Department of Information Technology

ii

Vision of the College

To build centers of excellence, impart high quality education and instill high standards of ethics and professionalism through strategic efforts of our dedicated staff, which allows the college to effectively adapt to the ever changing aspects of education.

To empower the faculty and students with the knowledge, skills and innovative thinking to facilitate discovery in numerous existing and yet to be discovered fields of engineering, technology and interdisciplinary endeavors.

Mission of the College

Our Mission is to impart the quality education at par with global standards to the students from all over India and in particular those from the local and rural areas.

We continuously try to maintain high standards so as to make them technologically competent and ethically strong individuals who shall be able to improve the quality of life and economy of our country.

Bapatla Engineering College

(Autonomous)

Department of Information Technology

iii

Vision of the Department

Our vision is to empower our students with the skills and knowledge necessary to meet the challenges of the 21st century, driving sustainable socio-economic development through innovative solutions and responsible use of technology.

Mission of the Department

1. Catering to the needs of students by providing good infrastructure and by imparting skills relevant to the IT industry.
2. To motivate students and faculty members towards self-learning to acquire knowledge about emerging technologies in the IT industry.
3. Promoting research that leads to innovative solutions using cutting-edge technologies in IT domain for the benefit of the society.
4. To inculcate team spirit, leadership qualities and ethics among the students and faculty.

Bapatla Engineering College

(Autonomous)

Department of Information Technology

iv

Program Educational Objectives

The students graduated in Information Technology will be able to

- PEO1: Become successful and ethical professionals in IT and ITES (Information Technology Enabled Services) industries contributing to societal progress.
- PEO2: Engage in lifelong learning, adapting to changing technological scenarios.
- PEO3: Communicate and work effectively in diverse teams and exhibit leadership qualities.

Bapatla Engineering College

(Autonomous)

v

Department of Information Technology

Program Outcomes

Engineering Graduates will be able to:

1. **Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem Analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Bapatla Engineering College

(Autonomous)

Department of Information Technology

vi

Program Specific Outcomes

B.Tech. in Information Technology graduates will be able to:

- PSO1 **Domain Knowledge:** Acquire knowledge of hardware functionality, design and development of software components required to process the information.
- PSO2 **Problem Solving Skills:** Analyze data, Identify required data structures, design suitable algorithms, develop, operate and maintain software for real world problems.
- PSO3 **Paradigm Shifts:** Understand the progressive changes in computing, possess knowledge of context aware applicability of paradigms.

Bapatla Engineering College

(Autonomous)

1

Department of Information Technology

Academic Rules & Regulations (R24 Regulations) Regulations for Four Year Bachelor of Technology (B.Tech) Degree Program for the Students Admitted from the Academic Year 2024-25

1. **Admissions:** The sanctioned intake in a particular B.Tech program comprises of Category-A (presently 70%) and Category-B (30%) seats which is supplemented with supernumerary (10%) EWS seats. Admissions for the Category-A seats and the supernumerary seats shall be made by the Andhra Pradesh (A.P.) State Government based on the merit rank obtained by the student in the common entrance examination conducted. Admissions for the remaining Category-B seats shall be made by the college in accordance with the guidelines issued by the A.P. State Government.
2. **Medium of Instruction and Examination:** The medium of instruction of the entire B.Tech undergraduate program in Engineering and Technology and the examinations will be in English only.
3. **Minimum Instruction Days:** A semester comprises of 90 working days and the year is divided into two semesters.
4. **Award of B.Tech. Degree:** A student will be declared eligible for the award of the B.Tech degree if he / she fulfills the following academic regulations:
 - a. The student pursues a program of study in B.Tech for four academic years and in not more than eight academic years. A lateral entry student pursues a program of study for three academic years and not more than six academic years. However, for the students availing Gap year facility, this period shall be extended by two years at the most and these two years would not be counted in the maximum time permitted for graduation.
 - b. The student registers for 160 credits and secures all 160 credits. However, a lateral entry student registers for 121 credits and secures all the 121 credits from III semester to VIII semester of regular B. Tech program.
 - c. **Award of B. Tech degree with Minor:** The student secures an additional 16 credits from Minor stream chosen and fulfills all the requisites of a B.Tech program i.e. secures 160 (Regular program) / 121 (Lateral Entry program) credits. Minor is to be completed simultaneously with B.Tech program. Registering for a Minor degree is optional.
 - d. **Award of B.Tech degree with Honors:** The student secures an additional 16 credits fulfilling all the requisites of B.Tech program i.e. secures 160 (Regular program) / 121 (Lateral Entry program) credits. Registering for Honors is optional and is to be completed simultaneously with B.Tech program. Students can register either for Honors stream or Minor stream.
5. **Courses of study:** At present the following B.Tech programs of study are offered.

Bapatla Engineering College

(Autonomous)

2

Department of Information Technology

S.No.	Title of the UG Programme	Abbreviation
1.	Civil Engineering	CE
2.	Computer Science & Engineering	CS
3.	Computer Science & Engineering (Cyber Security)	CB
4.	Computer Science & Engineering (Data Science)	DS
5.	Computer Science & Engineering (Artificial Intelligence & Machine Learning)	CM
6.	Electronics & Communication Engineering	EC
7.	Electrical & Electronics Engineering	EE
8.	Information Technology	IT
9.	Mechanical Engineering	ME

6. Credits:

- Credit:** A unit by which the course work is measured. It determines the number of hours (60 minutes) of instruction required per week. One credit is equivalent to one hour of teaching (Lecture/Tutorial) or two hours of practical work/field work per week.
- Academic Year:** Two consecutive (one odd & one even) semesters constitute one academic year.
- Choice Based Credit System (CBCS):** The CBCS provides a choice for students to select courses (Professional, Job Oriented & Open Electives) from the prescribed set of courses.
- Each course in a semester is assigned certain number of credits based on the following

1 Hr. Lecture (L) per week	1 Credit
1 Hr. Tutorial (T) per week	1 Credit
1 Hr. Practical (P) per week	0.5 Credit
Internship of 4 to 6 weeks	2 Credits
Project Work of 16 weeks	12 Credits

- Course Structure:** Every course of the B.Tech program will be placed in one of the 7 categories with suggested credits as listed below.

Bapatla Engineering College

(Autonomous)

3

Department of Information Technology

S. No.	Category	AICTE Recommended Credits (%)	Breakup of Credits (Total 160)
1.	Humanities and Social Sciences including Management (HM)	5 – 8 %	8 – 13
2.	Basic Science Courses (BS)	12 – 16 %	19 – 26
3.	Engineering Science Courses (ES)	10 – 18 %	16 – 29
4.	Professional Core Courses (PC)	30 – 36 %	48 – 58
5.	Electives – Professional Electives (PE); Job Oriented Electives (JOE); Open Electives (OE); Skill Enhancement Courses (SEC)	19 – 23 %	37
6.	Internships & Project Work (PR)	8 – 11 %	16
7.	Mandatory Courses (MC)	-	Non-credit

8. **Course Evaluation Process:** The performance of the students in each semester shall be assessed course wise. All assessments will be done on an absolute mark basis. However, for the purpose of reporting the performance of a candidate, letter grades and grade points will be awarded. The performance of a student in each course is assessed with alternate assessment methods, term examinations on a continuous basis during the semester called Continuous Internal Evaluation (CIE) and a Semester End Examination (SEE) conducted at the end of the semester. For each course, there shall be a comprehensive SEE of three hours duration at the end of each semester, except for Mandatory courses.

The performance of a student in Internships, NSS/NCC/Scouts & Guides/Community Service and Health & Wellness/Yoga/Sports will be evaluated after completion of the course at the end of that semester.

8.1 **Weightage for Course Evaluation:** The distribution of marks between CIE and SEE to be conducted at the end of the semester will be as follows:

Nature of the Course	CIE	SEE
Theory Courses	40	60
Practical Courses	40	60
Mandatory Courses	40	-
NSS / NCC / Scouts & Guides / Community Service and Health & Wellness / Yoga / Sports	-	100
Summer Internship	-	100
Project Work	40	60

Bapatla Engineering College

(Autonomous)

4

Department of Information Technology

8.2 CIE in Theory/Mandatory Courses: In each Semester there shall be two Term Examinations and **Alternate Assessment Tools (AAT)** like Home Assignment, Class Test, Problem Solving, Group Discussion, Quiz, Seminar and Field Study in every theory course. The AAT with detailed modality of evaluation for each course shall be finalized by the teacher concerned before beginning of the course. It will be reviewed and approved by the Department Committee.

The Term Examination is conducted in the regular mode according to a schedule which will be common for a particular semester of study. The maximum weightage for Term Examinations, AATs and the calculation of marks for CIE in a theory course is given in the following Table.

Term Exams (Max. 20 marks ¹)	AAT (Max. 15 marks ²)	Attendance (Max. 5 marks)
75% of marks obtained in the best performed term exam + 25% of marks obtained in the other term exam	Continuous assessment by teacher as per the predetermined course delivery & assessment plan. (Minimum two & maximum four assessments). AAT marks shall be considered based on average of all tests conducted.	Attendance secured & marks awarded will be as under: $\geq 75\%$ and $< 80\%$ - 2 marks, $\geq 80\%$ and $< 85\%$ - 3 marks, $\geq 85\%$ and $< 90\%$ - 4 marks, $\geq 90\%$ - 5 marks

¹ Term Examination will be conducted for 30 marks and reduced to 20 marks.

² Each AAT will be conducted for 10 marks and the average performance shall be scaled up to 15 marks.

8.3 CIE in Laboratory Courses: The CIE for 40 marks of a laboratory course comprises of 15 marks for day-to-day laboratory work, 5 marks for record submission, 5 marks for attendance and 15 marks for a laboratory examination at the end of the laboratory course work. In any semester, a minimum of 90% of prescribed number of experiments / exercises specified in the syllabi for laboratory course shall be completed by the students. They shall complete these experiments / exercises in all respects and get the record certified by the internal lab teacher concerned and the Head of the Department.

8.4 CIE in Project Work: The CIE is for 40 marks which consist of 20 marks for reviews at the end of each month as per the process document in the form of seminars / presentations, 5 marks for attendance and 15 marks for the evaluation of project report submitted at the end of the semester.

8.5 Pass Criteria for CIE: A minimum of 20 (50%) marks are to be secured exclusively in the CIE with a minimum of 65% attendance in that course to be declared as qualified (Q) in that course and be eligible to appear for the SEE of that course. If a student fails to obtain 20 marks in CIE or a minimum of 65% attendance in that course, then the student will be regarded as not qualified (NQ) and that student is not eligible to appear for the SEE in that course. Such Student can register for the course repetition as per the guidelines mentioned in clause 13 to qualify in

Bapatla Engineering College

(Autonomous)

5

Department of Information Technology

that course. After securing 20 marks in course repetition, the student can appear for the SEE of that course as a supplementary candidate.

8.6 SEE in Theory Course, Laboratory Course and Project Work:

- For each theory course, there shall be a comprehensive SEE of three hours duration at the end of each Semester for 60 marks.
- For each laboratory course, the SEE shall be conducted by one internal and one external examiner appointed by the principal and the duration of the exam shall be for three hours. The SEE is for 60 marks which include 15 marks for write up, 35 marks for lab experiment / exercise and 10 marks for Viva-voce.
- Project Work shall be evaluated in the form of a Viva-Voce and demonstration of the thesis work for 60 marks. Viva-voce Examination in project work shall be conducted by one internal examiner appointed by the HOD and one external examiner to be appointed by the Principal.

8.7 Evaluation of Internships: Summer Internship at the end of IV & VI semesters carried out in industry / organization are to be evaluated in V & VII semesters respectively after the submission of certificate provided by the organization and a concise report submitted by the student to the department committee. The internship will be evaluated by the department committee for a total of 100 marks with 50 marks for the report and 50 marks based on seminars / presentation given to the department committee by the student.

8.8 Evaluation of NSS/NCC/Scouts & Guides/Community Service and Health & Wellness/Yoga/Sports: The above courses will be evaluated by the department committee for a total of 100 marks with 50 marks for the activities pursued by the student during that semester and 50 marks based on seminars / presentation given to the department committee by the student.

8.9 Pass Criteria for SEE:

a) Theory/Laboratory Courses and Project Work

- A minimum of 21 (35%) marks are to be secured exclusively in the SEE of the above courses for the award of the grade and securing the credits for that course.
- A student eligible to appear for the SEE in a course but is absent or has failed the examination may appear for SEE of that course in the next supplementary examination when offered.

b) Internship, NSS / NCC / Scouts & Guides / Community Service and Health & Wellness / Yoga / Sports

- A minimum of 40 (40%) marks are to be secured exclusively in the evaluation of the above courses for the award of the grade and securing the credits for that course.
- A student eligible to appear for the evaluation in the above courses but is absent or has failed in the examination may appear for evaluation of that course in the next supplementary examination when offered.

9. Choice Based Courses: Students can select a course from a prescribed set of courses offered by the department in the following categories.

- Professional Elective Courses:** There shall be five Professional Elective Courses from V Semester to VII. For each elective course there shall be a choice such that the student can choose a course from the list of courses offered by the department for that elective.

Bapatla Engineering College

(Autonomous)

6

Department of Information Technology

- b) **Job Oriented Elective Courses:** There shall be three Job Oriented elective Courses in all programs from V to VII semester. For each elective course there shall be a choice such that the student can choose a course from the list of courses offered by the department for that elective.
 - c) **Open Elective Courses:** One Open Elective course in VII semester will be offered by various departments. A student can choose and register for an open elective course which is offered by other departments only and he / she has not studied the same course in any form during the Program.
 - d) **Massive Open Online Courses (MOOCs):** A Student must pursue and complete one course compulsorily through MOOCs from approved organizations for awarding the degree. A student can pursue MOOCs courses from Professional Elective / Job Oriented Elective / Open Elective Courses only. The student must inform and take prior permission / approval from the Internal Department Committee. The courses must be of a minimum of 8 weeks in duration and shall contain proctored examinations. The student must acquire a certificate for the concerned course from the agency to earn the credits for that course. For further details and guidelines, the students can visit the college website.
 - e) The Internal Department Committee comprising Head of Department and two senior faculty members shall evaluate the certificate / grades / marks awarded for a course by external agencies and convert the same to equivalent marks / grades.
10. **Induction Program:** There shall be a mandatory induction program for *three weeks* before the commencement of the first semester with no credits.
11. There shall be credit programs like NSS/NCC/Scouts & Guides/Community Service and Health & Wellness/Yoga/Sports. Also Design Thinking & Innovation and Tinkering lab are made compulsory credit courses for all branches.
12. **Make-up Test:**
- a) A student can appear for a Make-up Test for a maximum of two theory courses of a semester to improve marks in the Continuous Internal Evaluation (CIE).
 - b) A student is eligible for the Make-up test which is conducted after the second Mid Term examination and before SEE examination if the student satisfies the following conditions.
 - i) Unable to secure 50% internal marks (CIE) and has more than or equal to 65% attendance in a particular theory course (After finalizing the internal marks).
 - ii) Attendance in Remedial classes is more than or equal to 65% (if Remedial classes are conducted) or secured greater than 50% marks in the I Mid Term Examination and AAT-1 together.
 - iii) Attended 50% of CIE tests (at least one AAT & one Mid Term Examinations).
- The make-up test will be conducted for 40 marks (8 questions of 1 mark each, 2 questions of 16 marks each) in Mid Examination format covering the entire syllabus and the marks obtained in this test are final. However, the maximum marks awarded will be 20 only.
- The students must apply to the principal through the respective HOD by paying prescribed fees. The documents for registration of the Make-up test are available from the departments and college website.

Bapatla Engineering College

(Autonomous)

7

Department of Information Technology

13. **Course Repetition:** The students not qualified to write SEE in a course may register for the repeater courses through Course Repetition. The students must apply to the principal through the respective HOD by paying prescribed fees. A student can take up a maximum of two theory courses and one laboratory course in a semester immediately after the semester end examinations of that semester. The students who are not taking regular semester courses may additionally register for one more theory course. The documents for registration of course and monitoring the candidates registered for course repetition are available from the departments and college website.

14. Minimum Academic Requirements for Promotion:

a) **Semester Promotion** A student is eligible to register for SEE if he/she satisfies the following conditions. However, the student can appear only for the SEE of those courses in which the student is qualified (Q).

i) Attendance Requirements

- A student shall be eligible to register for SEE, if he / she acquires a minimum of 75% of attendance in aggregate of all the courses in a semester.
- Condonation of shortage of attendance in aggregate up to 10% (65% and above and below 75%) in each semester may be granted on genuine medical grounds with a doctor certificate and duly approved by the principal.
- A shortage of attendance below 65% in aggregate shall in NO case be condoned. Students whose shortage of attendance is not condoned in any semester are not eligible to take their SEE of that semester and will be considered as detained in that semester.
- If a student does not satisfy the attendance requirements of the present semester, he / she will not be promoted to the next semester (considered as detained in the present semester). They may seek readmission for that semester when offered next.
- A stipulated fee shall be payable towards condonation of shortage of attendance to the college.

ii) Qualification in CIE

- A student must qualify in a minimum of three courses in each semester (as per Clause 8.5) in CIE to register for the SEE of that semester.
- If a student does not satisfy the above conditions, he / she will not be promoted to the next semester (considered as detained in that semester). They may seek readmission for the detained semester when offered next.

b) **Promotion / Detention Conditions based on the minimum credits to be secured by the student:** A student shall be promoted from I to II, III to IV, V to VI and VII to VIII semesters if he / she fulfills the academic requirement as specified in 14.a). For other semesters i.e. II to III (1st year to 2nd year), IV to V (2nd year to 3rd year) and VI to VII (3rd year to 4th year) semesters, the following criteria is to be fulfilled in addition to 14.a clause.

- i) **II semester to III semester (1st year to 2nd year)** A student shall be promoted from II semester to III semester only if he / she fulfills the academic requirement of securing 25% of the credits in the courses that have been studied up to I Semester.
- ii) **IV semester to V semester (2nd year to 3rd year)** A student shall be promoted from IV semester to V semester only if he/she fulfills the academic requirement of securing 40% of the credits in the courses that have been studied up to III Semester.

Bapatla Engineering College

(Autonomous)

8

Department of Information Technology

- iii) **VI semester to VII semester (3rd year to 4th year)** A student shall be promoted from VI semester to VII semester only if he/she fulfills the academic requirements of securing 40% of the credits in the courses that have been studied up to V semester.

If a student is not promoted or detained for want of credits in a particular semester as per clause 14.b above, the student may secure the required credits through supplementary examinations and only after securing the required credits he / she shall be permitted to join in the III or V or VII Semester as the case may be.

- c) **With-holding of Results** If the candidate has any dues not paid to the college or case of indiscipline or malpractice is pending against him/her, the result of the candidate shall be withheld in such cases until the issue is resolved.

15. **Guidelines for offering a Minor in a discipline:** Minor in a discipline concept is introduced in the curriculum for all conventional B. Tech programs in which it offers a Major Program (B.Tech degree). The main objective of Minor in a discipline is to provide additional learning opportunities for academically motivated students and it is an optional added feature of the B. Tech. program.

- a Students who are desirous of pursuing their special interest areas other than the chosen discipline of Engineering may opt for additional courses in Minor specialization groups offered by a department other than their parent department.
- b The BOS concerned shall identify as many tracks as possible in the areas of emerging technologies and industrial relevance / demand. For example, the Minor tracks can be the fundamental courses in CSE, ECE, EEE, CE, ME etc or industry tracks such as Artificial Intelligence (AI), Machine Learning (ML), Data Science (DS), Robotics, Electric vehicles, VLSI etc.
- c The list of disciplines / branches eligible to opt for a particular industry relevant minor specialization shall be clearly mentioned by the respective BOS.
- d There shall be no limit on the number of programs offered under Minor. The Institution can offer Minor programs in emerging technologies based on expertise in the respective departments or can explore the possibility of collaborating with the relevant industries/agencies in offering the program.
- e The concerned BOS shall decide on the minimum enrolments for offering Minor program by the department. If a minimum enrolments criterion is not met, then the students may be permitted to register for the equivalent MOOC courses as approved by the concerned Head of the department in consultation with BOS.
- f A student shall be permitted to register for Minor program at the beginning of 4th semester provided that the student must have acquired a minimum of 7.0 CGPA up to the end of 3rd semester without any backlogs. A CGPA of 7.0 must be maintained in the subsequent semesters without any backlog to keep the Minor registration active.
- g A student must earn an additional 16 credits in the specified area to be eligible for the award of B. Tech degree with Minor. This is in addition to the credits essential for obtaining the Undergraduate degree in Major discipline (i.e. 160 credits for regular students and 121 credits for Lateral Entry students). The concerned BOS shall finalize the modalities to earn the above credits.

Bapatla Engineering College

(Autonomous)

9

Department of Information Technology

- h For securing the above additional 16 credits, the students must register and complete three courses of 4 credits each offered by the department concerned. These 3 courses must contain a laboratory component also (i.e. Embedded course having three lecture hours and two practical hours). The balance of 4 credits may be secured through two MOOCs courses of 2 credits each or an embedded course offered by the department.
- i Courses that are used to fulfil the student's primary Major may not be double counted towards the Minor. Courses with content substantially equivalent to courses in the student's primary Major may not be counted towards the Minor.
- j The student registered for Minor shall pass in all subjects that constitute the requirement for the Minor program. No class / division (i.e., second class, first class, distinction, etc.) shall be awarded for Minor degree programme
- k If a student drops (or terminated) from the Minor program, they cannot convert the earned credits into free or core electives; they will remain extra.
- l In case a student fails to meet the CGPA requirement for B.Tech degree as per clause 15.f or drops (or terminated) from the Minor program, he/she will be dropped from the list of students eligible for Minors degree and they will receive B.Tech degree only. However, such students will receive a separate grade sheet mentioning the additional courses completed by them.
- m The Minor will be mentioned in the Major degree certificate only. No additional degree certificate will be given for Minor degree.
- n Transfer of credits from Minor to regular B.Tech degree and vice-versa shall not be permitted
- o Minor must be completed simultaneously with a Major degree program. A student cannot earn the Minor degree after he / she has already earned bachelor's degree.
- p The documents for registration of Minor courses are available from the departments and college website.

16. Guidelines for offering an Honors in a Discipline: The objective of introducing B.Tech (Honors) is to facilitate the students to choose additional specialized courses of their choice and build their competence in a specialized area in the UG level. The programme is a best choice for academically excellent students having good academic record and interest towards higher studies and research. Honors is introduced in the curriculum of all B. Tech. programs offering a Major degree and is applicable to all B. Tech (Regular and Lateral Entry) students admitted in Engineering & Technology. Students are eligible to opt for Honors program offered by the same Department / Discipline.

- a. Students who are desirous of pursuing special interest / advanced areas of their discipline of Engineering may opt for additional courses as part of Honors programs offered by the parent department.
- b. The BOS concerned shall identify as many tracks as possible in the areas of emerging technologies and industrial relevance / demand.
- c. A student shall be permitted to register for Honors program at the beginning of 4th semester provided that the student must have acquired a minimum of 7.5 CGPA up to the end of 3rd semester without any backlogs. A CGPA of 7.5 must be maintained in the subsequent semesters without any backlog to keep the Honors registration active.

Bapatla Engineering College

(Autonomous)

10

Department of Information Technology

- d. A student must earn additional 16 credits for award of B.Tech. (Honors) degree from the same branch / department / discipline registered for Major degree. This is in addition to the credits essential for obtaining the Undergraduate degree in Major discipline (i.e., 160 credits for regular students and 121 credits for Lateral Entry students). The concerned BOS shall finalize the modalities to earn the above credits.
- e. For securing the above additional 16 credits, the students must register and complete three courses of 4 credits each offered by the department concerned. These 3 courses must contain a laboratory component also (i.e. Embedded course having three lecture hours and two practical hours). The balance of 4 credits may be secured through two MOOCs courses of 2 credits each or an embedded course offered by the department.
- f. Courses that are used to fulfil the student's primary Major may not be counted towards the Honors.
- g. The student registered for Honors shall pass in all subjects that constitute the requirement for the Honors program. No class / division (i.e., second class, first class and distinction, etc.) shall be awarded for Honors program.
- h. If a student drops or is terminated from the Honors program, the additional credits earned so far cannot be converted into open or core electives; they will remain extra.
- i. In case a student fails to meet the CGPA requirement for B.Tech degree as per clause 16.c or drops (or terminated) from the Honors program, he/she will be dropped from the list of students eligible for degree with Honors and they will receive B.Tech degree only. However, such students will receive a separate grade sheet mentioning the additional courses completed by them
- j. The Honors will be mentioned in the Major degree certificate only as Bachelor of Technology (Honors). No additional degree certificate will be given for Honors.
- k. Transfer of credits from Honors to regular B.Tech degree and vice-versa shall not be permitted.
- l. Honors is to be completed simultaneously with a Major degree. A student cannot earn the Honors after he / she has already earned bachelor's degree
- m. The documents for registration of Honors are available from the departments and college website.

17. Summer Internships:

- Students shall undergo two summer internships each for a minimum of four weeks duration at the end of second and third years of the program for 2 credits each. The organization in which the student wishes to carry out Internship needs to be approved by Internal Department Committee comprising Head of Department and two senior faculty members. The student shall submit a report along with an internship certificate from the organization. The evaluation of the first and second summer internships shall be conducted at the end of the V Semester & VII semester respectively.
- Completion of the internship is mandatory, if any student fails to complete internship, he/she will not be eligible for the award of degree. In such a case, the student shall repeat the internship in the subsequent summer. The student pursuing two summer internships in the same summer is not permitted.
- Community Service Project focusing on specific local issues shall be an alternative to the four weeks of summer Internship. The Community Service Project shall be for 4 weeks in duration

Bapatla Engineering College

(Autonomous)

11

Department of Information Technology

which includes preliminary survey for 1 week, community awareness programs for one week, community immersion program in consonance with Government agencies for 1 week and a community exit report (a detailed report) for 1 week.

18. A student shall register and put-up minimum attendance in all 160 credits and earn all the 160 credits. In the case of lateral entry students, the number of credits is 121.
19. Students who fail to earn 160 credits as indicated in the course structure within eight academic years from the year of their admission shall forfeit their seat in B.Tech. Program, and their admission shall be cancelled. However, for the students availing the Gap year facility, this period shall be extended by corresponding gap year duration availed. Lateral entry students who fail to earn 121 credits as indicated in the course structure within six academic years from the year of their admission shall forfeit their seat in B.Tech. Course and their admission shall be cancelled. However, for the students availing gap year facility, this period shall be extended by corresponding gap year duration availed.

20. Securing Credits and award of Grade Points: Grading

After each course is evaluated for 100 marks, the marks obtained in each course will be converted to a corresponding letter grade as given below, depending on the range in which the marks obtained by the student fall.

Structure of Grading of Academic Performance

Range in which the % of marks in the course fall	Grade	Grade Points Assigned
≥ 90	S (Superior)	10
80-89	A (Excellent)	9
70-79	B (Very Good)	8
60-69	C (Good)	7
50-59	D (Average)	6
40-49	E (Below Average)	5
< 40	F (Fail)	0
Absent	Ab (Absent)	0

A student obtaining Grade F shall be considered failed and will be required to reappear for that course when the next supplementary SEE is offered. Same is the case with a student who obtains 'Ab' in the SEE.

Since there are no credits for Mandatory/Audit courses, only 'Pass' or 'Fail' shall be mentioned for such courses.

21. Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA): (i) The Semester Grade Point Average (SGPA) in a particular semester is the ratio of sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student, i.e.,

$$SGPA = \frac{\sum_{i=1}^n C_i \times GP_i}{\sum_{i=1}^n C_i} \quad (1)$$

Bapatla Engineering College

(Autonomous)

12

Department of Information Technology

where, C_i is the number of credits of the i -th course and GP_i is the grade point scored by the student in the i -th course.

(ii) The Cumulative Grade Point Average (CGPA) will be computed in the same manner considering all the courses undergone by a student over all the semesters of a program, i.e.,

$$SGPA = \frac{\sum_{j=1}^m SGPA_j \times TC_j}{\sum_{j=1}^m TC_j} \quad (2)$$

where $SGPA_j$ is the $SGPA$ of the j -th semester and TC_j is the total number of credits in that semester.

(iii) Both $SGPA$ and $CGPA$ shall be truncated to 2 decimal points and reported in the transcripts.

(iii) While computing the $SGPA$, the courses in which the student is awarded Zero grade points will also be included. (iv) Grade Point: It is a numerical weightage allotted to each letter grade on a 10-point scale. (v) Letter Grade: It is an index of the performance of students in a said course. Grades are denoted by letters S, A, B, C, D, E and F.

22. **Award of Class:** After a student has satisfied the requirements prescribed for the completion of the program and is eligible for the award of B. Tech. degree, he / she shall be placed in one of the following four classes.

Class Awarded	CGPA Secured
First Class with Distinction	≥ 7.5
First Class	$\geq 6.5 < 7.5$
Second Class	$\geq 5.5 < 6.5$
Pass Class	$\geq 5.0 < 5.5$

23. **Gap Year:** Gap year concept for Student Entrepreneur shall be introduced and outstanding students who wish to pursue entrepreneurship / become entrepreneur are allowed to take a break of one year at any time after II year to pursue entrepreneurship program / to establish startups. This period may be extended to two years at the most and these two years would not be counted as the maximum time for graduation.

An evaluation committee shall be constituted by the College to evaluate the proposal submitted by the student and the committee shall decide whether to permit the student(s) to avail themselves of the Gap Year.

After rejoining the student can pursue the remaining period of study under transitory regulations (if the regulation changes).

24. **Transitory Regulations:**

- Discontinued or detained candidates (as per clause 14.b) are eligible for readmission as and when the semester is offered and after fulfillment of academic regulations. Candidates who have been

detained as per clause 14.a) are eligible for readmission into the unfinished semester from the date of commencement of class work with the same or equivalent subjects as and when subjects are offered.

- Candidates who were permitted with Gap Year shall be eligible for rejoining into the succeeding year of their B.Tech from the date of commencement of class work.
- The readmitted students must follow the regulations in which he/she is admitted and residual courses if any must be completed based on the equivalent courses for each semester specified by the BOS considering the previous and readmitted regulations.

25. Credit Transfer Policy: Adoption of MOOCs is mandatory, to enable blended model of teaching-learning as also envisaged in the NEP 2020. As per University Grants Commission (Credit Framework for Online Learning Courses through SWAYAM) Regulation, 2016, the Institution shall allow up to a maximum of 15 credits (5 courses, approximately 10% for the total credits of the program) through MOOCs platform.

- a. The Institution shall offer credit mobility for MOOCs and give the equivalent credit weightage to the students for the credits earned through online learning courses.
- b. Student registration for the MOOCs shall be only through the respective department of the institution, it is mandatory for the student to share necessary information and take prior approval from the department.
- c. Credit transfer policy will be applicable to the Professional Elective Courses, Job Oriented Elective Courses, Open Elective Courses & Management Courses only.
- d. The concerned department shall identify the courses permitted for credit transfer.
- e. The department shall notify the list of the online learning courses at the beginning of semester eligible for credit transfer.
- f. The department shall designate a faculty member as a Mentor for each course to guide the students from registration till completion of the course.
- g. The department shall ensure no overlap of MOOC exams with that of the university examination schedule. In case of delay in results, the Institution will re-issue the marks sheet for such students.
- h. Credits transfer will be considered only after successful completion of the course and submitting a certificate issued by the competent authority along with the percentage of marks and/or grades.
- i. The institution shall submit the following to the examination section:
 1. List of students who have passed MOOC courses in the current semester along with the certificate of completion.
 2. Undertaking form filled by the students for credit transfer.
- j. The Institution shall resolve any issues that may arise in the implementation of this policy from time to time and shall review its credit transfer policy in the light of periodic changes brought by UGC, SWAYAM, NPTEL and state government.

26. Academic Bank of Credits (ABC): The College has implemented Academic Bank of Credits (ABC) to promote flexibility in curriculum as per NEP 2020 to

- a. Provide option of mobility for learners across the universities of their choice.
- b. Provide option to gain the credits through MOOCs from approved digital platforms.

Bapatla Engineering College

(Autonomous)

14

Department of Information Technology

- c. Facilitate award of Certificate / Diploma / Degree (B.Sc) in line with the accumulated credits in ABC
- d. Execute Multiple Entry and Exit system with credit count and credit transfer.

27. **Exit Policy:** The students can choose to exit the four-year programme at the end of first / second / third year of study.

- a. **UG Certificate** (in Field of study / discipline) - Programme duration: First year (first two semesters) of the undergraduate programme, 39 credits followed by an additional exit 10-credit bridge course(s) lasting two months, including at least 6-credit job-specific internship / apprenticeship that would help the candidates acquire job-ready competencies required to enter the workforce.
- b. **UG Diploma** (in Field of study / discipline) - Programme duration: First two years (first four semesters) of the undergraduate programme, 80 credits followed by an additional exit 10-credit bridge course(s) lasting two months, including at least 6-credit job-specific internship / apprenticeship that would help the candidates acquire job-ready competencies required to enter the workforce.
- c. **Bachelor of Science** (in Field of study / discipline) i.e., B.Sc. Engineering in (Field of study / discipline)- Programme duration: First three years (first six semesters) of the undergraduate programme, 120 credits.

28. Student Transfers

Student transfers shall be as per the guidelines issued by the Government of Andhra Pradesh and the affiliated University from time to time.

29. Punishments for Malpractice cases – Guidelines:

- a) If any student caught under malpractice during the CIE examinations, the entire cycle of examinations will be cancelled and awarded zero marks for all the courses during that cycle. For example, if any student is caught while doing malpractice in an AAT, the AAT marks of all the courses in that cycle will be cancelled. Similar punishment will be considered for mid-term examinations also.
- b) For Semester End Examinations, the examinations committee may take the following guidelines into consideration while dealing with the suspected cases of malpractice reported by the invigilators / squad members etc. The punishment may be more severe or less severe depending on the merits of the individual cases.

SN	Nature of Malpractice / Improper conduct	Punishment
1	Possesses or keeps accessible in examination hall, any paper, note book, programmable calculators, Cellphones, pager, palm computers or any other form of material concerned with or related to the course of the examination (theory or practical) in which he is appearing but has not made use of (material shall include any marks on the body of the student which can be used as an aid in the course of the examination).	Expulsion from the examination hall and cancellation of the performance in that course only.
2	Uses objectionable, abusive or offensive language in the answer paper or in letters to the examiners or writes to the examiner requesting him to award pass marks.	Cancellation of the performance in that course.
3	Copying detected on the basis of internal evidence, such as, during valuation or during special scrutiny.	Cancellation of the performance in that course and all other courses the candidate has appeared including practical examinations and project work of that semester/year examinations.
4	Gives assistance or guidance or receives it from any other student orally or by any other body language methods or communicates through cell phones with any other student or persons in or outside the exam hall in respect of any matter.	Expulsion from the examination hall and cancellation of the performance in that course only of all the students involved. In case of an outsider, he will be handed over to the police and a case shall be registered against him.

SN	Nature of Malpractice / Improper conduct	Punishment
13	If any malpractice is detected which is not covered in the above S.No 1 to S.No 12 items, it shall be reported to the college academic council for further action and award suitable punishment.	
14	Malpractice cases identified during sessional examinations will be reported to the examination committee nominated by Academic council to award suitable punishment.	

30. Additional Academic Regulations:

- Any attempt to impress upon the teachers, examiners, faculty and staff of Examinations, bribing for either marks or attendance will be treated as malpractice.
- When a component of Continuous Internal Evaluation (CIE) or Semester End Examination (SEE) is cancelled as a penalty, he/she is awarded zero marks in that component.

31. **Amendments to Regulations:** The Academic Council of Bapatla Engineering College (Autonomous) reserves the right to revise, amend, change or nullify the Regulations, Schemes of Examinations and / or Syllabi, Academic schedules, Examination schedules, Examination pattern, Moderation to students, Special opportunity to complete degree beyond stipulated time and any other matter pertained that meets to the needs of the students, society and industry without any notice and the decision is final.

Discipline and Code of Conduct for Students

The following are some of the important rules of discipline. All students are required to be aware of and act consistently with these values.

1. Students must punctually attend all lectures, practical's, tutorials, assignments, tests, examinations, etc. A student whose attendance and/or progress in the various tests and examinations are not satisfactory and who does not perform the required number of assignments, tutorials and/or practical's are likely to lose their terms. Prolonged absence even on ground of ill health may also lead to loss of terms. Defaulters will not be sent up for Final /University Examinations.
2. The identity card is meant for identifying bonafide students and is used for permitting the students to participate in various activities and programs of the college. Every student must wear Identity card as long as he/she is in the college campus. It must be produced by the student whenever demanded by the member of the teaching or non-teaching staff of the college. Every student must wear his/her Identity card in the college every day. He/She must take proper care of it to avoid its misuse by other students and outsiders. In case the Identity card is lost, the matter should be immediately reported to the Principal and an application should be made for a duplicate Identity card, which will be issued on payment of charges.
3. The conduct of the students in the classes and in the premises of the college shall be such as will cause no disturbance to teachers, fellow students or other classes.
4. Every student shall wear a clean formal dress while coming to the college also when representing the college for various activities out station. No Society or Association shall be formed in the College and no person should be invited in the college campus without the specific permission of the Principal.
5. No student is allowed to display any Notice/Circular/Poster/Banner in the College premises without the prior permission of the Principal.
6. Using foul language in the college campus is prohibited. If any student is caught using foul language, disciplinary action shall be initiated against the student.
7. Use of BEC name tag or logo by the students for their caste, political, religious, personal reasons is prohibited. Further placing banners on caste, political, religious, personal reasons, promoting cinema heroes & political leaders, taking possessions and burning fire crackers in front of the college is strictly prohibited. If any student is involved in such activities in and around the campus, severe disciplinary action will be taken including rustication from the college and filing a criminal case.
8. Outsiders are not permitted in the college premises without the prior permission of the Principal. College students are not allowed to bring their relatives/friends to the college premises without the permission of the principal.
9. All meetings, cultural programs, debates, elocutions etc. organized on the college premises must be held in presence of teaching staff members and with the prior permission of the Principal. The subjects of debates/elocutions must have the prior approval of the principal.
10. Conducting fresher's meet, farewell meets etc. by the students outside the campus are prohibited. If any student is involved in such activities (organizing as well as participating), severe disciplinary action will be taken including rustication from the college.

Bapatla Engineering College

(Autonomous)

20

Department of Information Technology

11. Students must take proper care of the college property. Strict action will be taken against students damaging College property and will be required to compensate the damage.
12. Students should not be involved in academic offences including cheating or plagiarism in academic course work malpractices at the College/Board/University Examinations
13. Smoking is strictly prohibited in the college premises.
14. If, for any reason, the continuance of a student in the College is found detrimental to the best interest of the college, the Management may ask the student to leave the college without assigning any reasons and the decision will be final and binding on the student.
15. Playing music on Transistors, Tape-Recorders, Car Stereos, Mobile phones or any other similar gadgets with or without earphones is strictly prohibited in the college premises. Defaulters will be punished and their instrument shall be confiscated.
16. Use of Mobile phones is strictly prohibited in the academic area of the college, Defaulters will be penalized and their instrument confiscated.
17. Students who are travelling to college on personal vehicles (2/4 wheelers) need to have valid driving license issued by RTO and follow all the rules listed by RTO. Students have to park the vehicle in the parking area of the college.
18. Students must not hang around in the college premises while the classes are at work.
19. Students must not attend classes other than their own without the permission of the authority concerned.
20. Students shall do nothing inside or outside the college that will interface with the discipline of the college or tarnish the image of the college.
21. Students are not allowed to communicate any information about college matters to Press.
22. Matters not covered above will be decided at the discretion of the Principal. Acts of misbehavior, misconduct, indiscipline or violation of the Rules of Discipline mentioned above liable for one more punishment as stated below:
 - a) Warning to the students.
 - b) Warning to the student as well as inform the parents.
 - c) Imposition of a fine.
 - d) Denial of gymkhana, library, laboratory, N.C.C., N.S.S. student aid or any other facility for a specified period or for the whole Term/Year.
 - e) Expulsion from College for a specified period
 - f) Cancellation of Terms.
 - g) Refusal of admission in the term or academic year.
 - h) Cancellation of admission.
 - i) Rustication.

Anti Ragging Rules and Regulations

(As per AICTE norms)

1. **What constitutes Ragging:** Ragging constitutes one or more of any of the following acts:
 - a) any conduct by any student or students whether by words spoken or written or by an act which has the effect of teasing, treating or handling with rudeness a fresher or any other student;
 - b) indulging in rowdy or undisciplined activities by any student or students which causes or is likely to cause annoyance, hardship, physical or psychological harm or to raise fear or apprehension thereof in any fresher or any other student;
 - c) asking any student to do any act which such student will not in the ordinary course do and which has the effect of causing or generating a sense of shame, or torment or embarrassment so as to adversely affect the physique or psyche of such fresher or any other student;
 - d) any act by a senior student that prevents, disrupts or disturbs the regular academic activity of any other student or a fresher;
 - e) exploiting the services of a fresher or any other student for completing the academic tasks assigned to an individual or a group of students.
 - f) any act of financial extortion or forceful expenditure burden put on a fresher or any other student by students;
 - g) any act of physical abuse including all variants of it: sexual abuse, homosexual assaults, stripping, forcing obscene and lewd acts, gestures, causing bodily harm or any other danger to health or person;
 - h) any act or abuse by spoken words, emails, posts, public insults which would also include deriving perverted pleasure, vicarious or sadistic thrill from actively or passively participating in the discomfiture to fresher or any other student;
 - i) any act that affects the mental health and self-confidence of a fresher or any other student with or without an intent to derive a sadistic pleasure or showing off power, authority or superiority by a student over any fresher or any other student.
2. **Actions to be taken against students for indulging and abetting ragging in technical institutions Universities including Deemed to be University imparting technical education:**
 - a) The punishment to be meted out to the persons indulged in ragging has to be exemplary and justifiably harsh to act as a deterrent against recurrence of such incidents.
 - b) Every single incident of ragging a First Information Report (FIR) must be filed without exception by the institutional authorities with the local police authorities.
 - c) The Anti-Ragging Committee of the institution shall take an appropriate decision, with regard to punishment or otherwise, depending on the facts of each incident of ragging and nature and gravity of the incident of ragging.
 - d) Depending upon the nature and gravity of the offence as established the possible punishments for those found guilty of ragging at the institution level shall be any one or any combination of the following:
 - i. Cancellation of admission
 - ii. Suspension from attending classes
 - iii. Withholding/withdrawing scholarship/fellowship and other benefits
 - iv. Debarring from appearing in any test/examination or other evaluation process

Bapatla Engineering College

(Autonomous)

22

Department of Information Technology

- v. Withholding results
- vi. Debarring from representing the institution in any regional, national or international meet, tournament, youth festival, etc.
- vii. Suspension/expulsion from the hostel
- viii. Rustication from the institution for period ranging from 1 to 4 semesters
- ix. Expulsion from the institution and consequent debarring from admission to any other institution.
- x. Collective punishment: when the persons committing or abetting the crime of ragging are not identified, the institution shall resort to collective punishment as a deterrent to ensure community pressure on the potential raggers.

Guidelines for Remedial Classes and Make-up Test (R24 Regulations)

- a) Faculty need to identify the underperforming students in their respective subject. An underperforming student is one, whose marks are less than 50% in the I Mid Term Examination and AAT 1 together. A list of such students should be prepared by the faculty soon after the I Mid Term examination is over and get it signed by the concerned HOD.
- b) Faculty should conduct remedial classes for the underperforming students with an objective of improving their marks in the CIE. Minimum number of remedial classes to be taken should be 20% of the classes taken prior the I Mid Term Examination which is 6 classes. Teaching methodology is left to the faculty member, but he/she should keep the objective in mind.
- c) Regular students who could not appear for the I Mid Term Examination and AAT (with genuine reason) should appear to the remedial classes with the prior permission of the HOD.
- d) The entire process of conduct of remedial classes should be well documented and is subjected to academic audit.

The guidelines for conducting the Make-up test: (Refer to S.No:12 in academic rules and regulations)

Application for Make-up Test

Date:

- 1 Name of the Candidate :
- 2 Register Number :
- 3 Academic Year :
- 4 Branch :
- 5 Year & Semester of Study :
- 6 Student Mobile No. :

Course Code Title	% of attendance	CIE Marks				(To be filled by the concerned subject faculty)	
		AAT-1	MID-1	AAT-2	MID-2	% of attendance in remedial classes*	Signature

* Write 'NA' if the student's name is not in the remedial class list.

Signature of the Student

Signature of the
Head of the Department

Fee Particulars:

The make-up test fee has to be paid through HDFC payment gateway and a printout of the receipt has to be taken. The student has to submit the office copy of the receipt in the COE office, get the signature and has to submit the signed application form along with student copy of the receipt in the department.

Amount paid in Rs	Date of payment	Signature of Exam Section Clerk
-------------------	-----------------	---------------------------------

Note:

1. As per the "Make-up test guidelines", the eligible students have to fill this form, with the signature of the concerned subject faculty and the HOD.
2. After making the payment, the filled form along with a photocopy of the payment receipt has to be submitted in the department.
3. The make-up test will be scheduled and conducted by the department.

Guidelines for Internships

- As per R24 guidelines, every student has to undergo internship twice, once between IV and V semester, the other between VI and VII Semester. The first internship is for a duration of 4 to 6 weeks.
- There shall be a departmental internship committee consisting of the Head of the Department and two faculty members nominated by the HOD. The committee shall identify the potential organizations which can provide internship opportunity to the students. The department shall enter into an MOU with the concerned organization and the details will be shared with the students.
- The students shall be informed to apply for undergoing internship in the specified proforma. The details and consent of the organization in which he/she is seeking for internship are to be furnished. Further, the student along with the parent must submit an undertaking form. The committee shall scrutinize the applications and approve the same. If a student fails to acquire internship, he/she may be permitted to undergo equivalent work (mini project, research project, fabrication work, field work, research paper, etc.,) in the department under the guidance of a faculty member.
- After the completion of the internship, the student must submit the report and attend a departmental internal assessment for award of grade and credits.

Guidelines for Massive Open Online Courses (MOOCs)

1. Head of the department should constitute a three member MOOC committee under his chairmanship along with two more members.
2. The committee should take the responsibility of
 - a) Notifying the MOOC courses twice in a semester (May and November) along with the details of portals offering the MOOC such as NPTEL/SWAYAM.
 - b) Checking the relevance of courses to the concerned branch.
 - c) Verifying the syllabus of chosen MOOC course and to ensure that it is not studied in the regular curriculum (either full or partial)
3. A student willing to take MOOCs course should apply in the prescribed format to the concerned Head of the Department at least one week prior to the commencement of the MOOC course.
4. The MOOC committee should ensure the following
 - The course duration must be minimum of 8 weeks
 - The course should contain a proctored examination for evaluation
 - The agency offering MOOCs should be a recognized and reputed one and approved by the BOS of the concerned program.
5. Students should submit the Course completion certificate with marks memos to the department MOOCs committee.
6. If the certifying authority/agency is not able to conduct the exam, then the student can show certified course progress, applied hall ticket and mail communication from the authority as proofs and can avail the extension time by one semester for submitting the course completion certificate.
7. After the student submits the MOOCs certificates, the committee should recommend 3 credits and the appropriate grade to be allocated to the student and send to the Controller of Examination.
8. If a student fails to successfully complete and acquire the certificate as per the guidelines and timelines specified by the concerned MOOCs authority, he/she has to register for that course subsequently. Unsuccessful candidates in the first attempt shall be marked as supplementary.

Guidelines for Project work

1. In R24 regulations, there is no theory or practical courses in VIII semester. An exclusive 12 credit course is included as Project Work and Internship. At the end of the semester the student should submit a project report. A student shall also be permitted to submit project report on the work carried out during the internship in case of Advance Placement.
2. The Head of the department should constitute a three-member Project Work Committee (PWC) under his chairmanship with three faculty members as defined in the Process Document for project work (R20 regulation). The PWC shall adhere to the process explained in the said document.
3. Evaluation of the Project work: (Refer 8.4 and 8.6(c)) in academic rules and regulations)
4. The project work committee should ensure the following, if the students are doing project work at any organization/ industry.
 - i) The student gets placement before commencement of eighth semester and joined the organization/Industry as advance placement. The student who obtained project work opportunity in organization / Industry may also be allowed as per the recommendation of the PWC.
 - ii) The above students will be informed to apply in the specified proforma for approval to undergo for project work along with the details and consent of the organization in which he/she is seeking for doing project work. Further, the student and the parent/guardian have to submit an undertaking form to the concerned department. The PWC shall scrutinize the applications and approve.
 - iii) The list of such approved students undertaking project work in organization/ industry shall be maintained in the department by the PWC.
 - iv) The students who are undertaking the project work outside the campus have to necessarily submit the monthly attendance duly certified by the concerned authority in the organization/ industry.
 - v) The PWC will have to maintain interaction regularly with the out-side organization/ concerned who are offering the project works.
 - vi) During the course of project work, the student has to attend the departmental internal reviews/assessment periodically as notified by the department mandatory. After the completion of the project work, the student has to submit the report and attend semester end assessment examination by paying prescribed exam fee for award of grade and credits.
 - vii) The students who are undertaking the project work outside the campus will have to complete their project work with in the stipulated period (as per Academic Calander) along with the in-house project work students.

Name of the Student	
Registered No.	
Email id	
Mobile Number	
Academic Year and Semester	

Project Work Details:

Organization/Industry Name	
Duration in weeks	
Start date of project work	
End date of project work	
Probable date of project work completion certificate submission	

Note:

1. The consent letter from the organization/industry is to be enclosed.
2. Undertaking form from the student and parent.

Signature of the Student

Recommendations of the
Project Work Committee (PWC)

Signature of the
Project Coordinator

Signature of the
Head of the Department

Process document for Project work

As per the R24 regulations, students are required to do a project work in the VIII semester and submit a report. The following is the process to be followed for the project work.

A. Project batches and Guide allocation

- The Head of the department should constitute a three-member Project Work Committee (PWC) under his chairmanship with three faculty members. One of them shall be a senior faculty member and acts as a Project Coordinator.
- List of faculty members and their specializations, research areas will be communicated to the students. The information is disseminated via email, notice boards and display on the website. List of projects and their titles/themes should be identified and same may be communicated to all the students. Project batches are formed based on the performance of the students up to VI semester.
- Students are given an option of specifying their choices for the project titles/guides and the final allocation of guides to project batches is done based on the merit order and the choices opted by the project batches.
- It is to be ensured that no project batch should have more than 4 students.
- Not more than two batches should be allocated to each project guide.

B. Project classification and mapping with program outcomes and program specific outcomes.

Projects may be broadly classified into the following categories.

- Application oriented: When the project is related to hardware, then all the components are procured and assembled to get the desired outcome. If it is related to software, then a complete working version of the application is to be created.
- Research oriented: In this category extensive review of literature is done. This aims to learn and implement new methods or procedures and validate results.
- Simulation projects: These projects may be hardware or software related. The students will create a working prototype for the same.
 - The PWC should ensure that the projects are selected in such a way that the program outcomes and program specific outcomes are mapped with the themes of the project works.
 - A document consisting of project titles, area of specialization, project guides should be prepared and submitted to the concerned HOD and should be put on the website. The theme of the work may be changed with the consent of the project guide.

C. Continuous monitoring mechanism and evaluation

- Project slots (24 hours per week) should be allocated as per the existing scheme and curriculum.
- A laboratory or a class room should be identified for executing the project works. It is preferred to have a separate laboratory for the purpose of conducting the project works.
- Each project batch is allowed to consult their respective guide to discuss about their Progress during the project slot.
- At the end of every month there will be an overall assessment of each project by the PWC by scheduling project reviews in association with project guides.

- The performance of the students should be evaluated in each review and should be documented.
- Department staff meeting should be conducted to discuss the performance of the students in the projects and should be documented.

D. Methodology to assess individual as well as collective Contribution/understanding of Project:

- The project guide should monitor the presence (attendance) of each student in the project work
- The project guide should ensure that the batch allocated to him is able to understand the objectives of the project. The guide should also identify the requirements (hardware and software) of the project. If a particular software or hardware is not available, same may be communicated to the HOD and may be procured based on the financial and budgetary requirements.
- Evaluation of the project is based on
 1. Understanding the objectives of the project.
 2. Day to day work done by the students (Should be documented)
 3. Partial/Full completion of the project
 4. Students' presentation and demonstration
 5. Results and documentation
- Evaluation is intimated to the students for further improvement

E. Papers published/Awards won/conferences attended

- It is encouraged for every project batch to publish/communicate a paper in any national/international conference/journal. The project guide may encourage the students so that the work of their batch is published as a research paper.
- Students must be given some awareness/training program for effective writing of a research paper. The research papers should be checked with anti-plagiarism software before the submission to the concerned journal or conference.
- A report should be prepared by the concerned coordinator comprising all the research papers published and should be made available in the library and soft copies must be put on the website for availability to the students.

Linear Algebra and Ordinary Differential Equations B.Tech – I Semester (24IT101)

Lectures	:	2 Hours / Week	Tutorial	:	1	Practical	:	0
CIE Marks	:	40	SEE Marks	:	60	Credits	:	3

Prerequisites:

None

Course Objectives:

The course aims to enable the students

- Solve a system of linear homogeneous and non-homogeneous equations, finding the inverse of a given square matrix and also its Eigen values and Eigen vectors
- Identify the type of a given differential equation and select and apply the appropriate Analytical technique for finding the solution of first order ordinary differential equations.
- Create and analyze mathematical models using higher order differential equations to solve application problems that arise in engineering.
- Verify mean value theorems and expand functions of a single variable using Taylor's and Maclaurin's series.

Course Outcomes:

After the successful completion of the course, the students will be able to

CO1: Find the eigen values and eigen vectors of a given matrix and its inverse.

CO2: Apply the appropriate analytical technique to find the solution of a first order ordinary differential equation.

CO3: Solve higher order linear differential equations with constant coefficients arise in engineering applications.

CO4: Learn the applications of mean value theorems and Taylor's theorem.

UNIT - I

(11 Hours)

Linear Algebra: Rank of a Matrix; Elementary transformations of a matrix; Gauss-Jordan method of finding the inverse; Normal form of a matrix, Consistency of linear System of equations: Rouche's theorem, System of linear Non-homogeneous equations, System of linear homogeneous equations; vectors; Eigen values; properties of Eigen values(without proofs); Cayley-Hamilton theorem (without proof).

(Sections: 2.7.1; 2.7.2; 2.7.6; 2.7.7; 2.10.1; 2.10.2; 2.10.3; 2.12; 2.13; 2.14; 2.15.)

UNIT - II

(12 Hours)

Differential Equations of first order: Definitions; Formation of a Differential equation; Solution of a Differential equation; Equations of the first order and first degree; variables separable; Linear Equations; Bernoulli's equation; Exact Differential equations; Equations reducible to Exact equations: I.F found by inspection, I.F of a Homogeneous equation, In the equation $Mdx + Ndy = 0$, $\frac{\frac{\partial M}{\partial y} - \frac{\partial N}{\partial x}}{N}$ is a function of x and $\frac{\frac{\partial N}{\partial x} - \frac{\partial M}{\partial y}}{M}$ is a function of y.

Applications of a first order Differential equations: Newton's law of cooling; Rate of decay of Radioactive materials.

(Sections: 11.1; 11.3; 11.4.1; 11.5; 11.6; 11.9; 11.10; 11.11; 11.12.1; 11.12.2; 11.12.4; 12.6; 12.8)

UNIT - III

(12 Hours)

Linear Differential Equations: Definitions; Theorem; Operator D; Rules for finding the complementary function; Inverse operator; Rules for finding the Particular Integral; Working procedure to solve the equation; Method of Variation of Parameters; Applications of Linear Differential Equations: Introduction, Oscillatory Electrical Circuits.

(Sections: 13.1; 13.2; 13.3; 13.4; 13.5; 13.6; 13.7; 13.8.1; 14.1; 14.5)

UNIT - IV

(11 Hours)

Differential Calculus:

Mean Value Theorems: Rolle's theorem, Lagrange's mean value theorem with their geometrical interpretation. Cauchy's mean value theorem. Taylor's and Maclaurin theorems with remainders (without proof), Maclaurin's series, Expansion by use of known series, Taylor's series.

(4.3.1; 4.3.2; 4.3.3; 4.3.4; 4.4.1; 4.4.2; 4.4.3)

Semiconductor Physics and Nano Material

(Common to CS,CM,CB,DS,EC & IT)

B.Tech – I Semester (24IT102)

Lectures	:	3 Hours / Week	Tutorial	:	0	Practical	:	0
CIE Marks	:	40	SEE Marks	:	60	Credits	:	3

Prerequisites:

None

Course Objectives:

The course aims to enable the students

- to understand the concept of quantum mechanics and its importance to solve and evaluate the properties of materials (conductors and semiconductors).
- to understand the properties of semiconductor materials and their importance in various device fabrications.
- to gain knowledge on various opto-electronic devices and their applications.
- to understand the principles of processing, manufacturing and characterization of nano materials, nano structures and their applications.

Course Outcomes:

After the successful completion of the course, the students will be able to

CO1: Describe the concepts of quantum mechanics and its applications to explain material properties.

CO2: Describe the concept of Fermi level and various semi conductor junctions.

CO3: Explain the working principles of various opto-electronic devices and their applications.

CO4: Describe the importance of nano-materials and their characteristic properties.

CO	Program Outcomes(POs)												PSOs		
	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3
CO1	3	3	-	-	-	-	-	-	-	-	-	2	-	-	-
CO2	3	3	2	-	-	-	-	-	-	-	-	2	-	-	-
CO3	3	3	2	-	-	-	-	-	-	-	-	2	-	-	-
CO4	3	3	3	-	-	-	-	-	-	-	-	2	-	-	-

Bapatla Engineering College

(Autonomous)

49

Department of Information Technology

UNIT - I

(11 Hours)

Quantum Mechanics and Applications: Schrodinger time independent wave equation, Applications: Particle in one dimensional box, Quantum Tunneling, Scanning Tunneling Microscope.

Somerfield free electron theory: Conductivity of metals and concept of Fermi level, Failure of quantum free electron theory (Qualitative), Band theory of solids (Kronig –Penny model), E-K diagrams, Effective mass, Concept of hole.

Types of Electronic materials: Metals, Semi conductors and Insulators.

UNIT - II

(12 Hours)

Semiconductors and Properties: Introduction to semi conductors, intrinsic and extrinsic semiconductors, Direct and Indirect band gap semiconductors. Density of states, Carrier concentration equations, Fermi level and temperature dependence, Drift and Diffusion currents, Continuity equation, P-N junction diode (V-I characteristics).

UNIT - III

(12 Hours)

Opto-Electronic Devices and Display Devices: Principle and working of LED, Semiconducting laser (Laser diode), Photo detectors: Photo diode, PIN & APD Diode, Applications of Photo detectors, Photo voltaic effect, Solar cell, Efficiency of solar cell and applications, Types of liquid crystals, Liquid crystal display(LCD), Opto electric effect(Kerr effect), Magneto optic effect (Faraday Effect).

UNIT - IV

(11 Hours)

Nano Materials: Introduction to nano technology, Quantum confinement, Surface to volume ratio, Properties of nano materials, Synthesis of nano-materials: CVD, Sol-gel methods, Laser ablation.

Carbon Nano Tubes: Types, Properties, Applications. Characterization of Nano materials: XRD, SEM, Applications of Nano materials.

Lectures	:	3 Hours / Week	Tutorial	:	0	Practical	:	0
CIE Marks	:	40	SEE Marks	:	60	Credits	:	3

Prerequisites:

None

Course Objectives:

The course aims to enable the students

- Develop a comprehensive understanding of basic electrical circuit principles, including the analysis of DC and AC circuits using laws and theorems
- Analyze the construction, working principles, and applications of various electrical machines like DC machines, transformers, and AC machines.
- Comprehend the fundamental properties and applications of semiconductor materials and devices, focusing on diodes and their practical uses.
- Acquire proficiency in the operation and applications of transistors and operational amplifiers in electronic circuits, including their use in amplification and switching.

Course Outcomes:

After the successful completion of the course, the students will be able to

CO1: Solve and analyze basic DC and AC electrical circuits using fundamental laws and theorems.

CO2: Explain the construction, operation, and applications of different types of electrical machines.

CO3: Acquire an understanding of semiconductor materials and devices and their practical applications in electronic circuits.

CO4: Illustrate and analyze basic electronic circuits involving transistors (BJTs and MOSFETs) and operational amplifiers.

CO	Program Outcomes(POs)												PSOs		
	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3

CO3	3	3	2	1	-	-	-	-	-	-	-	2	-	-	-
CO4	3	3	3	1	-	-	-	-	-	-	-	2	-	-	-

Bapatla Engineering College

(Autonomous)

51

Department of Information Technology

UNIT - I

(11 Hours)

Basic Definitions: Electric charge, Current, Voltage, Power, and Energy, Ohm's Law

DC Circuits: Series and Parallel Circuits their Characteristics and analysis, Kirchhoff's Voltage Law (KVL) and Kirchhoff's Current Law (KCL), Simple problems on circuit analysis. Thevenin's, Norton's and Superposition theorem.

AC Fundamentals: Alternating Current (AC) and Voltage, Peak, RMS, and Average values of AC, form and peak factors, Phasors and phase relationships in AC circuits. AC excitation to R, L, C and their combination (series and parallel), Impedance and Power triangle.

3-Phase Circuits: Star and Delta connections, relation between line and phase values of currents and voltages with derivations.

UNIT - II

(12 Hours)

DC Machines: Construction and working of DC generator and its emf equation. Types of DC generators. Open circuit characteristic of DC shunt generator. Construction and working of DC motor and its torque equation, load test on DC shunt motor. Applications of DC machines.

Transformers (AC non-rotating): Construction and working of Transformer, Types of transformers, Transformer emf equation, losses and efficiency, Regulation, load test on transformer, Applications.

AC Machines (AC rotating):

Induction Motors: Construction and working of single-phase induction motor. Capacitors start single phase induction motor.

Synchronous Machines: Construction and working of Alternator, Construction and working of Synchronous motor and their applications.

UNIT - III

(12 Hours)

Diodes and Applications: Difference between Conductors, Insulators, and Semiconductors-Intrinsic and Extrinsic Semiconductors-N-type and P-type semiconductors.

PN Junction Diode: Construction, working, and VI characteristics.

Zener Diode: Construction, working, and VI characteristics, Its application as voltage regulator.

Rectifiers: Half-wave and Full-wave rectifiers, working principles, and efficiency

UNIT - IV

(11 Hours)

Transistors:

Bipolar Junction Transistor (BJT): Construction, operation, and characteristics in Common Emitter, Common Base, and Common Collector configurations. MOSFET Construction, working principle, characteristics, and applications as amplifier and as switch.

Operational Amplifiers (Op-Amps): Characteristics and parameters, Inverting and Non-inverting Amplifiers, Summing amplifier, Difference amplifier, Integrator, Differentiator with their Circuit diagrams, formulas, and applications.

Introduction to Programming B.Tech – I Semester (24IT104)

Lectures	:	3 Hours / Week	Tutorial	:	0	Practical	:	0
CIE Marks	:	40	SEE Marks	:	60	Credits	:	3

Prerequisites:

None

Course Objectives:

The course aims to enable the students

- Understand basic concepts of C Programming such as: C-tokens, Operators, Input/output, and Arithmetic rules.
- Develop problem-solving skills to translate 'English' described problems into programs written using C language.
- Use conditional branching, looping and Arrays.
- Understand the concepts of functions and recursion in C.

Course Outcomes:

After the successful completion of the course, the students will be able to

CO1: Choose the right data representation formats based on the requirements of the problem and solve the mathematical problems using operators.

CO2: Solve problems which contain multiple decisions using else...if.

CO3: Work with lists and matrices using arrays.

CO4: Solve real time complex problems by decomposition using user defined functions.

CO	Program Outcomes(POs)												PSOs	
	1	2	3	4	5	6	7	8	9	10	11	1	2	3

54

Department of Information Technology

UNIT - I

(11 Hours)

Introduction: Computers, Classification of Computers, Software Life Cycle, Algorithms, Flowcharts, Structured Programming, Compilers, Linker, Preprocessor, Standard Input and Output Devices, Popular Features of C.

Variables and Expressions: Introduction, Character Set, Identifiers and Keywords, Variables, Displaying Variables, Reading Variables, Characters and Character Strings, Qualifiers, typedef Statement, Promotion and Typecasting, Value-initialized Variables, Constants, 'const' Qualifier, Operators and Expressions, Operator Precedence and Associativity, Programming Examples.

UNIT - II

(12 Hours)

Basic Input-Output: Introduction, Single Character Input-Output, String Input and Output, General Output, General Input, Types of Characters in Format Strings, scanf Width Specifier, Search Sets, Assignment Suppression Character, Format Specifiers for scanf, Input Fields for scanf, When scanf Stops Scanning, Programming Examples.

Control Structures: Introduction, if Statement, if-else Statement, Multi-way Decisions, Compound Statements, Loops - for Loop, while Loop, do-while Loop, break Statement, switch Statement, continue Statement, goto Statement, Programming Examples.

UNIT - III

(12 Hours)

Arrays and Strings: Introduction, How Arrays are Useful? Multidimensional Arrays, Strings, Arrays of Strings, Functions in string.h, Programming Examples.

Scope and Extent: Introduction, Scope, Extent.

UNIT - IV

(11 Hours)

Functions: Introduction, Function main, Where are Functions Useful? Functions Accepting More than One Parameter, User Defined and Library Functions, Concepts Associated with Functions (Review), Function Parameters, Return Values, Recursion, Comparison of Iteration and Recursion, Variable Length Argument Lists, Programming Examples.

Lectures	:	1 Hours / Week	Tutorial	:	0	Practical	:	2
CIE Marks	:	40	SEE Marks	:	60	Credits	:	2

Prerequisites:

None

Course Objectives:

The course aims to enable the students

- Verify the laws of force system and determination of C.G for different geometrical laminas.
- Determine the coefficient of static friction and angle of repose for rough surfaces.
- Determine the axial forces in the members of truss.
- Understand the rotational dynamics and the principles governing the motion of rigid bodies.
- Provides the knowledge on the fundamental skills and techniques required for various surveying methods in Civil Engineering.

Course Outcomes:

After the successful completion of the course, the students will be able to

- CO1:** Examine the Law of Parallelogram of forces and Law of Moment using force polygon, also determines the C.G for laminas
- CO2:** Determine the coefficient of static friction between a block and a rough surface under and angle of inclination at which a block impending its motion.
- CO3:** Determine the axial forces in truss members using the method of joints.
- CO4:** Determines the angular acceleration of a rolling disc on an inclined plane. And moment of inertia of a flywheel.
- CO5:** Determine the area of a plot, elevation difference between two points and horizontal and vertical angles a chain level and theodolite respectively.

CO5	3	3	-	2	-	-	-	-	-	1	-	2	-	-	-

UNIT - I

(2 Hours)

Force System: Force – characteristics of force – system of forces – moment of a force - laws of forces – supports and their reactions, Centroid – determination of centroid for plane figures.

List of Experiments

1. Determination of the magnitude of the resultant force using
 - Parallelogram law
 - Triangle law
 - Polygon law
2. Determine the magnitude of the resultant force using Varignon's principle.
3. Determination of the support reactions for a beam subjected to transverse loads.
4. Determination of the geometric center of different lamina.

UNIT - II

(2 Hours)

Friction: Laws of friction – coefficient of friction – angle of repose.

List of Experiments

1. Determination of the coefficient of static friction between the block and rough surface when the block is subjected to horizontal force.
2. Determination of the angle of inclination at which a block just starts to slide down an inclined plane.

UNIT - III

(2 Hours)

Truss: Method of analysis.

List of Experiments

1. Determination of the axial forces in the truss members.

UNIT - IV

(3 Hours)

Mass Moment of Inertia & Rotation of a Rigid Body about a fixed Axis: Area moment of inertia – mass moment of inertia – Relation between mass and area moment of inertia, Kinematics of rotation – Equation of motion for a rigid body rotating about a fixed axis – D'Alembert's principle.

List of Experiments

Bapatla Engineering College

(Autonomous)

57

Department of Information Technology

1. Verification of angular acceleration of a rolling disc on an inclined plane.
2. Determination of the moment of inertia of flywheel.

Surveying

(5 Hours)

Surveying – principles of surveying – chain surveying – theodolite surveying – leveling.

List of Experiments

1. Determination of the area of a plot using cross - staff survey.
2. Determination of the elevation difference between two points using leveling and height of ceiling of a building.
3. Determination of the horizontal distance between inaccessible points using theodolite.
4. Determination of the height of an object using theodolite.

Course Objectives:

The course aims to enable the students

- Basic experiments such as Magnetic Field Measurements, Hall Effect and LCR resonance give the knowledge to apply them in magnetic applications and circuits design.
- The measurements relating to various physical parameters of materials make the student to understand their utility, design and fabrication of several devices.
- The experiments like CRO, Solar Cell, Photo cell provides the thorough understanding of Opto Electronic devices useful in Engineering and Industrial applications.
- Utilization of the principles of light such as interference and diffraction to measure wavelength and radius of curvature of Lenses.

Course Outcomes:

After the successful completion of the course, the students will be able to

- CO1:** Acknowledge the important aspects of earth magnetic field, realize the use of Maxwell's equations in various magnetic applications
- CO2:** Realization of material properties and parameters
- CO3:** Get hands-on experience in various Opto-electronic devices like CRO, Solar Cell, Photo Cell and their applications
- CO4:** To apply the phenomenon of interference and Laser principles to find radius of curvature and wavelength respectively by various methods

CO4	3	2	-	-	-	-	3	-	-	-	-	2	-	-	-

List of Experiments

1. Determination of acceleration due to gravity at a place using compound pendulum.
2. To study the variation of intensity of magnetic field along the axis of a circular coil using Stewart-Gee's apparatus.
3. To draw the characteristic curves of P-N Junction diode.
4. Determination of radius of curvature of a Plano convex lens by forming Newton's rings.
5. Determination of wavelengths of mercury spectrum using grating normal incidence method.
6. To draw the characteristic curves of Zener diode.
7. To draw the resonant characteristic curves of L.C.R. series circuit and calculate the Resonant frequency.
8. To draw the characteristic curves of a photocell and calculate the maximum velocity of electron.
9. Verify the laws of transverse vibration of stretched string using Sonometer.
10. Determination of rigidity modulus of the given material of the wire using Torsional pendulum.
11. To draw the load characteristic curves of a solar cell.
12. Determination of Hall coefficient of a semiconductor.
13. Determination of voltage and frequency of an A.C. signal using C.R.O.
14. Determination of Forbidden energy gap of Si & Ge.
15. Determination of wavelength of laser source using Diode laser.
16. To draw the characteristic curves of Photo diode.
17. To draw the Diode valve characteristics.

Note: Any three experiments can be done virtually. A minimum of ten (10 no.) experiments are to be done and recorded.

Course Objectives:

The course aims to enable the students

- to verify and apply basic electrical laws and theorems.
- to conduct experiments on electrical machines.
- with hands-on experience in analyzing the V-I characteristics of semiconductor devices and their applications.
- to analyze and characterize the operations transistor, MOSFET and Op-Amps.

Course Outcomes:

After the successful completion of the course, the students will be able to

- CO1:** Verify and apply basic network theorems through practical experimentation, thereby gaining a deep understanding of circuit analysis techniques.
- CO2:** Demonstrate the ability to perform experiments on electrical machines and interpret their operational characteristics and performance metrics.
- CO3:** Analyze the V-I characteristics of diodes, and understand their roles in rectifier circuits and enhancing their understanding of semiconductor behavior in practical applications.
- CO4:** Characterize the performance of BJTs, MOSFETs and designing and analyzing operational amplifier circuits to prepare them for advanced electronic circuit design.

List of Experiments

1.
 - a) Write a C program to demonstrate the use of printf statement to print values of variables of different data types.
 - b) Write a C program to demonstrate the use of printf and scanf statements to read and print values of variables of different data types.
2. Write a C program to perform addition, subtraction, multiplication, division and modulo division on two integer numbers.
3. Write a C program for electricity bill tacking different categories of users, different slabs in each category. (using nested if else statement).
4. Write a C program to evaluate the following using loops
 - a) $1 + x^2/2! + x^4/4! + \dots$ upto 5 terms
 - b) $x + x^3/3! + x^5/5! + \dots$ upto 5 terms
5. Write a C program to check whether the given number is
 - a) Prime or not
 - b) Perfect or abundant or deficient
6. Write a C program to print the following patterns
 - i) 1
 - ii) 1 12 1 2 1 123 1 2 3 2 1 1234 1 2 3 4 3 2 1
7. Write a C program to find the mean, mode, median, and variance of list of values by using one dimensional array.
8. Write a menu driven program to read a list of numbers and perform the following operations
 - a) Print the list
 - b) Delete duplicates from the list
 - c) Reverse the list
9. Write a program to read a list of numbers and search for given number using binary search algorithm and if found display its index otherwise display the message “element not found in the list” using functions.
10. Write a menu driven program to read two matrices and compute their sum and product using functions.
11. Write a menu driven program to read list of student names and perform the following operations using functions.
 - a) To print list of names
 - b) To sort them in ascending order
 - c) To print the list after sorting

Bapatla Engineering College

(Autonomous)

64

-
12. Write a c program that consists of recursive functions to find
- a) Factorial of a given number
 - b) Solve towers of Hanoi with three towers (A,B,C) with three towers initially on tower A.

Note: A minimum of ten (10 no.) experiments are to be done and recorded.

Numerical Methods & Advanced Calculus B.Tech – II Semester (24IT201)

Lectures	:	2 Hours / Week	Tutorial	:	1	Practical	:	0
CIE Marks	:	40	SEE Marks	:	60	Credits	:	3

Prerequisites:

None

Course Objectives:

The course aims to enable the students

- Solve algebraic, transcendental and system of linear equations with the help of numerical methods.
- Apply the techniques of numerical integration whenever and wherever routine methods are not applicable and solve the first order ordinary differential equations numerically with the given initial condition using different methods.
- Evaluate double and triple integrals and apply them to find areas and volumes.
- Evaluate the line, surface and volume integrals and learn their inter-relations and applications.

Course Outcomes:

After the successful completion of the course, the students will be able to

CO1: Solve non-linear equations and system of linear equations with the help of Numerical techniques.

CO2: Solve the first order ordinary differential equations numerically with the given initial condition.

CO3: Find the area and volume of plane and three dimensional figures using multiple integrals.

CO4: Apply vector integral theorems to obtain the solutions of engineering problems involving circulation, flux, and divergence in vector fields.

UNIT - I

(11 Hours)

Numerical Solution of Equations: Introduction; Solution of algebraic and transcendental equations: Bisection method, Method of false position, Newton-Raphson method; Useful deductions from the Newton-Raphson formula; Solution of linear simultaneous equations;

Direct methods of solution: Gauss-Jordan method, Factorization method;

Iterative methods of solution: Jacobi's iteration method, Gauss-Seidel iteration method.

(Sections: 28.1; 28.2; 28.3; 28.5; 28.6.2, 28.6.3; 28.7.1; 28.7.2)

UNIT - II

(12 Hours)

Finite differences and Interpolation:

Finite differences: Forward differences, Backward differences;

Newton's interpolation formulae: Newton's forward interpolation formula; Newton's backward interpolation formula; Interpolation with unequal intervals; Lagrange's interpolation formula; Divided differences; Newton's divided difference formula; Numerical integration; Trapezoidal rule; Simpson's one-third rule; Simpson's three-eighth rule;

Numerical solution of ODE's: Introduction; Euler's method; Runge-Kutta method.

(Sections: 29.1.1; 29.1.2; 29.6; 29.9; 29.10; 29.11; 29.12; 30.4; 30.6; 30.7; 30.8; 32.1; 32.4; 32.7)

UNIT - III

(12 Hours)

Multiple Integrals: Double integrals; Change of order of integration; Double integrals in polar coordinates; Area enclosed by plane curves; Triple integrals;

Volumes of solids: Volume as Triple integral, Change of variables: For triple integrals.

(Sections: 7.1; 7.2; 7.3; 7.4; 7.5; 7.6.2; 7.7.2)

UNIT - IV

(11 Hours)

Vector calculus and its Applications: Scalar and vector point functions; Del applied to scalar point functions-Gradient: Definition, Directional derivative; Del applied to vector point functions: Divergence, Curl; Line integral; Surfaces: Surface integral, Flux across a surface; Green's theorem in the plane (without proof); Stokes theorem (without proof); Gauss Divergence theorem (without proof).

(Sections: 8.4; 8.5.1; 8.5.3; 8.6; 8.11; 8.12.2; 8.12.3; 8.13; 8.14; 8.16)

Department of Information Technology

Engineering Chemistry (Common to CS,CB,DS & IT) B.Tech – II Semester (24IT202)

Lectures	:	3 Hours / Week	Tutorial	:	0	Practical	:	0
CIE Marks	:	40	SEE Marks	:	60	Credits	:	3

Prerequisites:

None

Course Objectives:

The course aims to enable the students

- to familiarize importance of usage of various polymers and fuels in household & industry
- to outline the basics for the construction of electrochemical cells, batteries and fuel cells. Understand the mechanism of corrosion and how it can be prevented.
- to impart the concept of soft and hard waters, softening methods of hard water and various instrumental methods of analysis of samples.
- to outline the basics of some advanced concepts like computational chemistry, nanomaterials and liquid crystals.

Course Outcomes:

After the successful completion of the course, the students will be able to

- CO1:** Explain the preparation, properties, and applications of plastics, elastomers and biodegradable polymers also to explain calorific value, characteristics and applications of conventional and alternative fuels.
- CO2:** Apply the knowledge of electro chemistry for understanding the working of electrodes and electrochemical energy systems, as well as corrosion theories and protection methods.
- CO3:** Analyse the methods to produce soft water for industrial use and potable water by economical means and study the principles of different analytical techniques and their applications.
- CO4:** Demonstrate the knowledge of computational chemistry, and applications of advanced materials in engineering.

CO	Program Outcomes(POs)												PSOs		
	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3
CO1	3	3	2	-	-	2	3	-	-	-	-	2	-	-	-
CO2	3	3	3	-	-	-	2	-	-	-	-	2	-	-	-
CO3	3	3	3	2	-	2	2	-	-	-	-	3	-	-	-
CO4	3	3	2	3	3	-	-	-	-	-	-	2	-	-	-

UNIT - I

(11 Hours)

Polymers and Fuel Chemistry: Introduction to polymers, functionality of monomers. Thermoplastics and Thermo-setting plastics- Preparation, properties and applications of PVC and Bakelite. Biodegradable polymers- Preparation, properties and applications of PHB and PHBV. Elastomers-Preparation, properties and applications of Buna S and Buna N. Fuels-Types of fuels, calorific value of fuels-determination by Bomb calorimeter, Liquid Fuels-refining of petroleum, Knocking, Octane and Cetane number, Flue gas analysis by Orsat's apparatus, Introduction to alternative fuels-methanol, ethanol and bio fuel-bio diesel (preparation and applications).

UNIT - II

(12 Hours)

Electrochemical Cells and Corrosion: Single electrode potential, Reference electrodes- construction and working of standard hydrogen electrode and calomel electrode; Batteries (Li ion battery and zinc air cells), fuel cells (H₂-O₂, and molten carbonate). Electrochemical sensors-potentiometric sensors and amperometric sensors with examples. Corrosion-Definition, theories of corrosion (chemical and electrochemical), Types of corrosion-galvanic corrosion, differential aeration corrosion, stress corrosion, factors influencing rate of corrosion, corrosion control (cathodic protection), Protective coatings-electroplating (Gold) and electroless plating (nickel).

UNIT - III

(12 Hours)

Water Technology: Soft and hard water, Estimation of hardness of water by EDTA Method-numerical problems, Boiler troubles-Priming, foaming, scale and sludge, Caustic embrittlement, Specifications for drinking water- World health organization (WHO) standards, Industrial water treatment- Ion-exchange process, desalination of brackish water by reverse osmosis (RO) and electro dialysis.

Instrumental Methods of Analysis: Electromagnetic spectrum-UV (Principle, instrumentation, and applications), FT-IR (Principle, instrumentation, and applications), magnetic resonance imaging and CT scan (procedure and applications).

UNIT - IV

(11 Hours)

Nano Materials: Advanced Concepts/Materials in Engineering Chemistry: Introduction to computational chemistry, and docking studies.

Semiconductors Introduction, basic concept, Types-Intrinsic & Extrinsic Semiconductors, applications.

Nano materials: Introduction, classification of nano materials, engineering applications, properties and applications of Carbon nano tubes and Graphenes nanoparticles.

Liquid crystals: Introduction, liquid crystalline displays (LCD)-applications. Polymers for light emitting diodes (LEDs)-Introduction, classification of polymer LEDs, Organic LEDs-their commercial uses.

Communicative English B.Tech – II Semester (24IT203)

Lectures	:	2 Hours / Week	Tutorial	:	0	Practical	:	0
CIE Marks	:	40	SEE Marks	:	60	Credits	:	2

Prerequisites:

None

Course Objectives:

The course aims

- To enhance the vocabulary competency of the students
- To enable the students to demonstrate proficiency in the use of written English, including proper spelling, grammar, and punctuation
- To enhance theoretical and conceptual understanding of the elements of grammar
- To enable the students to apply the conventions of academic writing in English

Course Outcomes:

After the successful completion of the course, the students will be able to

CO1: Understand how to build academic vocabulary to enrich their writing skills

CO2: Produce accurate grammatical sentences

CO3: Analyse the content of the text in writing

CO4: Produce coherent and unified paragraphs with adequate support and detail

Department of Information Technology

UNIT - I

(7 Hours)

Vocabulary Development: Word formation-Formation of Nouns, Verbs & Adjectives from Root words-Suffixes and Prefixes.

Essential Grammar: Prepositions, Articles.

Basic Writing Skills: Punctuation in writing.

Writing Practices: Mind Mapping, Paragraph writing (structure-Descriptive, Narrative, Expository & Persuasive)

UNIT - II

(7 Hours)

Vocabulary Development: Synonyms and Antonyms.

Essential Grammar: Concord, Conjunctions, Common Errors: Practice

Basic Writing Skills: Coherence in Writing: Jumbled Sentences

Writing Practices: Letter writing

UNIT - III

(7 Hours)

Vocabulary Development: One word Substitutes

Essential Grammar: Tenses, Modal Verbs, Voices

Basic Writing Skills: Using Phrases and clauses

Writing Practices: Note Making

UNIT - IV

(7 Hours)

Vocabulary Development: Words often confused

Essential Grammar: Reported speech, Common Errors: Practice

Basic Writing Skills: Sentence structures (Simple, Complex & Compound)

Writing Practices: Paraphrasing & Summarizing, Essay Writing

Bapatla Engineering College

(Autonomous)

73

Department of Information Technology

UNIT - I

(11 Hours)

Pointers: Introduction, Definition and Uses of Pointers, Address Operator &, Pointer Variables, Dereferencing Pointers, void Pointers, Pointer Arithmetic, Pointers to Pointers, Pointers and Arrays, Passing Arrays to Functions, Pointers and Functions, Accessing Arrays Inside Functions, Pointers and Two-dimensional Arrays, Array of Pointers, Pointer Constants, Pointers and Strings, Pointers in Standard String Library Functions, Two-dimensional Array of Characters, Array of Pointers to Strings, More String Library functions, Pointers to Functions.

Structures and Unions: Introduction, Declaring and Using Structures, Structure Initialization, Structure within Structure, Operations on Structures, Array of Structures, Array within Structure, Creating User Defined Data Types, Pointers to Structures, Pointers within Structures, Structures and Functions, Unions, Differences between Structures and Unions, Operations on A union, Scope of A union, Bit Fields in Structures.

UNIT - II

(12 Hours)

Files: Introduction, End of File, File-handling Functions, File Types, Unbuffered and Buffered Files, Error Handling.

Dynamic Memory Allocation: Introduction, Library Functions for Dynamic Memory Allocation.

Object-Oriented Paradigm: Why new Programming Paradigms?, Evolution of Programming Paradigms, Objects, Classes, Inheritance, Polymorphism, Streams based I/O, Scope Resolution Operator, Variable Definition at the Point of Use, Type Conversion.

UNIT - III

(12 Hours)

Classes and Objects: Introduction, Class Specification, Class Objects, Accessing Class Members, Defining Member Functions, Outside member functions as inline, Accessing member functions within the Class, Data hiding, Passing objects as arguments, Returning objects from functions, Friend functions and Friend classes, Static data and member functions, Constructors, Destructors.

Overloading: Introduction, Parameters Passing by Reference, Inline Functions, Function Overloading.

UNIT - IV

(11 Hours)

Operator Overloading: Introduction, Overloadable Operators, Unary Operator Overloading, operator Keyword, Operator return values, Binary Operator Overloading, Arithmetic Operator Overloading, Concatenation of strings, Comparison Operators, Arithmetic Assignment Operators, Overloading with friend functions, Assignment operator Overloading.

Inheritance: Introduction, Derived class declaration, forms of inheritance, inheritance and member accessibility, Constructors in derived classes, Destructors in derived classes, abstract classes, multilevel inheritance, multiple inheritance, hierarchical inheritance, hybrid inheritance, object composition-delegation.

Discrete Mathematics B.Tech – II Semester (24IT205)

Lectures	:	3 Hours / Week	Tutorial	:	0	Practical	:	0
CIE Marks	:	40	SEE Marks	:	60	Credits	:	3

Prerequisites:

None

Course Objectives:

The course aims

- to introduce operations on discrete structures such as sets, functions, and relations. Formulate short proofs using methods of proof of an implication. Verify the correctness of an argument using propositional logic and truth tables. Construct mathematical arguments using logical connectives and quantifiers.
- to enable the student to verify the correctness of an argument using rules of inference for quantified propositions. Apply algorithms and use definitions to solve problems to prove statements in elementary number theory. Understand counting and indirect counting techniques and combinatory in the context of discrete probability.
- to introduce sequences, generating functions, and recurrence relations. and enable student to compute coefficients for generating functions and solve homogeneous and inhomogeneous recurrence relations.
- to introduce the properties of binary relations, partial orderings and lattices. Construct graphs and adjacency matrices for binary relations.

Course Outcomes:

After the successful completion of the course, the students will be able to

CO1: describe the basic principles of sets, relations, functions and inference rules for validating arguments.

CO2: prove that the given statement is valid by using mathematical induction and utilize a variety of counting strategies to solve computational problems.

CO3: solve different types of recurrence relations.

CO4: describe operations and representations of a binary relation.

CO4	3	3	-	-	-	-	-	-	-	-	-	-	3	-

UNIT - I

(11 Hours)

Foundations: Sets, Relations and Functions, Fundamentals of Logic, Logical Inferences, Methods of Proof of an implication, First order Logic & Other methods of proof.

UNIT - II

(12 Hours)

Rules of Inference for Quantified propositions, Mathematical Induction.

Elementary Combinatorics: Basics of Counting, Combinations and Permutations, Enumeration of Combinations and Permutations, Enumerating Combinations and Permutations with repetitions, Enumerating Permutation with Constrained repetitions.

UNIT - III

(12 Hours)

Recurrence relations: Generating functions of sequences, Calculating Coefficients of Generating Functions.

Recurrence Relations: Solving recurrence relations by substitution and generating functions, the methods of finding characteristic roots.

UNIT - IV

(11 Hours)

Recurrence Relations: Solutions of inhomogeneous recurrence relations.

Relations: Special properties of binary relations, Operations on relation. Ordering relations, Lattice, Paths and Closures, Directed Graphs and Adjacency Matrices.

Course Objectives:

The course aims to enable the students

- to understand the importance of engineering graphics in the field of engineering
- to improve drawing skills and to follow Bureau of Indian Standards
- to give an idea about geometric constructions and orthographic projections
- to improve imagination skills about orientation of points, surfaces and solids
- to learn drafting skills of AutoCAD

Course Outcomes:

After the successful completion of the course, the students will be able to

CO1: Draw projections of points and projections of lines using Auto CAD

CO2: Plot projections of surfaces like circle, pentagon, hexagon and rhombus

CO3: Plot the Projections of solids like Prisms and pyramids

CO4: Convert the Isometric views into Orthographic views for simple objects.

Department of Information Technology

UNIT - I

(15 Hours)

Introduction: Introduction to Engineering drawing, geometrical constructions.

Introduction to AutoCAD: Advantages of AutoCAD over manual drafting, Basics of sheet selection, Draw tools, Modify tools, Dimensioning.

Method of projection: Principles of projection, First angle and third angle projections, projections of points, projections of straight lines inclined to one plane only.

UNIT - II

(15 Hours)

Projections of Planes: Projections of plane figures: circle, triangle, pentagon, hexagon and rhombus.

UNIT - III

(15 Hours)

Projections of Solids: Projections of solids like square, pentagonal, hexagonal prisms and pyramids, axis inclined to one plane only.

UNIT - IV

(15 Hours)

Orthographic Projections: Conversion of pictorial views into Orthographic views. (Treatment is limited to simple castings only).

Prerequisites:

None

Course Objectives:

The course aims

- To enable the students familiarize with practical chemical analysis techniques for determining key water quality parameters.
- To provide hands-on experience in performing volumetric and instrumental titrations to understand their chemical principles and applications.
- To develop proficiency in using laboratory equipment, following safety protocols, and accurately conducting experiments.
- To teach students the synthesis of common organic compounds and their characterization techniques.

Course Outcomes:

After the successful completion of the course, the students will be able to

CO1: Determine water quality parameters such as alkalinity and hardness.

CO2: Conduct volumetric titrations to estimate the concentration of chemical substances.

CO3: Apply instrumental methods such as pH metry and conductometry for titration experiments and colorimetry for verification of Beers law.

CO4: Synthesize and characterize common organic compounds like soap, resins, and aspirin.

CO	Program Outcomes(POs)												PSOs		
	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3

CO4	2	1	2	-	-	-	-	-	-	-	-	-	2	1

List of Experiments

1. Write C programs for the following using pointers and functions:
 - (a) Declare the array of 20 integer numbers. Find and display the average of only even numbers by using pointers.
 - (b) Write a program to reverse the string using pointers.
 - (c) Calculate the addition of two 4 X 4 matrices using pointers. Take the input from user.
2. A Bookshop maintains the inventory of books that are being sold at the shop. The list includes details such as author, title, price, publisher and stock position. Whenever a customer wants a book the sales person inputs the title and the author, and the system searches the list and displays whether it is available or not. If it is not, an appropriate message is displayed, if it is, then the system displays the book details and request for the number of copies required, if the requested copies are available the total cost of the requested copies is displayed otherwise the message “required copies not in stock” is displayed. Write a program for the above in structures with suitable functions.
3. Write a program in C to merge two files and write them to another file.
4. Write a C program to read a data file of students’ records with fields (Regno, Name, M1, M2, M3, M4, M5) and write the successful students data (percentage > 40%) to a data file.
5. Write a C++ program with a class to represent a bank account. Include the following members:
Data Members: 1.Name of the depositor 2.Account Number 3.Type of account 4.Balance amount in the account.
Member functions: 1.To assign initial values 2.To deposit an amount 3.To withdraw an amount after checking the balance 4.To display name and Balance.
6. Create a class called 'TIME' that has
 - three integer data members for hours, minutes and seconds
 - constructor to initialize the object to zero
 - constructor to initialize the object to some constant value
 - member function to add two TIME objects
 - member function to display time in HH:MM:SS format Write a main function to create two TIME objects, add them and display the result in HH:MM:SS format.
7. Write a C++ program to illustrate static member functions.
8. Write a C++ program to implement function overloading in order to compute power(m,n) where i) m is double and n is int ii) m and n are int. Use a default value of 2 for n to make the function to calculate squares when this argument is omitted.
9. Create a 'STRING' class which overloads '==' operator to compare two STRING objects using a) friend function b) without using friend function.
10. Write a C++ program to overload '++' and '-' operators to convert a string to uppercase and lowercase respectively.
11. Write a C++ program on Composition.
12. Write a C++ program on Inheritance.

Probability and Statistics

(Common to all branches)

B.Tech – III Semester (24IT301)

Lectures	:	2 Hours / Week	Tutorial	:	1	Practical	:	0
CIA Marks	:	40	SEE Marks	:	60	Credits	:	3

Prerequisites:

None

Course Objectives:

The course aims to enable the students

- to employ discrete and continuous probability distributions to analyze and solve real world problems in Engineering fields.
- to estimate the point and interval estimators of the mean, variance and proportion for the given Sample data and apply Z-test, t-test to various real-life problems
- to apply various sample tests like F-test and χ^2 -test for decision making regarding the population based on sample data.
- to compute the level of correlation, the best fit curve to the given data by the method of least squares and also perform ANOVA arising in the field of engineering.

Course Outcomes:

After the successful completion of the course the students will be able to

- CO1** Apply discrete and continuous probability distributions to various problems arising in Engineering applications.
- CO2** Perform Test of Hypothesis for a population parameter for single sample.
- CO3** Perform Test of Hypothesis for population parameters for multiple samples.
- CO4** Interpret the results of correlation, regression and one way ANOVA for the given data.

CO4	3	3	3	-	-	-	-	-	-	-	-	2	-	-	-

UNIT - I

(12 Hours)

Descriptive measures, Random variables and Probability distributions: Arithmetic mean, median and mode, Random variables, Binomial distribution, The mean and variance of a probability distribution, Poisson approximation to the Binomial distribution, Continuous Random Variables, Normal Distribution, Normal Approximation to the Binomial Distribution, Uniform Distribution, Weibull distribution.

(Sections 2.5, 4.1, 4.2, 4.4, 4.6, 5.1, 5.2, 5.3, 5.5, 5.9)

UNIT - II

(12 Hours)

Sampling distributions and Inferences concerning one mean: Populations and Samples, The sampling distribution of the mean (σ known), The sampling distribution of the mean (σ unknown), The sampling distribution of the variance, Point estimation, Interval estimation, Tests of Hypotheses, Null Hypothesis and Tests of hypotheses, Hypothesis concerning one mean.

(Sections 6.1, 6.2, 6.3, 6.4, 7.1, 7.2, 7.4, 7.5, 7.6)

UNIT - III

(12 Hours)

Comparing two treatments and Inferences concerning variances: Comparisons-Two independent large samples, Comparisons-Two independent small samples, matched pairs comparisons, the estimation of variances, Hypotheses concerning one variance, Hypotheses concerning two variances.

(Sections 8.2, 8.3, 8.4, 9.1, 9.2, 9.3)

UNIT - IV

(12 Hours)

Inferences concerning proportions, Regression Analysis and Analysis of variance: Estimation of proportions, Hypotheses concerning one proportion, Hypotheses concerning two proportions, the method of least squares, curvilinear regression, multiple regression, correlation, some general principles, Completely Randomized Designs (One way ANOVA).

(Sections 10.1, 10.2, 10.3, 11.1, 11.3, 11.4, 11.6, 12.1, 12.2)

Digital Logic Design (Common to CSE & IT) B.Tech – III Semester (24IT302)

Lectures	:	3 Hours / Week	Tutorial	:	0	Practical	:	0
CIE Marks	:	40	SEE Marks	:	60	Credits	:	3

Prerequisites:

None

Course Objectives:

The course aims to enable the students

- Apply various simplification methods to simplify the Boolean expressions
- Design and analysis of combinational circuits.
- Design and analysis of sequential circuits.
- Design various counters, registers and Programmable Logic Devices

Course Outcomes:

After the successful completion of the course the students will be able to

CO1 Explain digital number system, boolean algebra, circuit design and minimization.

CO2 Design the combinational circuits

CO3 Analyze synchronous sequential circuits

CO4 Design registers, counters and memories.

Mapping of COs with POs & Program Specific Outcomes (PSOs):

Department of Information Technology

UNIT - I

(11 Hours)

Digital Systems and Binary Numbers: Digital System, Binary Numbers, Number base Conversions, Octal and Hexadecimal Numbers, Complements of Numbers, Signed Binary Numbers, Binary Codes, Binary Storage and Registers, Binary Logic, Error Detection and Correction: 7 bit Hamming Code.

Boolean Algebra & Logic Gates: Introduction, Basic definitions, Axiomatic definition of Boolean algebra, Basic theorems and properties of Boolean algebra, Boolean functions, Canonical and Standard Forms, Other Logic Operations, Digital logic gates.

Gate-Level Minimization: Introduction, The map method, Four-variable K-Map, Product-of-Sums Simplification, Don't –Care Conditions.

UNIT - II

(10 Hours)

Minimization: The Tabulation method, Determination of prime implicants, Selection of prime-implicants.

Combinational Logic: Introduction, Combinational Circuits, Analysis Procedure, Design Procedure, Binary Adders - Subtractor, Decimal Adder, Magnitude Comparator, Decoders, Encoders, Multiplexers.

UNIT - III

(10 Hours)

Synchronous Sequential Logic: Introduction, Sequential Circuits, Storage Elements - Latches, Storage Elements -Flip Flops. **Analysis of Clocked Sequential Circuits:** State Equations, State Table, State Diagram, Flip Flop Input Equations, Analysis with D, JK and T Flip Flops; State reduction and Assignment, Design Procedure.

UNIT - IV

(11 Hours)

Registers and Counters: Registers, Ripple Counters, Synchronous Counters.

Memory and Programmable Logic: Introduction, Random Access Memory: Read and Write Operations, Types of Memories; Read Only Memory, Programmable Logic Devices: PROM, PLA, PAL.

Prerequisites:

Programming for Problem Solving (24IT204)

Course Objectives:

The course aims to enable the students

- To Understand the role of Data structures in structuring and analysis procedure of an algorithm.
- To Learn the concept of Stack, Queue and various Sorting techniques.
- To Understand the concept of Binary Tree, Binary Search Tree, AVL tree, Heap Data Structures.
- To Learn the concept of Hashing and Graph traversals.

Course Outcomes:

After the successful completion of the course the students will be able to

- CO1** Analyze the concepts of algorithm evolution and compute their time & space complexities. To elaborate various lists along with their operations.
- CO2** Solve various real time problems using stack and queue data structures. Develop algorithms and programs for various sorting techniques.
- CO3** Analyze the concepts of trees, binary trees , AVL trees and priority queues.
- CO4** Analyze various hashing techniques and Graph traversals.

CO3	3	3	3	-	-	-	-	-	-	-	-	3	3	-
CO4	3	3	3	-	-	-	-	-	-	-	-	3	3	-

UNIT - I

(12 Hours)

Introduction: Algorithm, Importance of Algorithm Analysis, Complexity of an Algorithm, Asymptotic Analysis and Notations. Data Structure, Classification of Data Structures.

Lists: Abstract Data Types, The List ADT, Singly Linked List ADT, Doubly Linked List ADT, Circular Linked List ADT, Polynomial ADT: addition, multiplication operations.

UNIT - II

(12 Hours)

Stacks and Queues: The Stack ADT and its applications such as Infix to Postfix expression conversions, Evaluation of Postfix expressions. The Queue ADT, Queue Application-Radix sort.

Basic Sorting Techniques: Bubble sort, Selection sort, Insertion sort, Shell sort.

UNIT - III

(12 Hours)

Trees: Preliminaries, Binary Trees, The Search Tree ADT, Binary Search Trees, Implementations, AVL Trees-Single Rotations, Double rotations, Implementations.

Priority Queues (Heaps): Model, Simple implementations, Binary Heap, Heap Sort.

UNIT - IV

(11 Hours)

Graphs: Preliminaries and Representation of graphs, Graph traversals:BFS and DFS.

Hashing: General Idea, Hash Function, Separate Chaining, Open Addressing.

Object Oriented Programming

(Common to CSE & IT)

B.Tech – III Semester (24IT304)

Lectures	:	3 Hours / Week	Tutorial	:	0	Practical	:	0
CIA Marks	:	40	SEE Marks	:	60	Credits	:	3

Prerequisites:

Programming for Problem Solving(24IT204)

Course Objectives:

The course aims to enable the students

- to introduce encapsulation mechanisms
- to introduce inheritance, exception handling, packages, interfaces and strings.
- to introduce collections, multithreading and input/output concepts of Java Programming Language
- to introduce JavaFX.

Course Outcomes:

After the successful completion of the course the students will be able to

CO1 Describe encapsulation mechanism of Java.

CO2 Describe inheritance, exception handling, packages, interfaces and strings concepts of Java.

CO3 Demonstrate collections, multithreading and input/output concepts of Java Programming Language

CO4 Build GUI applications using JavaFX

Mapping of Course Outcomes with POs and Program Specific Outcomes(PSOs):

Bapatla Engineering College

(Autonomous)

94

Department of Information Technology

UNIT - I

(11 Hours)

Introduction to Java: History, Java Byte Code, Java Buzzwords. Data Types, Variables and Arrays. Operators, Control Statements. Introducing Classes, A Closer Look at Methods and Classes.

UNIT - II

(12 Hours)

Inheritance

Exception Handling

Packages and Interfaces

Strings: String Constructors, Any 10 String class methods, StringBuffer class, Any 10 StringBuffer class methods.

UNIT - III

(12 Hours)

Type Wrappers, Autoboxing/Unboxing.

Collections: Collections Overview, Names of Collection Interfaces, Collection Classes: LinkedList, ArrayList.

Multithreaded Programming: Introduction, Life Cycle, Thread creation – Thread Class, Runnable Interface, Thread Priority, Synchronization, Inter thread Communication.

I/O: I/O Basics, Reading Console Input, Writing Console Output, The Print Writer class, Reading and Writing Files, Automatically Closing a File.

UNIT - IV

(12 Hours)

Introducing JavaFX GUI Programming: JavaFX Basic Concepts, A JavaFX Application Skeleton, Compiling and Running a JavaFX Program, The Application Thread, A Simple JavaFX Control: Label, Using Buttons and Events, Drawing Directly on a Canvas.

Exploring JavaFX Controls: Using Image and ImageView, ToggleButton, RadioButton, CheckBox, ListView, ComboBox, TextField, ScrollPane, TreeView.

Introducing JavaFX Menus: Menu Basics, An Overview of MenuBar, Menu, and MenuItem, MenuBar, Menu, MenuItem, Create a Main Menu, Add Mnemonics and Accelerators to Menu Items, Add Images to Menu Items, Use RadioMenuItem and CheckMenuItem, Create a Context Menu, Create a Toolbar, Put the Entire MenuDemo Program Together, Continuing Your Exploration of JavaFX.

Lectures	:	3 Hours / Week	Tutorial	:	0	Practical	:	0
CIA Marks	:	40	SEE Marks	:	60	Credits	:	3

Prerequisites:

None The course aims to enable the students

Course Objectives:

- Understand the basic concepts of data communication, layered model, protocols and OSI & TCP layers
- Understand the basic concepts of Data Link control, Network Layer Design Issues, Routing Algorithms & Congestion.
- Understand the basic concepts of Quality of service, Network Layer & Transport Layer
- Understand the basic concepts of TCP, UDP & Application Layer

Course Outcomes:

After the successful completion of the course the students will be able to

- CO1** Describe the fundamentals of networks, network reference models and various error correction and detection techniques
- CO2** Explain error control, flow control mechanisms used at data link layer and various routing and congestion control protocols in network design
- CO3** Demonstrate the basic principles of IPV4 and its addressing mechanisms, elements of transport protocols in transport layer
- CO4** Discuss the underlying protocols in transport layer and application layer.

CO4	1	2	2	2	1	-	-	-	1	1	-	1	2	1	

UNIT - I

(11 Hours)

Data Communications & Networking Overview: A Communications Model, Data Communications, Data Communication Networking.

Protocol Architecture: The Need for a Protocol Architecture, A Simple Protocol Architecture, OSI, The TCP/IP Protocol Architecture.

Digital Data Communication Techniques: Asynchronous & Synchronous Transmission, Types of Errors, Error Detection, Error Correction.

UNIT - II

(12 Hours)

Data Link Control: Flow Control, Error Control, HDLC

Network Layer: Network Layer Design Issues, Store-and-Forward Packet Switching, Services Provided to the Transport Layer, Implementation of Connectionless Service, Implementation of Connection-Oriented Service, Comparison of Virtual-Circuit & Datagram Subnets.

Routing Algorithms: The Optimality Principle, Shortest Path Routing, Flooding, Distance Vector Routing, Link State Routing, Hierarchical Routing.

Congestion Control Algorithms: General Principles of Congestion Control, Congestion Prevention Policies, Congestion Control in Virtual-Circuit Subnets, Congestion Control in Datagram Subnets, Load Shedding, Jitter Control.

UNIT - III

(12 Hours)

Quality of Service: Requirements, Techniques for Achieving Good Quality of Service

The Network Layer in the Internet: The IP Protocol, IP Addresses, Internet Control Protocols.

The Transport Layer, Transport Service: Services Provided to the Upper Layers, Transport Service Primitives.

Elements of Transport Protocols: Addressing, Connection Establishment, Connection Release.

UNIT - IV

(11 Hours)

The Internet Transport Protocol (UDP): Introduction to UDP, Remote Procedure Call, The Real-Time Transport Protocol.

The Internet Transport Protocol (TCP): Introduction to TCP, The TCP Service Model, The TCP Protocol, The TCP Segment Header, TCP Connection Establishment, TCP Connection Release, Modeling TCP Connection Management, TCP Transmission Policy, TCP Congestion Control, TCP Timer Management.

Application Layer: The Domain Name System(DNS): The DNS Name Space, Resource Records, Name Servers.

Python Programming B.Tech – IV Semester (24ITL301/SEC1)

Lectures	:	1 Hours / Week	Tutorial	:	0	Practical	:	2
CIE Marks	:	40	SEE Marks	:	60	Credits	:	2

Prerequisites:

None

Course Objectives:

The course aims to enable the students

- to identify the syntax and semantics of Python
- to write python scripts for solving real time problems
- to enhance the object oriented programming skills of the students
- to perform file i/o operations in python

Course Outcomes:

After the successful completion of the course the students will be able to

CO1 Use the basic python constructs for problem solving

CO2 Apply lists, dictionaries and tuples to organize the data in real world problems

CO3 Apply lists, dictionaries, tuples and file operations to organize the data in real world problems

CO4 Implement the problems in terms of real world objects using object oriented and database concepts

Mapping of Course Outcomes with POs and Program Specific Outcomes(PSOs):

COs	Program Outcomes(POs)													PSOs	
	1	2	3	4	5	6	7	8	9	10	11	13	14	15

CO4	3	3	3	-	-	-	2	-	2	-	3	3	3	3	

UNIT - I

(3 Hours)

Introduction to Python: Syntax, Operators, Control Structures, Functions: lambda, reduce, filter and map functions.

Strings: Operators overloaded for String objects, String comparison, String methods, Parsing strings.

Regular expressions: Character matching in regular expressions, extracting data using regular expressions, combining search and extraction, escape character.

UNIT - II

(4 Hours)

Lists: Characteristics of List objects, Operators overloaded for List objects, List comprehension, Methods of List objects.

Dictionaries: Characteristics of Dictionary objects, Operators overloaded for Dictionary objects, List comprehension, Methods of Dictionary objects.

Tuples: Characteristics of Tuple objects, Operators overloaded for Tuple objects, Methods of Tuple objects.

UNIT - III

(4 Hours)

Object-Oriented Programming: Classes and Objects, Classes and Functions, Classes and Methods, Inheritance

UNIT - IV

(3 Hours)

Files I/O: persistence, opening files, text files and lines, reading files, searching through a file, letting the user choose the file name, using try except and open, writing files.

LIST OF EXPERIMENTS

1. Operators, Control structures:

- Write a Python program to input two numbers and display their sum, difference, product, and quotient of division. (Covers variables, expressions, operators, input/output).
- Write a Python program to check if a number is positive, negative, or zero. (Covers if, elif, else).
- Write a Python program to find the largest of three numbers using nested if. (Covers nested conditionals).
- Write a Python program to print the Fibonacci sequence up to n terms using a loop. (Covers loops, updating variables).
- Write a Python program to find the factorial of a number using a while loop. (Covers while loop and loop control).

2. Functions:

- Write a Python program to define a function that checks whether a number is prime. (Covers user-defined functions, return values).
- Write a Python program using built-in functions like len(), type(), int() and random.randint() to demonstrate their usage. (Covers built-in and standard library functions).
- Write a Python single line script to create a list of squares of even numbers in a range of numbers using comprehension.

Sample Input: [1, 2, 3, 4, 5, 6]

Expected Output: [4, 16, 36]

- (d) Write a Python Program to create a lambda function to add two numbers.
- (e) Write a Python single line script to filter odd numbers from a list using lambda and filter functions.
Sample Input: [1, 2, 3, 4, 5, 6]
Expected Output: [1, 3, 5]
- (f) Write a Python program to filter prime numbers using a helper function (like: is_prime) and filter with lambda.

3. Strings:

- (a) Write a Python program to count the number of vowels, consonants, digits, and special characters in a string. (Covers string traversal, conditions, in operator).
- (b) Write a Python program to extract the domain name from an email address. (Covers slicing, find(), string methods)
- (c) Write a python single line script to convert a list of numbers to strings and join them with any special character.
Sample Input: [1, 2, 3, 4, 5, 6]
Expected Output1: 1+2+3+4+5+6
Expected Output2: "1" "2" "3" "4" "5" "6"
Expected Output3: 123456
Expected Output4: 1-2-3-4-5-6
Expected Output5: 1^2 ^3 ^4 ^5 ^6

4. Lists:

- (a) Write a Python program to remove duplicates from a list and sort it. (Covers list methods and operations).
- (b) Write a Python program to split a list every Nth element.
Sample Input: list1 = ['a', 'b', 'c', 'd', 'e', 'f', 'g', 'h', 'i', 'j', 'k', 'l', 'm', 'n']
Expected Output: output_list = [['a', 'd', 'g', 'j', 'm'], ['b', 'e', 'h', 'k', 'n'], ['c', 'f', 'i', 'l']]
- (c) Write a Python program to compute the similarity between two lists.
Sample Input: Colors1 = ["red", "orange", "green", "blue", "white"] Colors2 = ["black", "yellow", "green", "blue"]

Expected Output: Colors1-Colors2 = ['white', 'orange', 'red'] Colors2-Colors1 = ['black', 'yellow']
- (d) Write a Python program to find the second largest number in a list. (Covers list traversal and conditions).
- (e) Write a Python program to join the list elements using join function.
Sample Input: ['Department', 'of', 'Information', 'Technology']
Expected Output1: DepartmentofInformationTechnology
Expected Output2: Department of Information Technology
Expected Output3: Department-of-Information-Technology
Expected Output4: Department@-of@-Information@-Technology
Expected Output5: Department+of+Information+Technology

- (f) Write a Python single line script to double the list values using map and anonymous function.
Sample Input: [1, 2, 3, 4, 5, 6]
Expected Output: [2, 4, 6, 8, 10, 12]
- (g) Write a Python single line program to get the transpose of a 2D matrix using nested list comprehension.
Sample Input: matrix = [[1, 2, 3], [4, 5, 6]]
Expected Output: [[1, 4], [2, 5], [3, 6]]
- (h) Write a Python single line script to assign grades based on marks using conditional logic in list.
Where student_grade = 'A' if student_marks >= 90, student_grade = 'B' if student_marks >= 75, student_grade = 'C' if student_marks >= 50, else student_grade = 'F'.
Sample Input: student_marks = [95, 67, 80, 45, 76]
Sample Output: student_grades = ['A', 'C', 'B', 'F', 'B']
- (i) Write a python single line script for the following using map() function
- Given a list of numbers, return the list of squares
Sample Input: numbers = [1, 2, 3, 4, 5]
Sample Output: squares = [1, 4, 9, 16, 25]
 - Convert a list of string numbers to actual integers
Sample Input: string_numbers = ['1', '2', '3', '4', '5']
- (j) Write a Python single line script to flatten a nested list of two dimension into a single dimension list using list comprehension.
Sample Input: nested_list = [[1, 2], [3, 4], [5, 6], [7], [8, 9, 10]]
Sample Output: flat_list = [1, 2, 3, 4, 5, 6, 7, 8, 9, 10]

5. Dictionaries:

- (a) Write a Python program to count the frequency of each word in a user-provided string using a dictionary. (Covers dictionary creation and looping).
- (b) Write a Python program to combine two dictionaries by adding values for common keys.
Sample Input: dict1 = 'a': 100, 'b': 200, 'c': 300, dict2 = 'a': 300, 'b': 200, 'd': 400
Sample output: Combined_dict = 'a': 400, 'b': 400, 'd': 400, 'c': 300
- (c) Write a Python single line program to sort a dictionary by values using lambda function.
Sample Input: 'S1': 88, 'Stu2': 72, 'Stu3': 91, 'S4': 90, 'S5': 79
Expected Output: 'Stu2': 72, 'S5': 79, 'S1': 88, 'S4': 90, 'Stu3': 91
- (d) Write a Python single line script to join dictionary keys into a single special character separated string using join function.
Sample Input: 'name': 'John', 'age': 20, 'grade': 'A'
Sample Output: name, age, grade

6. Tuples:

- (a) Write a Python program to replace last value of tuples in a list.
Sample Input: list1 = [(10, 20, 40), (40, 50, 60), (70, 80, 90)]
Expected Output: new_list = [(10, 20, 100), (40, 50, 100), (70, 80, 100)]
- (b) Write a Python program to sort a list of tuples based on the second element. (Covers tuples and sort).

- (c) Write a Python single line script to sort a list of tuples using lambda on the second element of the tuple.

Sample Input: [('apple', 3), ('banana', 1), ('cherry', 2)]

Sample Output: Sorted Tuples: [('banana', 1), ('cherry', 2), ('apple', 3)]

7. Object-Oriented Programming:

- (a) Write a Python program to define a class Student with attributes name and marks, and a method to display them. (Covers class, object, methods).
- (b) Write a Python program to demonstrate inheritance with classes Person and Employee. (Covers inheritance and method overriding).

8. Files I/O:

- (a) Write a Python program to read a text file and count the number of lines, words, and characters. (Covers file reading and parsing)
- (b) Write a Python program to write a list of strings into a text file. (Covers file writing).
- (c) Write a Python program to find the longest word in each line of given file.

103

Department of Information Technology

Design Thinking & Innovation

(Common to CSE & IT)

B.Tech – III Semester (24ITL302)

Lectures	:	1 Hours / Week	Tutorial	:	0	Practical	:	2
CIA Marks	:	40	SEE Marks	:	60	Credits	:	2

Prerequisites:

None

Course Objectives:

- Provide an overview of design thinking.
- Engage students to allow them to the components of design thinking into their own courses.
- Nurture their skills to contribute for solving community-based problems
- Provide a framework to work in teams to solve problems

Course Outcomes:

After the successful completion of the course the students will be able to

CO1 Describe the components of design thinking

CO2 Discuss the importance of users & community partners in the design process in proposing solutions

CO3 Employ prototyping and failure handling into their design experiences

CO4 List attributes of expert designers

Mapping of Course Outcomes with POs and Program Specific Outcomes(PSOs):

COs	Program Outcomes(POs)												PSOs		
	1	2	3	4	5	6	7	8	9	10	11	1	2	3	
CO1	3	2	3	3	3	3	3	3	3	1	3	-	-	-	
CO2	3	3	3	3	3	3	3	3	3	2	3	-	-	-	
CO3	3	3	3	3	3	3	3	3	3	2	3	-	-	-	
CO4	3	3	3	1	2	2	3	3	3	2	3	-	-	-	

Bapatla Engineering College

(Autonomous)

104

Department of Information Technology

UNIT - I

(3 Hours)

Introduction to Design Thinking: Characteristics of design thinking, Expert and novice design characteristics, Opportunities for student to learn skills needed for the development of expertise.

Case study for design thinking success: Creating a culture of design learning, Gathering information from users, Rapid prototyping.

UNIT - II

(4 Hours)

Users and community partners: Understanding users, identifying users, creating tools for understanding users.

Requirements and specifications: Defining specifications, State of the art comparisons, Testing requirements.

UNIT - III

(4 Hours)

Prototyping: Prototypes for technology, Prototypes for communication Ideation and concept generation: Brainstorming, Concept generation, Functional decomposition.

Testing and design to prevent failures: Testing of designs, Design for Failure Modes and Effects Analysis (DFMEA), Delivery to users.

UNIT - IV

(3 Hours)

Teaming concepts in design: Managing student teams, Organizing teams, Assessing teams, Mentoring and advising teams.

Closure and summary: Reviewing design cycles and concepts, Putting it into action.

Practical Exercises

1. IDEO Tool Kit – Design Thinking Case Study
2. Community Project – identification – community partner –prototype evaluation
3. Functional Decomposition – eg: Mechanical Pencil
4. Prototyping Exercise – using paper/thermos coal/cardboard/recyclable material, testability and maintainability
5. Requirement and Specification Analysis
6. The Lean Canvas Model – business model
7. Thirty Circle Exercise – IDEO thinking
8. Risk Analysis – case study – DFMEA Analysis

CO4	3	3	3	-	3	-	2	-	2	-	3	3	3	3

List of Experiments

- Write a program to perform the following operations on Array List 1.Creation,2.Insertion, 3.Deletion, 4.Search, 5.Display.
- Write a program that reads two lists of elements, prints them, reverses them,Prints the reverse list, sort the lists, print the sorted lists, merges the list, prints merge list using array list.
- Write a program to perform the following operations on Single Linked List. a)Creation b)Insertion c)Deletion d)Search e)Display.
- Write a program to perform the following operations on Doubly Linked List. a)Creation b)Insertion c)Deletion d)Search e)Display.
- Write a program to perform addition and multiplication of two polynomials using single Linked List.
- Write a program to implement the following using stack. a) infix to postfix conversion b) postfix evaluation

Bapatla Engineering College

(Autonomous)

107

Department of Information Technology

7. Write a program that performs Radix sort on a given set of elements using queue.
8. Write a program to perform the following operations on Disjoint Set. a)Make-Set b)Find-Set c)Union.
9. Write a program to read n numbers in an array. Redisplay the arraylist with elements being sorted in ascending order using Heap Sort.
10. Write a program to demonstrate Binary Expression tree.
11. Write a program to perform Binary Search tree operations and traversals.
12. Write a program to implement AVL tree that interactively allows (a) Insertion (b)Deletion (c) Find_min (d) Find_max.
13. Write a program to implement DFS & BFS graph traversing techniques.
14. Write a program to find an element using Open Addressing.

Department of Information Technology

Object Oriented Programming Lab

(Common to CSE & IT)

B.Tech – III Semester (24ITL304)

Lectures	:	0 Hours / Week	Tutorial	:	0	Practical	:	3
CIA Marks	:	40	SEE Marks	:	60	Credits	:	1.5

Course Outcomes:

After the successful completion of the course the students will be able to

CO1 Implement OOP concepts using its advantages over structured programming.

CO2 Develop and implement inheritance, polymorphism.

CO3 Analyze Exception Handling, Multithreading, I/O.

CO4 Create code for Event Handling, Applets, AWT and Swings.

Mapping of Course Outcomes with POs and Program Specific Outcomes(PSOs):

COs	Program Outcomes(POs)												PSOs	
	1	2	3	4	5	6	7	8	9	10	11	1	2	3
CO1	3	2	3	-	-	-	-	-	-	-	-	3	3	2
CO2	3	2	3	-	-	-	-	-	-	-	-	3	3	2
CO3	3	2	3	-	-	-	-	-	-	-	-	3	3	2
CO4	3	2	3	-	2	-	-	-	-	-	-	3	3	2

List of Experiments

1. Write a java program to demonstrate static member, static method and static block.
2. Write a java program to demonstrate method overloading and method overriding.
3. Write a java program to implement multiple inheritance.
4. Write a java program to demonstrate finals, blank finals, final methods, and final classes.
5. Write a program to demonstrate packages.
6. Write a java program to demonstrate interfaces.
7. Write a java program to create user defined exception class and test this class.
8. Write a java program to demonstrate synchronous keyword.

Bapatla Engineering College

(Autonomous)

109

Department of Information Technology

9. Write an applet program to demonstrate Graphics class.
10. Write GUI application which uses awt components like label, button, text field, text area, choice, checkbox, checkbox group.
11. Write a program to demonstrate MouseListener, MouseMotionListener, KeyboardListener, ActionListener, ItemListener.
12. Develop swing application which uses JTree, Jtable, JComboBox.

B.Tech – III Semester (24ITL305)

Lectures	:	0 Hours / Week	Tutorial	:	0	Practical	:	1
CIA Marks	:	0	SEE Marks	:	100	Credits	:	0.5

Prerequisites:

None

Course Objectives:

The objectives of this course are

- to impart discipline, character, fraternity, teamwork, social consciousness among the students.
- to engage the students in selfless service

Course Outcomes:

After the successful completion of the course the students will be able to

CO1 develop discipline, character and service motto.

CO2 solve some societal issues by applying acquired knowledge, facts, and techniques.

CO3 explore human relationships by analyzing social problems.

CO4 extend their help through leadership skills and civic responsibilities to the fellow beings and downtrodden people.

Mapping of Course Outcomes with POs and Program Specific Outcomes(PSOs):

COs	Program Outcomes(POs)												PSOs

Department of Information Technology

UNIT - I

(3 Hours)

General Orientation on NSS/NCC/ Scouts & Guides/Community Service activities and career guidance.

Activities:

1. Conducting -ice breaking sessions-expectations from the course-knowing personal talents and skills
2. Conducting orientations programs for the students -future plans-activities-releasing road map etc.
3. Displaying success stories-motivational biopics-award winning movies on societal issues etc.
4. Conducting talent show in singing patriotic songs-paintings-any other contribution.

UNIT - II

(3 Hours)

Nature & Care

Activities:

1. Best out of waste competition.
2. Poster and signs making competition to spread environmental awareness.
3. Recycling and environmental pollution article writing competition.
4. Organising Zero-waste day.
5. Digital Environmental awareness activity via various social media platforms.
6. Virtual demonstration of different eco-friendly approaches for sustainable living.
7. Write a summary on any book related to environmental issues.

UNIT - III

(3 Hours)

Community Service

Activities:

1. Conducting One Day Special Camp in a village contacting village-area leaders-Survey in the village, identification of problems-helping them to solve via media-authorities-experts-etc.
2. Conducting awareness programs on Health-related issues such as General Health, Mental health, Spiritual Health, HIV/AIDS.
3. Conducting consumer Awareness. Explaining various legal provisions etc.
4. Women Empowerment Programmes-Sexual Abuse, Adolescent Health and Population Education. v) Any other programmes in collaboration with local charities, NGOs etc.

Lectures	:	2 Hours / Week	Tutorial	:	0	Practical	:	0
CIA Marks	:	40	SEE Marks	:	0	Credits	:	0

Prerequisites:

None

Course Objectives:

The course aims to enable the students

- understand and learn about ecosystem and biodiversity existing in nature.
- know about the natural resources and sustainability
- understand different types of pollutions present in Environment
- know the global environmental problems with case studies

Course Outcomes:

After the successful completion of the course the students will be able to

CO1 develop a strong understanding of ecosystems, biodiversity and the importance of their conservation

CO2 gain an understanding of the protection of natural resources for environmental protection and sustainability.

CO3 describe how to manage the harmful pollutions

CO4 create awareness among the youth on environmental concerns important in the long-term interest of the society.

Department of Information Technology

UNIT - I

(7 Hours)

Ecosystems: Definition, Structure and Functions of Ecosystems, Forest Ecosystem. **Biodiversity:** Definition and levels of Biodiversity; Values of Biodiversity, Threats and Conservation of Biodiversity.

UNIT - II

(7 Hours)

Natural resources: Land: Land as a resource, Causes and effects of land degradation, Water: floods and drought, Dams - benefits and problems.

Sustainability: Rain water harvesting and Watershed management.

UNIT - III

(7 Hours)

Pollution: Definition; Causes, effects and control of air, water pollution. **Solid Waste Management:** 3R approach, composting and vermicomposting. **Environmental acts:** Water and air (Prevention and Control of pollution) acts, Environmental protection act, Forest Conservation act.

UNIT - IV

(7 Hours)

Environmental issues: Global warming, Ozone layer depletion, Acid rains.

Case Studies: Bhopal Tragedy, Mathura Refinery and TajMahal.

Computer Organization

(Common to CSE & IT)

B.Tech – IV Semester (24IT401)

Lectures	:	3 Hours / Week	Tutorial	:	0	Practical	:	0
CIA Marks	:	40	SEE Marks	:	60	Credits	:	3

Prerequisites:

Digital Logic Design (24IT302)

Course Objectives:

The course aims to enable the students

- Represent the data, micro-operations, and hardware implementation of arithmetic, logic and shift unit.
- Know about the instruction codes and generation of control signals using hardwired and micro-programmed approaches.
- Learn about the different types of instructions and arithmetic operations.
- Understand the organization of the memory and I/O units.

Course Outcomes:

After the successful completion of the course the students will be able to

CO1 Describe the basic structure of computer and analyze the concepts of machine instructions.

CO2 Illustrate the various arithmetic operation and learn about basic processing time.

CO3 Draw flowcharts for the arithmetic operations, using the basic computer instruction set.

CO4 Describe the I/O and memory organizations.

CO4	2	-	2	-	-	-	-	-	-	-	-	3	-	-	

UNIT - I

(11 Hours)

Computer Data Representation: Introduction to Computer Organization, Data Types, Complements, Fixed-Point Representation, Floating-Point Representation.

Register Transfer Language and Micro-operations: Register Transfer Language, Register Transfer, Bus and Memory Transfers, Arithmetic Micro Operations, Logic micro operations, Shift Micro Operations, Arithmetic Logic Shift Unit.

UNIT - II

(12 Hours)

Basic Computer Organization and Design: Instruction Codes, Computer Registers, Computer Instructions, Timing and Control, Instruction Cycle, Memory-Reference Instructions, Input-Output and Interrupt, Design of Accumulator Logic.

Micro Programmed Control: Control Memory, Address Sequencing, Microprogram Example, Design of Control Unit.

UNIT - III

(12 Hours)

Central Processing Unit: General Register Organization, Stack Organization, Instruction Formats, Addressing Modes, Data Transfer and Manipulation, Program Control, Reduced Instruction Set Computer vs Complex Instruction Set Computers.

Computer Arithmetic: Addition and Subtraction, Multiplication Algorithms, Division Algorithms.

UNIT - IV

(11 Hours)

The Memory System: Memory Hierarchy, Main Memory, Auxiliary Memory, Associative Memory, Cache Memory.

Input-Output Organization: Peripheral Devices, Input-Output Interface, Modes of Transfer, Priority Interrupt, Direct Memory Access.

Lectures	:	3 Hours / Week	Tutorial	:	0	Practical	:	0
CIA Marks	:	40	SEE Marks	:	60	Credits	:	3

Prerequisites:

None

Course Objectives:

The course aims to enable the students

- Learn the mechanism of OS to handle Processes & Threads and their communication.
- Learn the algorithms involved in CPU scheduling.
- Gain knowledge on concepts that includes Dead locks and Main Memory
- Know the concepts related to Virtual Memory, File Access Methods & Mass Storage structure.

Course Outcomes:

After the successful completion of the course the students will be able to

- CO1** Analyze the structure of OS and basic architectural components involved in OS design.
- CO2** Develop various process scheduling algorithms for a given specification of CPU utilization, throughput, TAT, WT & RT.
- CO3** Articulate the causes and effects of deadlocks and comprehend memory management concepts.
- CO4** Comprehend virtual memory management, Design and implement various file allocation methods and Disk Scheduling Algorithms.

CO4	3	3	3	-	-	-	-	-	-	-	-	-	3	-	-

UNIT - I

(11 Hours)

Introduction: What OSs Do, Computer System Operation, Storage structure, OS Structure, OS Operations.

Operating-System Structures: OS Services, User and operating system Interface, System Calls, Types of System Calls, System Programs, OS Design and Implementation, OS Structure.

Processes: Process Concept, Process Scheduling, Operations on Processes, Inter- process Communication.

Threads: Overview, Multicore Programming, Multithreading Models

UNIT - II

(12 Hours)

CPU scheduling: Basic Concepts, Scheduling Criteria, Scheduling Algorithms.

Process synchronization: Background, The Critical-Section Problem, Peterson's Solution, Synchronization Hardware, Mutex Locks, Semaphores, Classic problems of Synchronization, Monitors.

UNIT - III

(12 Hours)

Deadlocks: System Model, Deadlock Characterization, Methods for Handling Deadlocks, Deadlock Prevention, Avoidance, Detection and Recovery.

Memory Management: Background, Swapping, Contiguous Memory Allocation: Fixed partitioning, Variable partitioning, Non-Contiguous Memory Allocation: Paging, Structure of Page Table, multilevel paging, Segmentation, Segmentation with paging.

UNIT - IV

(11 Hours)

Virtual-Memory: Background, Demand Paging, Translation lookaside buffer, Page Replacement, Allocation of Frames, Thrashing.

File System Interface: File concept, Access Methods, Directory and Disk Structure.

File System Implementation: File System Structures, Directory Implementation, Allocation Methods

Mass Storage Structure: Over View, Disk Structure, Disk Scheduling, Disk Management, RAID levels

Web Technologies B.Tech – IV Semester (24IT403)

Lectures	:	3 Hours / Week	Tutorial	:	0	Practical	:	0
CIE Marks	:	40	SEE Marks	:	60	Credits	:	3

Prerequisites:

None

Course Objectives:

The course aims to enable the students

- To describe the structure and function of the world wide web.
- To design static and dynamic web pages using HTML, CSS, and JavaScript.
- To build interactive web applications using modern front-end web frameworks.
- To explore tools, best practices, and deployment techniques in front-end web development.

Course Outcomes:

After the successful completion of the course the students will be able to

CO1 To describe the structure and function of the world wide web.

CO2 To design static and dynamic web pages using HTML, CSS, and JavaScript.

CO3 To build interactive web applications using modern front-end frameworks.

CO4 To explore tools, best practices, and deployment techniques in front-end web development.

Mapping of Course Outcomes with POs and Program Specific Outcomes(PSOs):

Bapatla Engineering College

(Autonomous)

121

Department of Information Technology

UNIT - I

(11 Hours)

Introduction to Web Architecture: Client-server model, HTTP/HTTPS, Web servers.

HTML5: Document structure, semantic elements, forms, multimedia.

CSS3: Styling, box model, positioning, Flexbox, Grid.

Responsive Web Design: Media queries, mobile-first design.

Lab Practice: Create a static multi-section web page with a responsive layout.

UNIT - II

(12 Hours)

JavaScript Basics: Syntax, variables, data types, functions, loops.

DOM Manipulation: Event handling, modifying DOM elements.

ES6 Features: Arrow functions, let/const, template literals, spread/rest.

Form Validation: Client-side validation techniques.

Lab Practice: Develop interactive elements like sliders, form validators.

UNIT - III

(12 Hours)

Introduction to React.js: JSX, Components, Props, State, Functional Components vs Class Components. Handling Forms and Events in React.

React Hooks: useState, useEffect.

Routing in React: React Router basics.

Lab Practice: Build a React application with navigation and dynamic data.

UNIT - IV

(11 Hours)

Tools, Deployment & Best Practices: Version Control with Git and GitHub. NPM and Webpack (Introductory Concepts).

Performance Optimization: Lazy loading, asset management.

Deployment: GitHub Pages, Netlify, Vercel. Introduction to CI/CD (Conceptual Overview).

Lab Practice: Host a React app on GitHub Pages or Netlify with version control.

Database Management Systems B.Tech – IV Semester (24IT404)

Lectures	:	3 Hours / Week	Tutorial	:	0	Practical	:	0
CIE Marks	:	40	SEE Marks	:	60	Credits	:	3

Prerequisites:

None

Course Objectives:

The course aims to enable the students

- Familiarize with fundamental concepts of database and various database architectures and Design relations for Relational databases using conceptual data modeling.
- Implement formal relational operations in relational algebra and SQL.
- Identify the Indexing types and normalization process for relational databases
- Use mechanisms for the development of multi user database applications.

Course Outcomes:

After the successful completion of the course the students will be able to

- CO1** Apply knowledge of database design methodology which give a good formal foundation in relational data model and Understand and apply the principles of data modeling using ER Model.
- CO2** Create relational algebra expressions, relational calculus, and SQL for queries and be familiar with relational database theory
- CO3** Design database schema and Identify and solve the redundancy problem in database tables using normalization.
- CO4** Learn about transaction processing, concurrency management, and recovery methods.

Mapping of Course Outcomes with POs and Program Specific Outcomes(PSOs):

COs	Program Outcomes(POs)													PSOs	
	1	2	3	4	5	6	7	8	9	10	11	13	14	15	
CO1	3	3	3	3	-	-	-	-	-	-	-	3	3	2	
CO2	3	3	3	3	3	-	-	-	-	-	-	3	3	2	
CO3	3	3	3	3	-	-	-	-	-	-	-	3	3	2	
CO4	3	3	3	3	-	-	-	-	-	-	-	3	3	2	

Bapatla Engineering College

(Autonomous)

124

Department of Information Technology

UNIT - I

(11 Hours)

Databases and Database Users: Introduction - An Example, Characteristics of the Database Approach, Actors on the Scene, Workers behind the Scene, Advantages of Using the DBMS Approach.

Database System Concepts and Architecture: Data Models, Schemas and Instances, Three-Schema Architecture and Data Independence, Database Languages and Interfaces, The Database System Environment, Centralized and Client/Server Architectures for DBMSs.

Data Modelling Using the Entity-Relationship (ER) Model: Using High-Level Conceptual Data Models for Database Design, An Example Database Application, Entity Types, Entity Sets, Attributes, and Keys - Relationship Types, Relationship Sets, Roles, and Structural Constraints, Weak Entity Types, Refining the ER Design for the COMPANY Database - ER Diagrams, Naming Conventions, and Design Issues.

UNIT - II

(12 Hours)

The Relational Algebra and Relational Calculus: Unary Relational Operations: SELECT and PROJECT, Relational Algebra Operations from Set Theory, Binary Relational Operations: JOIN and DIVISION, Additional Relational Operations, The Tuple Relational Calculus, The Domain Relational Calculus.

Schema Definition, Constraints, Queries, and Views: SQL Data Definition and Data Types, Specifying Constraints in SQL, Schema Change Statements in SQL, Basic Queries in SQL, More Complex SQL Queries, INSERT, DELETE, and UPDATE Statements in SQL, Views (Virtual Tables) in SQL.

UNIT - III

(12 Hours)

Indexing Structures for Files: Types of Single-Level Ordered Indexes, Multilevel Indexes - Dynamic Multilevel Indexes using B+-Trees.

Functional Dependencies and Normalization for Relational Databases: Informal Design Guidelines for Relation Schemas, Functional Dependencies, Normal Forms Based on Primary Keys - General Definitions of Second and Third Normal Forms, Boyce-Codd Normal Form.

Relational Database Design Algorithms and Further Dependencies: Properties of Relational Decompositions - Lossless Join Decomposition and Dependency Preserving Decomposition, Algorithms for Relational Database Schema Design, Multi-valued Dependencies and Fourth Normal Form, Join Dependencies and Fifth Normal Form.

UNIT - IV

(12 Hours)

Introduction to Transaction Processing Concepts and Theory: Introduction to Transaction Processing, Transaction and System Concepts, Desirable Properties of Transactions, Characterizing Schedules Based on Recoverability, Characterizing Schedules Based on Serializability.

Concurrency Control Techniques: Two-Phase Locking Techniques for Concurrency Control, Concurrency Control Based on Timestamp Ordering, Multi-version Concurrency Control Techniques, Validation (Optimistic) Concurrency Control Techniques, Granularity of Data Items and Multiple Granularity Locking.

Database Recovery Techniques: Recovery Concepts, Recovery Techniques Based on Deferred Update, Recovery Techniques Based on Immediate Update, Shadow Paging.

Design and Analysis of Algorithms

B.Tech – IV Semester (24IT405)

Lectures	:	3 Hours / Week	Tutorial	:	0	Practical	:	0
CIE Marks	:	40	SEE Marks	:	60	Credits	:	3

Prerequisites:

Data Structures (24IT303)

Course Objectives:

The course aims to enable the students

- Understand about designing and the effectiveness of an algorithm, and applying the Master Theorem to find the complexity.
- Strengthen the divide and conquer paradigms and know the optimal solution finding with the greedy method.
- Acquaintance with algorithm design strategies of Dynamic programming and easily know the significant graph algorithms and their analyses.
- Get the ability to backtrack and branch with bound values and NP problems.

Course Outcomes:

After the successful completion of the course the students will be able to

- CO1** Analyze algorithms' performance using various strategies and apply the Master theorem to estimate the complexity of divide-and-conquer algorithms.
- CO2** Apply the divide-and-conquer and greedy techniques to solve problems and perform complexity analysis.
- CO3** Articulate on graph problems and identify the applicability of the dynamic programming paradigm for designing solutions to problems.
- CO4** Utilize the backtracking and branch and bound algorithms to find every potential solution to combinatorial and optimization issues. In addition, classify the P and NP complicated problems.

Mapping of Course Outcomes with POs and Program Specific Outcomes(PSOs):

COs	Program Outcomes(POs)											PSOs		
	1	2	3	4	5	6	7	8	9	10	11	1	2	3
CO1	3	3	3	-	-	-	-	-	-	-	3	3	3	-
CO2	3	3	3	-	-	-	-	-	-	-	3	3	3	-
CO3	3	3	3	-	-	-	-	-	-	-	3	3	3	-
CO4	3	3	3	-	-	-	-	-	-	-	3	3	3	-

UNIT - I

(11 Hours)

Introduction: Algorithm, Pseudo code for expressing algorithms, Performance Analysis- Space complexity, Time complexity, Asymptotic Notation.

Master Theorem: Introduction, Generic Form- Case1, Case2, Case3, Inadmissible equations, Application to standard algorithms.

UNIT - II

(12 Hours)

Divide and conquer : General method , applications - Quick sort, Merge sort, Strassen's matrix multiplication.

Greedy method : General method, applications-Job sequencing with deadlines, Fractional knapsack problem, Minimum cost spanning trees - Prims, Kruskal, Single source shortest path problem - Dijkstra Algorithm.

UNIT - III

(12 Hours)

Dynamic Programming: General method, applications - Multi-stage graphs using Forward & Backward approach, 0/1 knapsack problem, Reliability design, The Travelling salesperson problem and Longest common subsequence algorithm.

Graph Applications: Connected components, Bi-Connected Components, Strongly Connected Components.

UNIT - IV

(11 Hours)

Backtracking: General method, applications - The 8-queens problem, sum of subsets problem.

Branch and Bound: General method, applications- LC Branch and Bound solution for 0/1 knapsack problem.

NP-Hard and NP-Complete problems: Basic concepts - non-deterministic algorithms, NP-Hard and NP Complete classes, Cook's theorem.

(Common to CSE & IT)

B.Tech – III Semester (24ITL401/SEC2)

Lectures	:	1 Hours / Week	Tutorial	:	0	Practical	:	2
CIA Marks	:	40	SEE Marks	:	60	Credits	:	2

Prerequisites:

—

Course Objectives:

The course aims to enable the students

- to organize and manipulate files and directories and Use the vi text editor to create and modify files.
- to use SED command for insertion, deletion, and search and replace (substitution) and Understand pattern scanning and processing using AWK.
- to create structured shell programming which accept and use positional parameters and exported variables.
- to understand File management system calls to provide I/O support for storage device types and multiple users.

Course Outcomes:

After the successful completion of the course the students will be able to

CO1 Write basic commands for data processing

CO2 Apply filter commands on data files

CO3 Develop shell script programs for applications

CO4 Develop programs on file management system calls for applications

Bapatla Engineering College

(Autonomous)

130

Department of Information Technology

Mapping of Course Outcomes with POs and Program Specific Outcomes(PSOs):

COs	Program Outcomes(POs)												PSOs		
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CO1	3	2	2	2	2	-	-	-	3	2	-	2	3	2	2
CO2	3	2	2	2	2	-	-	-	3	2	-	2	3	2	2
CO3	3	2	2	2	2	-	-	-	3	2	-	2	3	2	2
CO4	3	2	2	2	2	-	-	-	3	2	-	2	3	2	2

UNIT - I

Directory commands: pwd, cd, mkdir, rmdir commands. The dot (.) and double dots (..) notations to represent present and parent directories and their usage in relative path names.

File related commands: Editing with vi, cat, mv, rm, cp, wc. File attributes and permissions and knowing them. The ls command with options. Changing file permissions: (chmod) the relative and absolute permissions changing methods. Recursively changing file permissions. Directory Permissions.

Other Basic commands: cal, date, df, du, find, jobs, kill, less and more, ps, set, wc, who.

Work Sheet

1. Obtain the following results (i) To print the name of operating system (ii) To print the login name (iii) To print the host name.
2. Find out the users who are currently logged in and find the particular user too.
3. Display the calendar for (i) Jan 2000 (ii) Feb 1999 (iii) 9th month of the year 7 A.D (iv) For the current month (v) Current Date Day Abbreviation, Month Abbreviation along with year.
4. Display the time in 12-Hour and 24 Hour Notations.
5. Display the Current Date and Current Time.
6. Display the message —GOOD MORNING in enlarged characters.
7. Display the name of your home directory.
8. Create a directory SAMPLE under your home directory.
9. Create a subdirectory by name TRIAL under SAMPLE.
10. Change to SAMPLE.
11. Change to your home directory.
12. Change from home directory to TRIAL by using absolute and relative pathname.
13. Remove directory TRIAL.
14. Create a directory TEST using absolute pathname.

15. Using a single command change from current directory to home directory.
16. Remove a directory using absolute pathname.
17. Create files my file and your file under Present Working Directory.
18. Display the files my file and your file.
19. Append more lines in the my file and your file files.
20. How will you create a hidden file?.
21. Copy myfile file to emp.
22. Write the command to create alias name for a file.
23. Move yourfile file to dept.
24. Copy emp file and dept file to TRIAL directory
25. Compare a file with itself.
26. Compare myfile file and emp file.

UNIT - II

The Stream Editor(sed): Line addressing, multiple instructions, context addressing, writing selected lines to a file, text editing ,substitution, basic regular expressions.

File Handling and Text Processing utilities: grep, egrep, fgrep.

AWK: sample awk filtering , splitting a line into fields, formatting output, variables and expressions, comparison operators, number processing, storing awk programs in a file, the BEGIN and END sections, Built in variables and arrays, control structures.

Work Sheet

1. **Create the following file as sed.lab: unix is great os. unix is open source. unix is free os. learn operating system. Unix linux which one you choose.(Each sentence in a line)**
 - Replace `_unix` with `_linux`.
 - Replace only the third (3rd) instance of `_unix` with `_linux`.
 - Try `sed 's/unix/linux/g' sed.lab`.
 - Replace `_unix` with `_linux` but only on line 3.
 - Add a new line, `_Actually Windows is best` after the second line.
2.
 - Viewing a range of lines of a document
 - Viewing the entire file except a given range
 - Viewing non-consecutive lines and ranges
 - Replacing words or characters inside a range

- Using regular expressions
 - Viewing lines containing with a given pattern
 - Inserting spaces in files
 - Performing two or more substitutions at once
3. • Design a command “**wishme**” that will greet you —good morning, good Afternoon, according to current time.
- Design a command “**fags**” that will list the files and their ages, to date.
- Design a command “**word-freq**” that will print the words and number of Occurrences of that word in the given text.

UNIT - III

Shell programming: shell, functions of shell, metacharacters, input redirections and output redirections, pipes, shell as a programming language, shell variables, predefined local variables, predefined environment variables, arithmetic and conditional expressions, control structures, positional parameters, passing command line arguments, built in shell commands, shell programs, functions and arrays.

Work Sheet

1. • Design a command “**which**” that prints the path of the command given as Argument
 - Design a command “**filelist[-c <char>]**” which prints all file names beginning with The character specified as argument to the command, if the position is not specified It should print all the file names.
 - Design a command **getline[-f <filename> -n <line number>]** which prints the line number lineno in the file specified with -f option. If the line number is not specified it should list all the lines in the given file
 - Design a command **monthly-file[-m <month>]** which list the files created in a given month where month is argument to be command. If the options is not specified it list the files in all the months.
2. • Design a command **list lines[-f <file name> -v <varname>]** which prints the line from the given file file name, which containing the variable varname. if arname Is not specified it should list, all the lines.
 - Design a command **avg[-n <colon> -f <file name>]** which prints the average of the given column in a file where colon and file name are arguments to the commands

UNIT - IV

File management System calls: Regular File management system calls: open(), read(), write(), lseek(), close(), unlink(), stat(), getdents().

Work Sheet

1. Write a C program to copy data from source file to destination file, where the file names are provided as command-line arguments.

Bapatla Engineering College

(Autonomous)

133

Department of Information Technology

2. Write a C program that reads every 100th byte from the file, where the file name is given as command-line argument.
3. Write a C program to display information of a given file which determines the type of file and inode information, where the file name is given as command-line arguments.

Web Technologies Lab B.Tech – IV Semester (24ITL402)

Lectures	:	0 Hours / Week	Tutorial	:	0	Practical	:	3
CIE Marks	:	40	SEE Marks	:	60	Credits	:	1.5

Prerequisites:

None

Course Objectives:

The course aims to enable the students

- To introduce the structure and function of the web.
- To design static and dynamic web pages using HTML, CSS, and JavaScript.
- To build interactive web applications using modern front-end frameworks.
- To explore tools, best practices, and deployment techniques in front-end development.

Course Outcomes:

After the successful completion of the course the students will be able to

CO1 Design responsive web interfaces using HTML5 and CSS3.

CO2 Develop interactive web features using JavaScript and DOM.

CO3 Create dynamic front-end applications using React.js.

CO4 Utilize version control systems and deploy web applications online.

Mapping of Course Outcomes with POs and Program Specific Outcomes(PSOs):

COs	Program Outcomes(POs)												PSOs	
	1	2	3	4	5	6	7	8	9	10	11	1	2	3
CO1	3	2	3	1	2	1	-	-	-	-	-	3	2	-
CO2	3	3	3	2	3	1	-	-	-	-	-	3	3	-
CO3	3	3	3	2	3	1	-	-	-	-	-	3	3	-
CO4	3	2	2	2	3	2	-	-	-	-	-	3	3	-

List of Experiments

1. Set up the development environment. Create a basic HTML page with a header, footer, and content section.
2. Build a form using HTML5 form elements. Include text fields, radio buttons, checkboxes, and validation attributes.
3. Design a page layout using CSS Flexbox. Style different sections of a webpage using custom classes.
4. Use CSS Grid to create a responsive gallery layout. Add media queries to adapt layout for mobile screens.
5. (a) Write JavaScript to manipulate DOM elements. Create a dynamic to-do list that adds/removes items.
(b) Add interactivity using event listeners. Implement a simple JavaScript calculator.
6. Create a form with real-time validation using JavaScript. Display error messages dynamically.
7. (a) Set up a React app using Create React App. Create a component-based UI for a simple profile page.
(b) Use props and state in a React app. Create a counter and a dynamic list of tasks.
8. Use React Hooks (useState, useEffect) to create an API fetch example. Display fetched data in components.
9. Build a multi-page app using React Router. Add navigation and route-based components.
10. Initialize a project repository with Git. Push changes to GitHub and manage branches.
11. Optimize a web page for performance. Use Chrome DevTools and Lighthouse to analyze and improve.
12. Deploy a React app to GitHub Pages or Netlify. Ensure live demo is accessible.

B.Tech – IV Semester (24ITL403)

Lectures	:	0 Hours / Week	Tutorial	:	0	Practical	:	3
CIE Marks	:	40	SEE Marks	:	60	Credits	:	1.5

Prerequisites:

None

Course Outcomes:

After the successful completion of the course the students will be able to

CO1 Design database by using ER diagrams

CO2 Implement DDL, DML and DCL commands using SQL.

CO3 Apply key constraints to get a normalized database.

CO4 Implement procedures and functions using PL/SQL

CO	Program Outcomes(POs)												PSOs	
	1	2	3	4	5	6	7	8	9	10	11	1	2	3
CO1	3	3	3	3	3	-	2	-	2	-	3	3	3	3

CO3	3	3	3	3	3	-	2	-	2	-	3	3	3	3
CO4	3	3	3	3	3	-	2	-	2	-	3	3	3	3

List of Experiments

1. Working with ER Diagram

Example: ER Diagram for Sailors Database

Entities:

1. Sailor

2. Boat Relationship:

Reserves Primary Key Attributes:

1. SID (Sailor Entity)

2. BID (Boat Entity)

2. Working with DDL, DML, DCL and Key Constraints

Creation, Altering and Dropping of Tables and Inserting Rows into a Table (Use Constraints While Creating Tables) Examples Using Select Command.

3. **Working with Queries and Nested QUERIES**
Queries (along with sub Queries) using ANY, ALL, IN, EXISTS, NOTEXISTS, UNION, INTERSET, Constraints.
4. **Working with Queries USING Aggregate Operators & views**
Queries using Aggregate Functions (COUNT, SUM, AVG, MAX and MIN), GROUP BY, HAVING and Creation and Dropping of Views.
5. **Working with Conversion Functions & String Functions**
Queries using Conversion Functions (TO_CHAR, TO_NUMBER AND TO_DATE), String Functions (CONCATENATION, LPAD, RPAD, LTRIM, RTRIM, LOWER, UPPER, INITCAP, LENGTH, SUBSTR AND INSTR), Date Functions (SYSDATE, NEXT_DAY, ADD_MONTHS, LAST_DAY, MONTHS_BETWEEN), LEAST, GREATEST, TRUNC, ROUND, TO_CHAR, TO_DATE.
6. **Working with LOOPS using PL/SQL**
Program Development using WHILE LOOPS, FOR LOOPS, Nested Loops using ERROR Handling.
7. **Working with Functions Using PL/SQL**
Program Development using Creation of Stored Functions, Invoke Functions in SQL Statements and Write Complex Functions.
8. **Working with Stored Procedures**
Programs Development using Creation of Procedures, Passing Parameters IN and OUT of PROCEDURES.
9. **Working with CURSORS**
Develop Programs using Features Parameters in a CURSOR, FOR UPDATE CURSOR, WHERE CURRENT of Clause and CURSOR Variables.
10. **Working with Triggers using PL/SQL**
Develop Programs using BEFORE and AFTER Triggers, Row and Statement Triggers and INSTEAD OF Triggers.

140

Department of Information Technology

UNIT - I

(10 Hours)

Concept of health and fitness, Nutrition and Balanced diet, basic concept of immunity Relationship between diet and fitness, Globalization and its impact on health, Body Mass Index (BMI) of all age groups.

Activities:

1. Organizing health awareness programmes in community
2. Preparation of health profile
3. Preparation of chart for balance diet for all age groups

UNIT - II

(10 Hours)

Concept of yoga, need for and importance of yoga, origin and history of yoga in Indian context, classification of yoga, Physiological effects of Asanas-Pranayama and meditation, stress management and yoga, Mental health and yoga practice.

Activities:

Yoga practices -Asana, Kriya, Mudra, Bandha, Dhyana, Surya Namaskar

UNIT - III

(10 Hours)

1. Participation in one major game and one individual sport viz., Athletics, Volleyball, Basketball, Handball, Football, Badminton, Kabaddi , Kho-kho, Table Tennis, Cricket etc., Practicing general and specific warm up, aerobics.
2. Practising cardiorespiratory fitness, treadmill, run test, 9 min walk, skipping and running.

Lectures	:	2 Hours / Week	Tutorial	:	0	Practical	:	0
CIE Marks	:	40	SEE Marks	:	0	Credits	:	0

Prerequisites:

None

Course Objectives:

The course aims to

- To provide basic information about fundamental law of the country.
- To educate the student about fundamental Rights and fundamental duties of citizens.
- To educate the students about Government organs, methods of functioning
- To motivate students to leave narrow selfish outlook and inculcate broad national, human outlook.

Course Outcomes:

After the successful completion of the course, the students will be able to

CO1 Describe the importance of the constitution in a Democratic Society

CO1 Describe the fundamental rights and duties of a citizen

CO1 Discuss about judicial supremacy and independence of judiciary and fight for his legitimate rights through court of law.

CO1 Applying the principles to participate in the democratic process of governance and in nation building activities.

UNIT - I

(7 Hours)

Meaning of the constitution law and constitutionalism

Historical perspective of the Constitution of India.

Salient features and characteristics of the constitution of India.

Preamble, union and its territory and citizenship.

UNIT - II

(8 Hours)

Fundamental rights principles.

Directive principles of state policy.

Fundamental duties.

The government of the union, The President, The Prime Minister, and the council of ministers, The parliament of India, The supreme court, The union judiciary

UNIT - III

(8 Hours)

The Machinery of Government in the states, The Governor, The Chief Minister and council of Ministers, The State legislature, High court, Judiciary in the states.

Union territories.

The Federal System, division of powers between centre and states, legislative administration and financial relation.

Emergency Provisions, President Rule, National Emergency, Financial Emergency.

UNIT - IV

(7 Hours)

Local self-Government, Panchayat Raj, Municipalities and municipal Corporation.

Miscellaneous Provisions, the comptroller and Auditor general of India, The Public Service commission, Special Provisions relating to certain classes, Elections — Political parties.

Amendment of the Constitution.

Laws Relating to Women.
