensation techniques.	
UNIT-IV	
JFET: Comparison of BJT & FET, JEFT volt ampere characteristics. **MOSFET:** MOSFET construction, Types of MOSFET (Enhancement type and Depletion type) and their characteristics.

ENGINEERING GRAPHICS
I B.Tech – II Semester (Code: 24EEL201)

Lectures	1	Tutorial	0	Practical	4	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: None.

Course Objectives:

- Clear picture about the importance of engineering graphics in the field of engineering
- The drawing skills and impart students to follow Bureau of Indian Standards
- To give an idea about Geometric constructions and orthographic projections
- Imagination skills about orientation of points, lines, surfaces and solids
- Basic drafting skills of AutoCAD

Course Outcomes: At the end of this course, Students will be able to

CO1	**Draw** projections of points and projections of lines using Auto CAD
CO2	**Plot** projections of surfaces like circle, pentagon, hexagon and rhombus
CO3	**Plot** the Projections of solids like Prisms and pyramids
CO4	**Development** of surfaces of cylinder, prism and pyramids, Convert the Isometric views into Orthographic views for simple objects.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	POs												PSOs		
	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3
CO1	1	2	1	-	-	-	-	-	3	2	-	-	2	-	-
CO2	3	2	1	-	-	-	-	-	3	2	-	-	2	-	-
CO3	1	2	3	-	-	-	-	-	3	2	-	-	2	-	-
CO4	1	2	1	-	-	-	-	-	3	2	-	-	2	-	-

LIST OF EXPERIMENTS

UNIT-I

Introduction: Introduction to Engineering Drawing, geometrical constructions.

Introduction to AUTOCAD: Advantages of AutoCAD over manual drafting, Basics of sheet selection, Draw tools, Modify tools, dimensioning.

Method of Projections: Principles of projection, first angle and third angle projections, projections of points, projections of straight lines inclined to both the planes.

UNIT-II

Projections of Planes: Projections of plane figures: circle, triangle, pentagon, hexagon and rhombus.

UNIT-III

Projections of Solids: Projections of solids like square, pentagonal, hexagonal prisms and pyramids, axis inclined to one plane only.

UNIT-IV

Development of Surfaces: Development of surfaces of trapezoidal tray, cylinder, prism and pyramid with sections.

Orthographic Projections: Conversion of pictorial views into Orthographic views. (Treatment is limited to simple castings only).

Text Books :	1. Dhananjay M. Kulkarni, Engineering Drawing with AutoCAD, Revised Edition, (PHI publication), 2018. 2. N.D. Bhatt & V.M. Panchal, Engineering Drawing, 43rd Edition, (Charotar Publishing House, Anand). (First angle projection) 2014.

BAPATLA ENGINEERING COLLEGE::BAPATLA
(Autonomous)

ENGINEERING PHYSICS LAB
I B.Tech –II Semester (Code: 24EEL202)

Lectures	0	Tutorial	0	Practical	2	Credits	1
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: None.

Course Objectives:

- Basic experiments such as Magnetic Field Measurements, Hall Effect and LCR resonance give the knowledge to apply them in magnetic applications.
- The measurements relating to various physical parameters of materials make the student to understand their utility, design and fabrication of several devices.
- Applicability of properties of light such as interference and diffraction to measure accurately the distances, radius of curvature, wavelength etc.
- The experiments like CRO, Photo cell and Solar cell gives the idea of electronic and electrical power production.

Course Outcomes: At the end of this course, Students will be able to

CO1	**Acknowledge** the important aspects of earth magnetic field, realize the use of Maxwell's equations in various magnetic applications.
CO2	**Realization** of material properties and parameters.
CO3	**Measure** accurately the distances, radius of curvature, wavelength and detect flaws in the materials.
CO4	**Get** hands on experience in various Opto-electronic devices and design the cells for power production.

Mapping of Course Outcomes with Program Outcomes

CO	POs												PSOs		
	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3
CO1	3	3	2	2	-	-	-	-	3	2	-	-	3	-	-
CO2	3	3	2	2	-	-	-	-	3	2	-	-	3	-	-
CO3	3	3	2	2	2	-	-	-	3	2	-	-	3	-	-
CO4	3	2	-	-	-	-	3	-	3	2	-	2	3	-	-

LIST OF EXPERIMENTS

1. Determination of acceleration due to gravity at a place using compound pendulum.
2. To study the variation of intensity of magnetic field along the axis of a circular coil using Stewart-Gee's apparatus.
3. To draw the characteristic curves of P-N Junction diode.
4. Determination of radius of curvature of a Plano convex lens by forming Newton's rings.
5. Determination of wavelengths of mercury spectrum using grating normal incidence method.
6. To draw the characteristic curves of Zener diode.
7. To draw the resonant characteristic curves of L.C.R. series circuit and calculate the Resonant frequency.

8. To draw the characteristic curves of a photocell and calculate the maximum velocity of electron.
9. Verify the laws of transverse vibration of stretched string using Sonometer.
10. Determination of rigidity modulus of the given material of the wire using Torsional pendulum.
11. To draw the load characteristic curves of a solar cell.
12. Determination of Hall coefficient of a semiconductor.
13. Determination of voltage and frequency of an A.C. signal using C.R.O.
14. Determination of Forbidden energy gap of Si &Ge.
15. Determination of wavelength of laser source using Diode laser.
16. To draw the characteristic curves of Photo diode.
17. To draw the Diode valve characteristics.

Any three experiments are virtual

Note: A minimum of **ten (10 no.)** experiments to be done and recorded

Text Books :	P. Sreenivasarao & K. Muralidhar, Engineering Physics laboratory Manual, Himalaya Publications.

CO4	3	3	2	2	3	-	-	-	3	2	-	2	3	-	-

LIST OF EXPERIMENTS

1. Write a C program for problem solving using computers - Familiarization with programming environment, Variable types and type conversions - Simple computational problems using arithmetic expressions.
2. Write a C program for Branching and logical expressions - Problems involving if-then-else structures
3. Write a C program for Loops, while and for loops - Iterative problems e.g., sum of series
4. Write a C program for 1D Arrays: searching, sorting - 1D Array manipulation
5. Write a C program for 2D arrays and Strings - Matrix problems, String operations
6. Write a C program for functions, call by value - Simple functions
7. Write a C program for Numerical methods (Root finding, numerical differentiation, numerical integration) - Programming for solving Numerical methods problems
8. Write a C program for recursion, structure of recursive calls - Recursive functions
9. Write a C program using Pointers, structures and dynamic memory allocation for arrays, matrix operations and data handling to maintain records
10. Write a C program for File handling - File operations.

BASIC ELECTRONIC DEVICES LAB
I B. Tech. – II Semester (Code: 20EEL204)

Lectures	0	Tutorial	0	Practical	3	Credits	1.5
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Basics of Mathematics, Physics and Chemistry

Course Objectives: Students will be able

- Analyze PN junctions in semiconductor devices under forward and reverse bias conditions.
- Explore diode and it‘s applications in clipping and clamping circuits, Rectifiers and filter circuits.
- Outline characteristics in different configurations of BJT and analyze different biasing techniques.
- Illustrate the characteristics of different types of FET and MOSFET.

Course Outcomes: At the end of this course, Students will be able to

CO1	**Demonstrate** PN junctions in semiconductor devices under various conditions.
CO2	**Demonstrate and analyze** simple rectifiers, Clippers, Filters and voltage regulators using diodes.
CO3	**Explore** characteristics in different configurations of BJT and analyze different biasing techniques.
CO4	**Outline** the various characteristics of FET and MOSFET.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO4	3	3	2	3	-	-	-	-	3	2	-	2	3	-	-

LIST OF EXPERIMENTS

1. V-I characteristics of PN Junction.
2. V-I characteristics of Zener diode.
3. Design of Half wave rectifier.
4. Design of Full wave rectifier.
5. Design of Half wave rectifier with filter.
6. Design of Full wave rectifier with filter.
7. Non-linear wave shaping – clippers.
8. Non-linear wave shaping – clampers

9. Design of voltage regulators using Zener Diodes
10. Characteristics of Transistor in Common Emitter configuration.
11. Characteristics of Transistor in Common Base configuration.
12. Characteristics of Transistor in Common Collector configuration.
13. Verification of Transistor Self-Bias Circuit.
14. Characteristics of Junction Field Effect Transistor
15. Characteristics of MOSFET

Note: Minimum 10 experiments should be conducted.

BAPATLA ENGINEERING COLLEGE::BAPATLA
(Autonomous)

WORKSHOP PRACTICE
I B.Tech – II Semester (Code:24MEL205)

Lectures	0	Tutorial	0	Practical	3	Credits	1.5
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: None.

Course Objectives:

- To impart student knowledge on various hand tools for usage in engineering applications.
- Be able to use analytical skills for the production of components.
- Design and model different prototypes using carpentry, sheet metal and welding.
- Make electrical connections for daily applications.
  To make student aware of safety rules in working environments.

Course Outcomes: At the end of this course, Students will be able to

CO1	**Make** half lap joint, Dovetail joint and Mortise & Tenon joint
CO2	**Produce** Lap joint, Tee joint and Butt joint using Gas welding
CO3	**Prepare** trapezoidal tray, Funnel and T-joint using sheet metal tools
CO4	**Make** connections for controlling one lamp by a single switch, controlling two lamps by a single switch and stair case wiring.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

PROBABILITY AND STATISTICS

II B. Tech. – III Semester (Code: 24EE301)

Lectures	2	Tutorial	1	Practical	0	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: None.

Course Objectives: Students will learn how to

- Employ discrete and continuous probability distributions to analyze and solve real world problems in Engineering fields.
- Estimate the point and interval estimators of the mean, variance and proportion for the given Sample data and apply Z-test, t-test to various real-life problems.
- Apply various sample tests like F-test and $\chi 2$ -test for decision making regarding the population based on sample data.
- Compute the level of correlation, the best fit curve to the given data by the method of least squares and also perform ANOVA arising in the field of engineering.

Course Outcomes: After completion of this course, Students will be able to

CO1	Apply discrete and continuous probability distributions to various problems arising in Engineering applications.
CO2	Perform Test of Hypothesis for a population parameter for single sample.
CO3	Perform Test of Hypothesis for population parameters for multiple samples.
CO4	Interpret the results of correlation, regression and one-way ANOVA for the given data.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	POs											PSOs

CO4	3	3	3	-	-	-	-	-	-	-	2	-	-	-

UNIT-I

Descriptive measures, Random variables and Probability distributions:Arithmetic mean, median and mode, Random variables, Binomial distribution, The mean and variance of a probability distribution, Poisson approximation to the Binomial distribution, Continuous Random Variables, Normal Distribution, Normal Approximation to the Binomial Distribution, Uniform Distribution, Weibull distribution.
(Sections 2.5, 4.1, 4.2, 4.4, 4.6, 5.1, 5.2, 5.3, 5.5, 5.9.)

UNIT-II

Sampling distributions and Inferences concerning one mean: Populations and Samples, The sampling distribution of the mean (σ known), The sampling distribution of the mean (σ unknown), The sampling distribution of the variance, Point estimation, Interval estimation, Tests of Hypotheses, Null Hypothesis and Tests of hypotheses, Hypothesis concerning one mean.
(Sections 6.1, 6.2, 6.3, 6.4, 7.1, 7.2, 7.4, 7.5, 7.6)

UNIT-III	
Comparing two treatments and Inferences concerning variances:Comparisons-Two independent large samples, Comparisons-Two independent small samples, matched pairs comparisons, the estimation of variances, Hypotheses concerning one variance, Hypotheses concerning two variances. (Sections 8.2, 8.3, 8.4, 9.1, 9.2, 9.3)	
UNIT-IV	
Inferences concerning proportions, Regression Analysis and Analysis of variance: Estimation of proportions, Hypotheses concerning one proportion, Hypotheses concerning two proportions, the method of least squares, curvilinear regression, multiple regression, correlation, some general principles, Completely Randomized Designs (One-way ANOVA). (10.1, 10.2, 10.3, 11.1, 11.3, 11.4, 11.6, 12.1, 12.2)

NETWORK ANALYSIS

II B. Tech. – III Semester (Code: 24EE302)

Lectures	2	Tutorial	1	Practical	0	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Basics of Mathematics.

Course Objectives: To make the students

- Infer and evaluate transient response, Steady state response for single phase systems.
- Interpret the circuits using Laplace Transforms.
- Understand the concepts of three-phase systems and their analysis.
- Evaluate two-port network parameters and network functions.
- Formulate the equations of coupled circuits and their behavior.
- Construct passive filters using constant K and M derived methods.

Course Outcomes: After completion of this course, Students will be able to

CO1	Solve transient response, steady state response for single phase systems.
CO2	Apply Laplace Transforms to electrical circuit and its analysis.
CO3	Determine the voltages, currents, and powers in three-phase circuits with balanced and unbalanced loads.
CO4	Evaluate two-port network parameters, network functions.
CO5	Demonstrate the coupled circuits and their behavior.
CO6	Illustrate passive filters using constant K and M derived methods.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	POs											PSOs		
	1	2	3	4	5	6	7	8	9	10	11	1	2	3
CO1	3	3	2	-	-	-	-	-	-	-	2	3	-	-

CO5	3	3	2	-	-	-	-	-	-	-	2	3	-	-
CO6	3	3	2	-	-	-	-	-	-	-	2	3	-	-

UNIT-I

Solution of First and Second Order Networks: Solution of first and second order differential equations for Series and parallel R-L, R-C, RLC circuits, initial and final conditions in network elements, forced and free response, time constants, steady state and transient state response for DC and AC excitations.

Electrical Circuit Analysis Using Laplace Transforms: Review of Laplace Transform, Analysis of electrical circuits using Laplace Transform.

UNIT-II

Poly Phase Systems: Advantages of 3-phase systems, phase sequence, interconnection of 3-phase sources and loads, voltage, current & power in star & delta connected systems, analysis of 3- phase balanced circuit, measurement of 3-phase power by using two wattmeter method.

Analysis of 3-phase unbalanced systems, star / delta transformation method and Mill man's method.

UNIT-III

Two Port Network and Network Functions: Two Port Networks, terminal pairs, relationship of two port variables, impedance parameters, admittance parameters, transmission parameters and hybrid parameters, interrelation of two port network, interconnections of two port networks, image parameters, Two-Port bridged – T, Ladder and Lattice networks. Transfer function representation. Poles and Zeros - Network functions for the one port and two port - Poles and Zeros of network functions - Restrictions on pole and zero locations for driving point functions and transfer functions

UNIT-IV

Coupled Circuits: Defining self and mutual inductance, coefficient of coupling, dot convention, Development of circuit equations in time domain and frequency domain, solution of coupled circuits, series, and parallel connections of two coupled coils, tuned circuit analysis (single and double tuned) **Filters**: Low pass, high pass, band pass & band reject filters - frequency response, constant K– and M derived – filters.

ELECTRO MAGNETIC FIELDS
II B. Tech. – III Semester (Code: 24EE303)

Lectures	3	Tutorial	0	Practical	0	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Basics of Mathematics, Physics.

Course Objectives: Students will be able

- Acquire knowledge in Electromagnetic field theory.
- Provide a solid foundation in Electrostatics such as Dipole, Capacitance.
- Attain familiarity in Magnetic field and force concepts in magnetic fields.
- Identify the electromagnetic wave propagation in medium.

Course Outcomes: At the end of this course, Students will be able to

CO1	Describe the fundamentals in Electromagnetic field theory.
CO2	Explain basics in Electrostatics such as Dipole, Capacitance.
CO3	Solve various magneto static field problems.
CO4	Demonstrate time varying electric, magnetic fields and the concepts of Maxwell's equations.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	POs											PSOs		
	1	2	3	4	5	6	7	8	9	10	11	1	2	3
CO1	3	3	3	-	-	-	-	-	-	-	2	3	2	-
CO2	3	3	2	-	-	-	-	-	-	-	2	3	2	-
CO3	3	3	2	-	-	-	-	-	-	-	2	3	2	-
CO4	2	2	2	-	-	-	-	-	-	-	2	3	2	-

UNIT-I

Electrostatics I: Introduction to Rectangular, Cylindrical and Spherical Coordinate systems. The experimental law of coulomb, Electric field intensity, Field due to a continuous volume charge distribution, Field of a line charge, sheet of charge. Electric Flux Density, Gauss's law, Applications of Gauss law, Divergence, Maxwell's First equation (Electrostatics).

UNIT-II

Electrostatics II: Energy expended in moving a point charge in an electric field, Definition of potential and potential difference. The potential field of a point charge, system of charges, potential gradient. Electric field intensity due to dipole. Current and current density, continuity of current, conductor properties and boundary conditions. The nature of dielectric materials, boundary conditions for perfect dielectric materials. Capacitance, Several capacitance examples.

UNIT-III

Steady Magnetic Field: Biot- Savart Law, Ampere's Circuital Law, Magnetic Flux and Magnetic Flux Density, The scalar and vector magnetic potentials. Magnetic Forces and

Materials: Force on a moving charge, Force on a differential current element, Force between differential current elements, Force and torque on a closed circuit,	
UNIT-IV	
Time Varying Fields and Maxwell's Equations: Faraday's law, Displacement current, Maxwell's equations in point form, integral form. **Concept of Uniform Plane Wave:** Wave propagation in free space, dielectrics. Poynting theorem and wave power. Propagation in good conductors: Skin effect.	
Text Books :	1. W H Hayt, J A Buck , "Engineering Electromagnetics", 9th Edition TMH, 2020. 2. Mathew NO Sadiku, 'Elements of Electromagnetics', 6th Edition Oxford University Press, 2014.

ELECTRICAL MACHINES-I

II B. Tech. – III Semester (Code: 24EE304)

Lectures	2	Tutorial	1	Practical	0	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Basic Physics, Basic Mathematics

Course Objectives: Students will be able

- Explain the construction of dc machines and its characteristics
- Explain the construction and operation of Transformers.
- Understand the construction, operation and performance of Alternators
- Gain knowledge about construction, operation and performance of synchronous motors.

Course Outcomes: At the end of this course, students will be able to

CO1	Describe the operation of dc generators and its characteristics.
CO2	Assess the construction and operation of Transformers.
CO3	Analyze operation and performance of Alternators.
CO4	Analyze operation and performance of synchronous motors.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	POs											PSOs		
	1	2	3	4	5	6	7	8	9	10	11	1	2	3
CO1	3	3	2	-	-	-	-	-	-	-	2	3	-	-
CO2	3	3	2	-	-	-	-	-	-	-	2	3	-	-
CO3	3	3	2	-	-	-	-	-	-	-	2	3	-	-
CO4	3	3	2	-	-	-	-	-	-	-	2	3	-	-

UNIT-I

Magnetic Circuits: Magnetic circuit parameters, magnetic leakage and fringing, B-H curve. Electromechanical-energy conversion for Single & Double excited systems.

DC Generators: Basic construction of a DC machine, Principle, operation of simple one loop generator -Types of field excitations-EMF equation-Armature reaction- commutation-Characteristics -Applications.

DC Motors: Principle and operation - Torque equation - Characteristics -Applications -starters -speed control methods- flux control method, armature control and voltage control method, Losses, Testings - Swinburne's test, Direct load test.

UNIT-II

Transformers: Principle, types, Construction and operation, EMF equation-equivalent circuit, phasor diagrams- under no load & loaded conditions. Voltage Regulation, losses and efficiency. Testings -OC and SC test, Sumpner's test. Auto- transformer- Three phase transformers**:** types of connections and their features.

UNIT-III

Synchronous Generators: Construction-EMF equation with winding factors-equivalent circuit and phasor diagram-armature reaction-synchronous impedance-voltage regulation- methods of

determining regulation –EMF method -power angle characteristics-parallel operation of alternators-synchronization of alternators.	
UNIT-IV	
Synchronous Motors: Theory of operation-starting methods-phasor diagrams-variation of current and power factor with excitation-Power circles-V and Inverted V curves-hunting and its prevention-synchronous condenser and its applications.	
Text Books:	1. P.S.Bhimbra, Electric Machinery, Khanna Publications, 7th Edition, 2011. 2. I.J.Nagrath & D.P.Kotari, Electric Machines, Tata Mc Graw-Hill Publication, 3rd Edition, 2017.

DIGITAL ELECTRONICS

II B. Tech. – III Semester (Code: 24EE305)

Lectures	2	Tutorial	1	Practical	0	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Basic Physics, Basic Mathematics.

Course Objectives: To make the students

- To understand different types of number systems used in digital systems. Boolean functions. simplification using Karnaugh map and theorems.
- Combinational circuits design procedure and implementing them.
- The operation and design methodology for sequential circuits.
- To understand about different types of IC logic families & the programmable logic devices like ROM, PLA & PAL.

Course Outcomes: After completion of this course, Students will be able to

CO1	Illustrate basic digital logic fundamentals such as numbering systems, Boolean functions minimization methods.
CO2	Describe the operation and design procedure of combinational circuits.
CO3	Comprehend the operation and design methodology for sequential circuits
CO4	Explain different types of IC logic families & memory elements.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	POs											PSOs		
	1	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**	**11**	**1**	**2**	**3**
CO1	3	2	2	1	2	-	2	-	-	-	2	3	2	-
CO2	3	2	2	1	2	-	2	-	-	-	2	3	2	-
CO3	3	2	2	1	2	-	2	-	-	-	2	3	2	-
CO4	3	2	2	1	2	-	2	-	-	-	2	3	2	-

UNIT-I

Number Systems & Codes: Decimal, Binary, Octal, Hexadecimal Number systems and their conversions, r's and (r-1)'s Complements, BCD codes, Excess-3 code, Gray code, Hamming code. Boolean algebra: Boolean expressions and theorems, Logic gates, Universal gates, standard forms of logic expressions, simplification of Boolean functions using K maps (up to five variables).

UNIT-II

Combinational Logic Circuits: General design procedure for Combinational logic circuits, Design and applications of Binary Adders and Subtractors, Comparators, Encoders, Decoders, Multiplexers and Demultiplexers, Design of BCD to 7 Segment Decoder, Parity Generator and Checker, BCD Adder / Subtractor, Carry look ahead adders.

UNIT-III

Sequential Logic Circuits: Latches & flipflops (SR, D, JK & T), Timing Considerations, Characteristic Table, Characteristic Equation, Excitation table, State table and State diagrams for SR, D, JK & T Flip-flops, Conversion from one type of Flip-flop to another. Shift Registers, Counters – synchronous & asynchronous.

UNIT-IV

IC Logic Families: Brief overview of Transistor as a switch, Logic gate characteristics –

propagation delay, speed, noise margin, fan-out and power dissipation, Standard TTL and static CMOS gates. Programmable Logic Devices: ROM, Programmable Logic Arrays (PLA), Programmable Array Logic (PAL).	
Text Books :	1. M Morris Mano, Digital Logic and Computer Design, PHI/Pearson Education, 2003. 2. Fundamentals of Digital Circuits, A.Anand Kumar, 4th Edition, Pearson Education.

DATA STRUCTURES AND ALGORITHMS LAB

II B. Tech. – III Semester (Code: 24EEL301/SEC1)

Lectures	1	Tutorial	0	Practical	2	Credits	2
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Fundamentals of Computing.

Course Objectives: To make the students

- To impart the basic concepts of data structures and algorithms.
- To apply concepts about searching and sorting techniques
- To solve basic concepts about stacks, queues, lists, trees and graphs.
- To enable them to write algorithms for solving problems with the help of fundamental data structures.

Course Outcomes: After completion of this course, Students will be able to

CO1	Implement ADTs of different types of linked lists and applications.
CO2	Implement stack and queue ADT's using arrays and their applications.
CO3	Construct and implement different tree algorithms.
CO4	Implement various hashing techniques and Graph traversal methods.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	POs											PSOs		
	1	2	3	4	5	6	7	8	9	10	11	1	2	3
CO1	2	3	2	-	2	-	-	-	2	-	3	3	-	-
CO2	3	3	2	-	2	-	-	-	2	-	3	3	-	-
CO3	1	3	2	-	2	-	-	-	2	-	3	2	-	-
CO4	1	3	2	-	2	-	-	-	2	-	3	2	-	-

UNIT-I

Introduction: Importance of Data Structures, Classification of Data Structures.
Stacks and Queues: Stack ADT and its operations, Stack Applications: Evaluation of Postfix. Queue ADT, Operations on Queue ADT.

UNIT-II

Linked Lists: Singly linked lists: Representation in memory, Algorithms of several operations: Traversing, Searching, Insertion, Deletion from linked list. Double Linked List-Operations. Sorting Techniques: Quick sort, Merge Sort.

UNIT-III

Trees: Preliminaries, Binary Trees, Expression trees, The Search Tree ADT-implementations.

UNIT-IV

Graphs: Basic Terminologies and Representations, Graph search and traversal algorithms: BFS and DFS.

LIST OF EXPERIMENTS:

1. Write a program to perform the following operations on Array List.
   a) Creation b) Insertion c) Deletion d) Search e) Display.
2. Write a program to implement the following

a) stack using array b) queue using array
3. Write a program to implement the following using stack.
a) infix to postfix conversion b) postfix evaluation
4. Write a program to implement circular queue and perform the following
a) enqueue b) dequeue
5. Write a program to perform the following operations on Single Linked List.
a) Creation b) Insertion c) Deletion d) Search e) Display
6. Write a program to perform the following operations on Circular Single Linked List.
a) Creation b) Insertion c) Deletion d) Search e) Display
7. Write a program to perform the following operations on Doubly Linked List.
a) Creation b) Insertion c) Deletion d) Search e) Display
8. Write a program to implement the following sorting techniques
a) Quick Sort b) Merge Sort c) Shell Sort
9. Write a program to demonstrate Binary Expression tree.
10. Write a program to create Binary tree and display their traversals.
11. Write a program to implement all the functions of a dictionary (ADT)using Linked List.
12. Write a program that implements the following i) Insertion sort ii) Merge sort iii)Heap sort.
13. Write a program to Implementation of Graph Search Methods.

Note: *Minimum of 10 Exercises have to be completed and documented.*

DESIGN THINKING AND INNOVATION LAB

II B. Tech. – III Semester (Code: 24EEL302)

Lectures	1	Tutorial	0	Practical	2	Credits	2
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: None

Course Objectives: To make the students

- Provide an overview of design thinking.
- Engage students to allow them to integrate these components into their own courses.
- Nurture their skills to contribute for solving community-based problems.
- Provide a framework to work in teams to solve problems.

Course Outcomes: After completion of this course, Students will be able to

CO1	Describe the components of design thinking.
CO2	Discuss the importance of users& community partners in the design process in proposing solutions.
CO3	Employ prototyping and failure handling into their design experiences.
CO4	List attributes of expert designers.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	POs											PSOs		
	1	2	3	4	5	6	7	8	9	10	11	1	2	3
CO1	3	2	3	3	3	3	3	3	1	3	-	-	-	-
CO2	3	3	3	3	3	3	3	3	2	3	-	-	-	-
CO3	3	3	3	3	3	3	3	3	2	3	-	-	-	-
CO4	3	3	3	1	2	3	3	3	2	3	-	-	-	-

UNIT-I

Introduction to Design Thinking: Characteristics of design thinking, Expert and novice design characteristics, Opportunities for student to learn skills needed for the development of expertise.
Case study for design thinking success: Creating a culture of design learning, Gathering information from users, Rapid prototyping.

UNIT-II

Users and community partners: Understanding users, identifying users, creating tools for understanding users
Requirements and specifications: Defining specifications, State of the art comparisons, Testing requirements

UNIT-III

Prototyping: Prototypes for technology, Prototypes for communication
Ideation and concept generation: Brainstorming, Concept generation, Functional decomposition.
Testing and design to prevent failures: Testing of designs, Design for Failure Modes and Effects Analysis (DFMEA), Delivery to users.

UNIT-IV

Teaming concepts in design: Managing student teams, Organizing teams, Assessing teams, Mentoring and advising teams
Closure and summary: Reviewing design cycles and concepts, Putting it into action.

Practical Exercises

1.IDEO Tool Kit – Design Thinking Case Study.
2.Community Project – identification – community partner –prototype evaluation.
3.Functional Decomposition – eg: Mechanical Pencil.
4. Prototyping Exercise – using paper/thermos coal/cardboard/recyclable material, testability and maintainability.
5.Requirement and Specification Analysis.
6.The Lean Canvas Model – business model.
7.Thirty Circle Exercise – IDEO thinking.
8.Risk Analysis – case study – DFMEA Analysis.

MEASUREMENT AND INSTRUMENTATION LAB
II B. Tech. – III Semester (Code: 24EEL303)

Lectures	1	Tutorial	0	Practical	2	Credits	2
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Basic Mathematics, Basic Electrical Engineering.

Course Objectives: To make the students

- To learn about characteristics of measuring instruments.
- To have an adequate knowledge in Calibration of measuring instruments.
- To have an adequate knowledge in errors in Bridges.
- To have an adequate knowledge in Sensors and Transducers.

Course Outcomes: After completion of this course, Students will be able to

CO1	Demonstrate various measurement devices, characteristics, operation and their limitations.
CO2	Illustrate the dynamic response and the calibration of few instruments.
CO3	Calibration and validation of DC and AC bridges.
CO4	Demonstrate the Function of Various types of Transducers.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	POs											PSOs		
	1	2	3	4	5	6	7	8	9	10	11	1	2	3
CO1	3	3	-	3	-	-	-	3	3	-	-	3	2	-
CO2	3	3	-	3	-	-	-	3	3	-	-	3	2	-
CO3	3	3	-	3	-	-	-	3	3	-	-	3	2	-
CO4	3	3	-	3	-	-	-	3	3	-	-	3	2	-

UNIT-I

Introduction to Measurement: Elements of Generalized measurement system- Methods of measurement- Classification of instruments–Static & Dynamic characteristics of instruments- Mean, Standard deviation- Probability of errors-Types of error Accuracy, Precision, Sensitivity, Linearity, Resolution.

UNIT-II

Electrical Measuring Instrument: Basic effects of electromechanical instruments– Ammeter and voltmeter–Moving coil–Moving Iron–Electro dynamo meter and induction type– Extension of range. Wattmeter–Dynamometer and induction type energy meter. Instrument transformers (CTs and PTs). Measurement of phase and time. Digital Meters.

UNIT-III

Bridges: Measurement of resistance-Low Medium and High- AC bridges- Measurement of inductance using Anderson's Bridge, Measurement of Capacitance using Schering Bridge.

UNIT-IV

Transducers: Temperature transducers- Resistance Temperature Detector (RTD), Thermistor, Thermocouple-Displacement transducer- Linear Variable Differential Transformer (LVDT), Pressure transducer- Strain gauge. Oscilloscope-Working Principle, operation and applications.

List of Experiments

1. Measurement of a batch of resistors and estimating statistical parameters.
2. Measurement of Medium resistance using Wheatstone bridge.
3. Measurement of Inductance using an Anderson's bridge technique as well as LCR meter.
4. Measurement of Capacitance using Schering bridge technique as well as LCR meter.
5. Measurement of Low Resistance using Kelvin's double bridge.
6. Measurement of High resistance and Insulation resistance using Megger.
7. Measurement of dielectric strength of Transformer oil using oil testing kit.
8. Calibration of 1-phase energy meter using direct loading/Phantom loading method.
9. Current Measurement using CT.
10. Study a Linear Variable Differential Transformer (LVDT) and use it in a simple. Experimental set up to measure a small displacement.
11. Study the characteristics of Resistance Temperature Detector (RTD)
12. Study the characteristics of a Thermistor.
13. Study the characteristics of a Thermocouple.
14. Study the characteristics of a Photo reflective sensor for Speed Measurement.
15. Measure the stress & strain using strain gauges mounted on cantilever beam.

Note: Minimum 10 experiments should be carried.

NSS/NCC/SCOUTS & GUIDES/COMMUNITY SERVICE
II B. Tech. – III Semester (Code: 24EEL304)

Lectures	0	Tutorial	0	Practical	1	Credits	0.5
Continuous Internal Evaluation			0	Semester End Examination			100

Pre-Requisite: None.

Course Objectives: To make the students

- The objective of introducing this course is to impart discipline, character, fraternity, teamwork, social consciousness among the students and engaging them in selfless service.

Course Outcomes: At the end of this course, Students will be able to

CO1	Understand the importance of discipline, character and service motto.
CO2	Solve some societal issues by applying acquired knowledge, facts, and techniques.
CO3	Explore human relationships by analyzing social problems.
CO4	Determine to extend their help for the fellow beings and downtrodden people and also leadership skills and civic responsibilities.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

UNIT-I

General Orientation on NSS/NCC/ Scouts & Guides/Community Service activities, career guidance.

Activities:

i) Conducting -ice breaking sessions-expectations from the course-knowing personal talents and skills

ii) Conducting orientations programs for the students -future plans-activities-releasing road map etc.

iii) Displaying success stories-motivational biopics-award winning movies on societal issues etc.

iv) Conducting talent show in singing patriotic songs-paintings-any other contribution.

UNIT-II

Nature & Care

Activities:

i) Best out of waste competition.

ii) Poster and signs making competition to spread environmental awareness.

iii) Recycling and environmental pollution article writing competition.

iv) Organising Zero-waste day.

v) Digital Environmental awareness activity via various social media platforms.

vi) Virtual demonstration of different eco-friendly approaches for sustainable living.

vii) Write a summary on any book related to environmental issues.
UNIT-III
Community Service **Activities:** i) Conducting One Day Special Camp in a village contacting village-area leaders-Survey in the village, identification of problems-helping them to solve via media-authorities-experts-etc. ii) Conducting awareness programs on Health-related issues such as General Health, Mental health, Spiritual Health, HIV/AIDS. iii) Conducting consumer Awareness. Explaining various legal provisions etc. iv) Women Empowerment Programmes-Sexual Abuse, Adolescent Health and Population Education. v) Any other programmes in collaboration with local charities, NGOs etc.

ENVIRONMENTAL SCIENCE

II B. Tech. – III Semester (Code: 24EE306/MC01)

Lectures	2	Tutorial	0	Practical	0	Credits	0
Continuous Internal Evaluation			40	Semester End Examination			0

Pre-Requisite: Chemistry, Physics, Geography and Earth Science.

Course Objectives: To make the students

- To understand and learn about ecosystem and biodiversity exist in nature.
- To know about the natural resources and sustainability.
- To understand different types of pollutions, present in Environment.
- To know the global environmental problems with case studies.

Course Outcomes: After completion of this course, Students will be able to

CO1	Students develop a strong understanding of ecosystems, biodiversity and the importance of their conservation.
CO2	Students gain an understanding of the protection of natural resources for environmental protection and sustainability.
CO3	Know how to manage the harmful pollutions.
CO4	Create awareness among the youth on environmental concerns important in the long-term interest of the society.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO4	3	2	-	-	-	3	-	-	-	-	-	1	-	-

UNIT-I

Ecosystems: Definition, Structure and Functions of Ecosystems, Forest Ecosystem.
Biodiversity: Definition and levels of Biodiversity; Values of Biodiversity, Threats and Conservation of Biodiversity.

UNIT-II

Natural Resources: Land: Land as a resource, Causes and effects of land degradation, **Water**: floods and drought, Dams - benefits and problems.
Sustainability: Rain water harvesting and Watershed management.

UNIT-III

Pollution: Definition; Causes, effects and control of air, water pollution.

Solid Waste Management - 3R approach, composting and vermin-composting.

UNIT-IV

Environmental Issues: Global warming, Ozone layer depletion, Acid rains

Case Studies: Bhopal Tragedy, Mathura Refinery and Taj Mahal.

CONTROL SYSTEMS
II B. Tech. – IV Semester (Code: 24EE401)

Lectures	2	Tutorial	1	Practical	0	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Basics of Mathematics, Physics and Network Analysis.

Course Objectives: Students will be able to

CO1	Make the students to provide a fundamental understanding of control systems by introducing different types of systems, feedback mechanisms, and mathematical modeling techniques such as transfer functions, block diagrams, and signal flow graphs.
CO2	To enable students to analyze system performance in the time domain by evaluating transient and steady-state responses, error constants, and stability criteria using standard test signals.
CO3	Make the students to develop skills in frequency domain analysis and stability assessment through Bode plots, Nyquist plots, and Root Locus techniques, establishing a connection between time and frequency responses.
CO4	To equip students with controller and compensator design techniques by applying Proportional-Integral-Derivative (PID) controllers, lead-lag compensators, and state-space methods, ensuring system controllability and observability.

Course Outcomes: At the end of this course, Students will be able to

CO1	Interpret different physical systems, construct mathematical models, and reduce complex block diagrams into simplified signal flow representations for effective system analysis.
CO2	Employ time-domain analysis to evaluate transient and steady-state performance parameters and assess system stability using complex domain techniques
CO3	Formulate and conduct system analysis in both time and frequency domains using Bode plots, Nyquist plots, and Root Locus techniques to predict dynamic behavior and performance.
CO4	Identify the required dynamic response, apply suitable control techniques, and assess system controllability and observability using state-space analysis for effective controller design.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	POs											PSOs		
	1	2	3	4	5	6	7	8	9	10	11	1	2	3
CO1	3	3	2	2	2	-	-	-	1	1	1	3	2	2

CO3	3	3	3	3	2	-	-	-	1	1	1	3	3	3
CO4	3	3	3	3	3	-	-	-	1	1	1	3	3	3

UNIT-I

Introduction to Control Systems: Basic concepts and classification of control systems,Open-loop and closed-loop control systems, Effects of feedback on system performance (sensitivity,

bandwidth, and disturbance rejection),Linear Time-Invariant (LTI), Time-Variant, and Nonlinear Control Systems.

Modeling of LTI Systems: Mathematical modeling of physical systems, Transfer function derivation, Block diagram representation and reduction techniques, Signal Flow Graph (SFG) and Mason's Gain Formula.

UNIT-II

Time Domain Analysis: Standard test signals, Step, Ramp, Parabolic, and Impulse response, Time response of first-order and second-order systems, Performance indices: Rise time, peak time, settling time, and overshoot.

Errors in Response and Stability: Steady-state error and error constants, Effect of additional poles and zeros on system response, Basic concepts of stability and Routh-Hurwitz Criterion

UNIT-III

Frequency Response Analysis: Frequency response characteristics and time-domain correlation, Bode plots – Gain margin and phase margin, Nyquist stability criterion and Nyquist plots, Polar plots and their significance.

Root Locus Technique: Definition and properties, Construction of Root Locus, Effects of pole-zero addition on stability, Introduction to controller design using Root Locus

UNIT-IV

Design of Controllers and Compensators: Proportional (P), Integral (I), and Derivative (D) controllers, Lead, Lag, and Lead-Lag compensation techniques, Design of feedback controllers using frequency domain methods.

State Space Analysis: Concepts of state variables and state-space representation, Solution of state equations using Laplace Transform, Controllability and Observability – Kalman's criteria System diagonalization.

LINEAR INTEGRATED CIRCUITS

II B. Tech. – IV Semester (Code: 24EE402)

Lectures	2	Tutorial	1	Practical	0	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Basics of Mathematics, Physics.

Course Objectives: To make the students

- Describe op-amp circuits to perform arithmetic operations
- Analyze linear and non-linear applications using op-amps.
- Choose appropriate A/D and D/A converters for signal processing applications
- Analyze oscillators and filters using functional ICs.

Course Outcomes: After completion of this course, Students will be able to

CO1	Describe op-amp circuits to perform arithmetic operations
CO2	Analyze linear and non-linear applications using op-amps.
CO3	Choose appropriate A/D and D/A converters for signal processing applications
CO4	Analyze Multi vibrators and filters using functional ICs.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	POs											PSOs		
	1	2	3	4	5	6	7	8	9	10	11	1	2	3

CO2	3	3	2	-	-	-	-	-	-	-	3	3	-	-
CO3	3	3	2	-	-	-	-	-	-	-	3	3	-	-
CO4	3	3	2	-	-	-	-	-	-	-	3	3	-	-

UNIT-I

Introduction to Op-Amp: Introduction to op-amps, ideal Characteristics, Pin configuration of 741 op-amps. Bias, offsets and drift, bandwidth and slew rate. Offset and Frequency compensation. Inverting and noninverting amplifiers and their analysis. Applications: inverting and non-inverting summers, difference amplifier, Instrumentation Amplifier, differentiator and integrator, Absolute value output circuit, Peak detector, Sample and hold circuit.

UNIT-II

Op-Amp Applications: Oscillator principles - Oscillator types - Frequency stability - Phase shift oscillator - Wein bridge oscillator - Quadrature oscillator - Square-wave generator - Triangular wave generator - Saw tooth wave generator - Voltage controlled oscillator.

Comparators: Introduction to comparator - Basic comparator - Zero-crossing detector - Schmitt Trigger - Comparator characteristics - Limitations of Op-Amps as comparators - Voltage limiters.

UNIT-III

ADCs and DACs: D/A conversion fundamentals - Weighted resistor summing D/A Converter - R-2R Ladder D/A converter. A/D conversion: Ramp converters - Successive Approximation A/D converters - Dual slope converters - Parallel A/D converters - Tracking A/D converters.

UNIT-IV	
Applications of Special ICS: The 555 timer - 555 as Monostable and Astable Multivibrator and applications. Phase Locked Loops - Operating principles. **Active Filters**: Active LP and HP filters - Band pass filters: Wideband - Narrow Band pass filters - Band stop filters, All pass filters.

ELECTRICAL MACHINES-II
II B.Tech – IV Semester (Code: 24EE403)

Lectures	2	Tutorial	1	Practical	0	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Basic Physics, Basic Mathematics, DC Machines and Transformers.

Course Objectives: To make the students

- Explain the construction of Three-phase Asynchronous motors and its characteristics.
- Explain the construction and operation of 1-phase Induction motors.
- Understand the construction, operation and performance of Servo motors & BLDC Motors.
- Gain knowledge about construction, operation and performance of Stepper motors & Switched reluctance motors.

Course Outcomes: After completion of this course, Students will be able to

CO1	Describe the operation of Induction motors and its characteristics.
CO2	Assess the construction and operation of 1-phase Induction motors.
CO3	Analyze operation and performance of Servo motors & BLDC Motors.
CO4	Analyze operation and performance of Stepper motors & Switched reluctance motors.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	Pos											PSOs

CO3	3	3	2	2	-	-	-	-	-	-	2	3	2	-
CO4	3	3	3	2	-	-	-	-	-	-	2	3	2	-

UNIT-I

Induction Machines: Construction and types of induction motors-rotating magnetic field in two phase & three phase systems-Torque Equation-Torque Slip characteristics- Equivalent circuit-phasor diagram-losses and efficiency- circle diagrams-starting methods and speed control methods of induction motor-Induction generator.

UNIT-II

Single-Phase Induction Motors: Constructional features-working principle- equivalent circuit-various starting methods-characteristics-applications.

Single Phase Special Electrical Machines: AC series Motor, Repulsion motor, Hysteresis motor, Universal Motor-Shaded Pole Motor-construction-principle of operation–applications.

UNIT-III

AC and DC servo motors, Constructional features, and Principle of operation, Torque production, Performance Characteristics, applications and Transfer function.

Permanent Magnet Synchronous Motors (PMSM): Permanent magnet machines-types, Principle of operation, EMF and torque equation, Torque speed characteristics, Transfer function of PMSM, and closed loop control scheme of PMSM.

Permanent Magnet Brushless DC Motor: Constructional Features-Principle of operation-types- EMF and torque equation-Torque- speed characteristics, speed control methods and its applications.

UNIT-IV

Stepper Motor: Constructional features, Principle of operation, Modes of excitation, Drive system and circuit for open loop control, closed loop control and applications.

Switched Reluctance Motor (SRM): Switched Reluctance Motor-Constructional features-Principle of operation- Torque equation- Characteristics-speed control methods of SRM-Applications.

SIGNALS AND SYSTEMS

II B.Tech – IV Semester (Code: 20EE404)

Lectures	2	Tutorial	1	Practical	0	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Basic Physics, Basic Mathematics.

Course Objectives: To make the students

- Explain the concepts of continuous time and discrete time Signals.
- Gain knowledge about LTI systems and its time domain analysis.
- Represent the system in the frequency domain using Fourier analysis tool like CTFS, DTFS, DTFT and DFT.
- Analyse discrete time systems using Z-Transform.
- Describe sampling theorem and its implications.

Course Outcomes: After completion of this course, Students will be able to

CO1	Explain the concepts of continuous time and discrete time signals.
CO2	Demonstrate and analyse continuous and discrete LTI systems.
CO3	Determine the frequency response of continuous and discrete time systems using Fourier analysis tools.
CO4	Analysis of discrete time systems using Z- transforms.
CO5	Illustrate sampling theorem and reconstruct of signals.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	Pos											PSOs		
	1	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**	**11**	**1**	**2**	**3**

CO4	3	3	2	3	-	-	-	-	-	-	1	3	2	2
CO5	3	3	2	3	-	-	-	-	-	-	1	3	2	2

UNIT-I

I**ntroduction to Signals:** Representation of continuous & discrete time signals, Signal properties, Basic operations on continuous and discrete time signals, continuous special signals and discrete special signals.

UNIT-II

I**ntroduction to Systems & Behavior of LTI Systems:** System properties, Convolution, interconnections. Characterization of causality and stability of LTI systems. System representation through differential equations and difference equations. Impulse response and step response.

UNIT-III

Fourier Series: Introduction, Fourier series representation of continuous-time periodic signals, Convergence of the Fourier series, Properties of continuous-time Fourier series.

Fourier Transforms: Introduction, Representation of aperiodic signals: The continuous Fourier transform, The Fourier transform for periodic signals, Properties of the Continuous-time Fourier transform.	
UNIT-IV	
Z-Transform: The Z-Transform for discrete time signals and systems, system functions, poles and zeros of systems and sequences, Z-domain analysis. **Sampling and Reconstruction:** The Sampling Theorem and its implications. Spectra of sampled signals. Reconstruction: ideal interpolator, zero-order hold, first-order hold. Aliasing and its effects.

GENERATION AND TRANSMISSION

II B. Tech. – IV Semester (Code: 24EE405)

Lectures	3	Tutorial	0	Practical	0	Credits	3
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Basics of Mathematics, Electrical Machines, Electro Magnetic Fields.

Course Objectives: Students will be able

- Discuss the economic aspects and choice of power stations and units.
- Infer the significance of conventional and non-conventional energy resources and their operation.
- Calculate transmission line parameters.
- Discuss the theory and mechanical design of transmission lines and introduce various types of insulators and their testing.

Course Outcomes: At the end of this course, Students will be able to

CO1	Explain the economic aspects and choice of power stations and units.
CO2	Examine the significance of conventional and non-conventional energy resources and their operation.
CO3	Calculate the parameters of Transmission line and describe the modeling of different types of transmission line.
CO4	Demonstrate the types of insulators and illustrate mechanical design, the travelling wave's phenomenon on transmission lines.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	POs											PSOs		
	1	2	3	4	5	6	7	8	9	10	11	1	2	3

CO3	3	3	3	2	2	2	-	-	-	-	-	3	3	3
CO4	3	3	3	3	2	1	-	-	-	-	-	3	3	3

UNIT-I

Economical Aspects: Economics of generation - factors affecting cost of generation - Definitions: load factor–diversity factor – plant use factor - reduction of cost by inter connected stations. Causes of low power factor its improvement methods. Phase advancing and generation of reactive KVAR-most economical power factor for constant KW load and constant KVA type loads.

Tariff: Characteristics of Tariff – types of Tariffs.

UNIT-II

Thermal Power: Block Diagram of Thermal Power Station (TPS), Brief Description of Thermal Power system Components

Hydro Power: Selection of Site, Classification, Layout, Description of Main Components.

Nuclear Power: Nuclear Fission and Chain Reaction-Principle of Operation of Nuclear Reactor. - Description of Main Components.

Solar Power Generation: Role and Potential of Solar Energy Options, Principles of Solar Radiation, Solar Energy Collectors, Different Methods of Energy Storage – PV Cell- V-I Characteristics.

Wind Power Generation: Role and potential of Wind Energy Options, Horizontal and Vertical Axis Wind Mills- Performance Characteristics-Pitch & Yaw Controls – Economic Aspects.

UNIT-III

Transmission Line Parameters: Calculation of inductance and capacitance for single phase and three phase double circuit lines, concept of GMR & GMD; symmetrical and asymmetrical conductor configuration with and without transposition.

Transmission line theory: Short, medium and long lines – regulation and efficiency - π, T and rigorous methods of solution - ABCD constants. Surge impedance loading - Ferranti effect.

UNIT-IV

Insulators, Corona: Types of Insulators calculation of String efficiency and Methods for improving of string efficiency. Failure of insulator and testing. Corona-Description of the phenomenon, factors affecting corona, critical voltages and power loss, Radio Interference.

Mechanical Design of Lines: Sag and Tension Calculations with equal and unequal heights of towers, Effect of Wind and Ice on weight of Conductor - Stringing chart, sag template.

Travelling Waves on Transmission Lines and Over Voltages: Wave equation, Surge impedance and wave velocity, Reflection and Refraction of waves, Typical cases of line terminations, Attenuation and Distortion, Arcing ground.

PYTHON PROGRAMMING LAB

II B. Tech. – IV Semester (Code: 24EEL401/SEC2)

Lectures	1	Tutorial	0	Practical	2	Credits	2
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Fundamentals of Computing.

Course Objectives: To make the students

- To enable the students to identify the syntax and semantics of Python.
- To enable students to write python scripts for solving real time problems.
- To enhance the object-oriented programming skills of the students.
- To enable students to use NumPy, Pandas and Matplotlib libraries for Data analysis.

Course Outcomes: After completion of this course, Students will be able to

CO1	Explain basic concepts on Python constructs.
CO2	Practice programs using sequences in Python.
CO3	Demonstrate Object oriented programming concepts of python.
CO4	Illustrate handling of errors, exceptions and libraries for data analysis.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	Pos											PSOs		
	1	2	3	4	5	6	7	8	9	10	11	1	2	3
CO1	2	3	3	2	3	3	-	-	3	-	3	3	-	-
CO2	2	3	3	2	3	-	-	-	3	-	3	3	-	-
CO3	2	3	3	2	3	-	-	-	3	-	3	3	-	-
CO4	2	3	3	3	3	-	-	-	3	-	3	3	-	-

UNIT-I

Introduction to Python basics, including its features, variables, data types, expressions, operators, and input/output. **Conditional execution** using if, logical operators, and exception handling. **Looping** constructs like while and for. **Function** definitions, built-in functions, and parameter passing**.**

UNIT-II

Strings as sequences, string operations, slicing, methods, and formatting. **File I/O concepts** like reading/writing files and using exceptions. **Lists** and their operations, mutability, and parsing. Sets and their methods, operations, and comprehensions. **Tuples**, **Dictionaries**, dictionary operations, text parsing, and data handling.

UNIT-III

Object Oriented Programming: Managing Larger Programs, Using Objects, starting with Programs, Subdividing a Problem: Encapsulation, First Python Object, Classes as Types, Object Lifecycle, Many Instances, Inheritance.

UNIT-IV

Exception Handling: Errors and Exceptions. **NumPy array:** Generate NumPy arrays and construct multidimensional arrays. **Libraries for Data Analysis:** Introduction to Pandas and Matplotlib.

LIST OF EXPERIMENTS

1. Write a script to print some Pythagorean triples.
2. Write a script that demonstrates string handling capabilities of Python.
3. Write a script that demonstrates associated arrays support in Python.
4. Write a python program to find mean, mode, median and standard deviation using statistics module.
5. Write a script to print Fibonacci numbers up to and including the first command line argument.
6. Write a python program utilizing a list to display the name of a month based on a given month number.
7. Write a simple script that reads from a file detail of students in a section and finds top ten meritorious students in the section.
8. Write a script to Implement Stack.
9. Write a script to Implement Queue.
10. Write a python program to multiply two matrices using NumPy.
11. Write programs to perform following operations using pandas.
    a).Create a data frame b) Read and Write CSV files c) Insert -delete d) Group-merge e) Data visualization f) Creation of Pivot tables.

Electrical Machines -I Lab

II B.Tech – IV Semester (Code: 24EEL402)

Lectures	0	Tutorial	0	Practical	3	Credits	1.5
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Circuit Theory lab.

Course Objectives: Students will be able

- To develop experimental setups for studying the performance and operation of DC Generators and DC motors.
- To explore and understand the experimental setups to study the performance and operation of Transformers under various conditions.
- Acquire hands on experience of conducting various tests on alternators and obtaining their performance indices using standard analytical as well as graphical methods.
- To develop experimental setups for studying the performance and operation of Synchronous Motors.

Course Outcomes: At the end of this course, Students will be able to

CO1	To analyse and evaluate the performance characteristics of DC generators and motors.
CO2	Examine the performance of single-phase transformer.
CO3	To examine and understand the performance aspects of synchronous generators.
CO4	Examine the performance of the Synchronous Motor.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	POs											PSOs		
	1	2	3	4	5	6	7	8	9	10	11	1	2	3
CO1	3	3	2	3	-	-	-	3	2	-	2	3	3	-
CO2	3	3	2	3	-	-	-	3	2	-	2	3	3	-
CO3	3	3	2	3	-	-	-	3	2	-	2	3	3	-
CO4	3	3	2	3	-	-	-	3	2	-	2	3	3	-

LIST OF EXPERIMENTS

1. Load test on D.C Shunt Generator.
2. Load test on D.C Compound Generator.
3. Load test on D.C series Generator.
4. Speed control of DC Shunt motor.
5. Swinburne's Test on a D.C Shunt Motor
6. Brake test on D.C Shunt Motor.
7. OC & SC tests on single - phase transformer. (Equivalent circuit parameters, efficiency and voltage regulation)
8. Load test on single - phase transformer.(Efficiency and voltage regulation)
9. Sumpner's test on two single-phase Transformers. (Efficiency and voltage regulation)

10. Scott Connection of Transformers.
11. Parallel Operation of two Single - Phase Transformers.
12. Regulation of alternator by EMF method.
13. Regulation of alternator by ZPF method.
14. Synchronization of alternator with infinite busbar with P & Q control.
15. Load test on 3-phase Alternator
16. V and inverted V curves of synchronous motor.
17. Synchronous Motor performance with Normal, over and under excitations.

Note: Student Minimum 10 experiments should be carried out in above list.

DIGITAL ELECTRONICS AND LINEAR INTEGRATED CIRCUITS LAB

II B.Tech – IV Semester (Code: 24EEL403)

Lectures	0	Tutorial	0	Practical	3	Credits	1
Continuous Internal Evaluation			40	Semester End Examination			60

Pre-Requisite: Digital Electronics and Linear Integrated Circuits.

Course Objectives: Students will be able

- Design and verify different types of logic gates using universal gates, combinational logic circuits, code converters and comparator circuits.
- Design MUX, DEMUX, Counters and Flip-Flops using logic gates.
- Analyze and design various applications of Op-Amp and waveform generation circuits.
- Design of 555 Timer, RC Phase Shift Oscillator and Schmitt Trigger circuit.

Course Outcomes: At the end of this course, Students will be able to

CO1	Verify different types of logic gates using universal gates, combinational logic circuits, code converters and comparator circuits.
CO2	Examine MUX, DEMUX, Counters and Flip-Flops using logic gates.
CO3	Ability to use Op-Amp to design various applications like comparators, active filters and waveform generators.
CO4	Test and Design 555 Timer, RC Phase Shift Oscillator and Schmitt Trigger circuit.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	POs											PSOs		
	1	2	3	4	5	6	7	8	9	10	11	1	2	3
CO1	3	3	2	3	-	-	-	3	2	-	2	3	-	-
CO2	3	3	2	3	-	-	-	3	2	-	2	3	-	-
CO3	3	3	2	3	-	-	-	3	2	-	2	3	-	-
CO4	3	3	2	3	-	-	-	3	2	-	2	3	-	-

LIST OF EXPERIMENTS

1. Realization of Logic Gates Using Discrete Components & Universal Building Blocks.
2. Design of Combinational Logic Circuits like half-adder, Full adder, Half-subtractor and Full-subtractor.
3. Design of Code Converters.
4. Design of 4 Bit Magnitude Comparator.
5. Design of 4X1 Multiplexer and 1X4 Demultiplexer.
6. Realization of RS-JK & D Flip-Flop using Logic Gates.
7. Design of Synchronous Counter, Mod Counter, UP Counter, Down Counter and UP/Down Counter Using Flip Flops.
8. Design of Adder, Subtractor and Comparator circuits using Op-Amp.
9. Design of Integrator and Differentiator Using IC741 Op-Amp.

10. Design of Active Filters – LPF and HPF.
11. IC741 Waveform Generators – Sine, Sqaure and Triangular Waves.
12. IC555 Timer – Monostable and Astable Multivibrators.
13. Design of RC Phase Shift Oscillator.
14. Schmitt Trigger circuit using IC 741.
15. Design a 4-bit R-2R ladder type of digital to analog converter.

Note: Minimum 10 experiments should be carried out.

HEALTH AND WELLNESS YOGA AND SPORTS

II B.Tech – IV Semester (Code: 24EEL404)

Lectures	0	Tutorial	0	Practical	1	Credits	0.5
Continuous Internal Evaluation			0	Semester End Examination			100

Pre-Requisite:None.

Course Objectives: Students will be able

- The main objective of introducing this course is to make the students maintain their mental and physical wellness by balancing emotions in their life.
- It mainly enhances the essential traits required for the development of the personality.

Course Outcomes: At the end of this course, Students will be able to

CO1	Outline the importance of yoga and sports for Physical fitness and sound health.
CO2	Make use of various activities that help to enhance their health.
CO3	Develop Positive Personality for individual and group work.
CO4	Categorize the health-related fitness components and analyze the current personal fitness levels.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	POs											PSOs		
	1	2	3	4	5	6	7	8	9	10	11	1	2	3
CO1	-	-	-	-	-	-	-	-	2	-	3	-	-	-
CO2	-	-	-	-	-	-	-	-	2	-	3	-	-	-
CO3	-	-	-	-	-	-	-	-	2	-	3	-	-	-
CO4	-	-	-	-	-	-	-	-	2	-	3	-	-	-

UNIT-I

Concept of health and fitness, Nutrition and Balanced diet, basic concept of immunity Relationship between diet and fitness, Globalization and its impact on health, Body Mass Index (BMI) of all age groups.

Activities:

i) Organizing health awareness programs in community.
ii) Preparation of health profile.
iii) Preparation of chart for balance diet for all age groups.

UNIT-II

Concept of yoga, need for and importance of yoga, origin and history of yoga in Indian context, classification of yoga, Physiological effects of Asanas-Pranayama and meditation, stress management and yoga, Mental health and yoga practice.

Activities:

Yoga practices -Asana, Kriya, Mudra, Bandha, Dhyana, Surya Namaskar.

UNIT-III

i) Participation in one major game and one individual sport viz., Athletics, Volleyball, Basketball, Handball, Football, Badminton, Kabaddi, Kho-kho, Table Tennis, Cricket etc., Practicing general and specific warm up, aerobics.

ii) Practicing cardiorespiratory fitness, treadmill, run test, 9 min walk, skipping and running.	
Text Books:	1. Gordon Edlin, Eric Golanty. Health and Wellness, 14th Edn. Jones & Bartlett Learning,2022 2. T.K.V.Desikachar. The Heart of Yoga: Developing a Personal Practice 3. Archie J.Bahm. Yoga Sutras of Patanjali, Jain Publishing Company, 1993

CONSTITUTION OF INDIA

II B. Tech. – IV Semester (Code: 24EE406/MC02)

Lectures	2	Tutorial	0	Practical	0	Credits	0
Continuous Internal Evaluation			40	Semester End Examination			0

Pre-Requisite: None.

Course Objectives: Students will be able

- To provide basic information about fundamental law of the country.
- To educate the student about fundamental Rights and fundamental duties of citizens.
- To educate the students about Government organs, methods of functioning
- To motivate students to leave narrow selfish outlook and inculcate broad national, human outlook.

Course Outcomes: At the end of this course, Students will be able to

CO1	Understand the importance of the constitution in a Democratic Society
CO2	Understand the fundamental rights, duties of a citizen by discharging his duties to become a good citizen.
CO3	Remember about judicial supremacy and independence of judiciary and fight for his legitimate rights through court of law.
CO4	Applying the principles to participate in the democratic process of governance and in nation building activities.

Mapping of Course Outcomes with Program Outcomes & Program Specific Outcomes

CO	Pos											PSOs		
	1	2	3	4	5	6	7	8	9	10	11	1	2	3
CO1	1	2	2	-	1	-	-	-	3	-	3	3	-	-
CO2	-	-	1	1	1	2	-	-	-	-	3	3	3	2
CO3	-	-	1	-	1	-	2	-	-	-	3	3	-	-
CO4	3	1	2	-	-	2	-	-	3	-	1	3	2	-

UNIT-I

1.1 Meaning of the constitutional law and constitutionalism.
1.2 Historical perceptive of the constitution of India.
1.3 Salient features and characteristics of the constitution of India.
1.4 Preamble, union and its territory and citizenship.

UNIT-II

2.1 Fundamental rights principles.
2.2 Directive principles of state policy.
2.3 Fundamental duties.
2.4 The government of the union, the president, The Prime Minister, and the council of ministers, The parliament of India, The supreme court, the union judiciary

UNIT-III

3.1 The Machinery of Government in the states, The Governor, The Chief Minister and council of Ministers, The State legislature, High court, Judiciary in the states

3.2 Union territories. 3.3 The Federal System, division of powers between centre and states, legislative administration and financial relation. 3.4 Emergency Provisions, President Rule, National Emergency, Financial Emergency.	
UNIT-IV	
4.1 Local self-Government, Panchayat Raj, Municipalities and municipal Corporation 4.2 Miscellaneous Provisions, the comptroller and Auditor general of India, The Public Service commission, Special Provisions relating to certain classes, Elections — Political parties. 4.3 Amendment of the Constitution. 4.4 Laws Relating to Women	
Text Books:	1. Introduction to constitution of India, D.D.Basu, 24th Edition, Lexis Nexus, 2019. 2. The constitution of India by P.M.Bhakshi, 18th Edition, UniversaI law publishing, 2021.
