Department Vision

Our vision is to empower our students with the skills and knowledge necessary to meet the challenges of the 21st century, driving sustainable socio-economic development through innovative solutions and responsible use of technology.

Department Mission

M1: Catering to the needs of students by providing good infrastructure and by imparting skills relevant to the IT industry.

M2: To motivate students and faculty members towards self-learning to acquire knowledge about emerging technologies in the IT industry.

M3: Promoting research that leads to innovative solutions using cutting-edge technologies in IT domain for the benefit of the society.

M4: To inculcate team spirit, leadership qualities and ethics among the students and faculty.

- 1 A Training Program on **"JAVA Full Stack Development"** was held from May. 21 to Jul. 08, 2023. The resource person was Mr.K.Sai Prasanth, Assistant Professor, Dept. of IT, Trained by WIPRO. 65 students attended the program and 11 students were certified by WIPRO

- 2 Offered Honors Course on **"Software Project Management"** with industry expert from Jun. 17 to Sep. 26, 2023. The resource person was Mr. B.Ratna Babu, Dash Ninja Technologies. 19 students attended the course.

- 3 A **"Strategic Training Program to Equip Professional Skills (STEPS)"** was held from Sep. 04 to Dec. 12, 2023. The resource person was from ZIZA First Organization. 124 students attended the training.

- 4 Technical Quiz, Technical Seminar and Software Contest were conducted on the occasion of **"Engineer's Day-2023"** on Sep. 12,13 2023. IT students participated in the event.

- 5 A Five-Day Workshop on **"UIPath Robotic Process Automation"** was held from Sep. 19 to Sep. 23, 2023. The resource person was Nagaraju Ikkurthi, Solution Architect, Accenture. 120 students and 4 faculty members attended the workshop.

Department News

1. Mr. Bojadla Balaji has received 100% instructional plus Non-resident fee for full time graduate course at University of Cincinnati, USA.

Prog. Edu. Objectives

- PEO1: Become successful and ethical professionals in IT and ITES (Information Technology Enabled Services) industries contributing to societal progress.
- PEO2: Engage in life-long learning, adapting to changing technological scenarios.
- PEO3: Communicate and work effectively in diverse teams and exhibit leadership qualities.

Program Outcomes

- PO1 Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- PO2 Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- PO3 Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- PO4 Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- PO5 Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- PO6 The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

Program Outcomes

- PO7 Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- PO8 Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- PO9 Individual and Team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- PO10 Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- PO11 Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to ones own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- PO12 Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Prog. Spec. Outcomes

- PSO1 Domain knowledge: Acquire knowledge of hardware functionality, design and development of software components required to process the information.
- PSO2 Problem solving skills: Analyze data, Identify required data structures, design suitable algorithms, develop, operate and maintain software for real world problems.
- PSO3 Paradigm shifts: Understand the progressive changes in computing, possess knowledge of context aware applicability of paradigms.
